Africa Environment Outlook 2 United Nations, United Nations Environment Programme, United Nations Dept, African Ministerial Conference on the Environment, 2006 This is the second comprehensive report on the state of Africa's environment, produced in collaboration with the African Ministerial Conference on the Environment (AMCEN). This report highlights the central position Africa's environment continues to play in sustainable development, as well as its potential to achieve progress in the implementation of the Millennium Development Goals. The report profiles Africa's environmental resources as an asset for the continent's development. It highlights the opportunities presented by the region's natural resource base to support the continent's development. It also underscores the concept of sustainable livelihoods, and the importance of the environmental initiatives in supporting them.

Women in Business and Management ,2015 As women overtake men in education, they are running one-third of the world's businesses. However, women business-owners are concentrated in small and microbusinesses; fewer than 5 percent of CEOs of the largest global corporations are women. *Women in Business and Management* brings together available data and ILO statistics to provide a comprehensive, up-to-date, and global picture of women in the business world and in management positions. The report highlights the business case for gender diversity, the obstacles that women still face, and ways to move ahead. It advocates a greater role for national business organizations, which can assist their member companies in implementing policies and measures to recruit and retain talented women.

From Knowledge Abstraction to Management Aparajita Suman, 2013-10-31 The increasing volume of information in the contemporary world entails demand for efficient knowledge management (KM) systems; a logical method of information organization that will allow proper semantic querying to identify things that match meaning in natural language. On this concept, the role of an information manager goes beyond implementing a search and clustering system, to the ability to map and logically present the subject domain and related cross domains. *From Knowledge Abstraction to Management* answers this need by analysing ontology tools and techniques, helping the reader develop a conceptual framework from the digital library perspective. Beginning with the concept of knowledge abstraction, before discussing the Solecistic versus the Semantic Web, the book goes on to consider knowledge organisation, the development of conceptual frameworks, untying conceptual tangles, and the concept of faceted knowledge representation. Offers a semantic solution to knowledge and information managers Demonstrates the development of a system for semantic knowledge organization and retrieval Relevant to those without much coding experience

IBM System Storage DS8000 Performance Monitoring and Tuning Axel Westphal, Bert Dufrasne, Wilhelm Gardt, Jana Jamsek, Peter Kimmel, Flavio Morais, Paulus Usong, Alexander Warmuth, Kenta Yuge, IBM Redbooks, 2016-04-07 This IBM® Redbooks® publication provides guidance about how to configure, monitor, and manage your IBM DS8880 storage systems to achieve optimum performance, and it also covers the IBM DS8870 storage system. It describes the DS8880 performance features and characteristics, including hardware-related performance features, synergy items for certain operating systems, and other functions, such as IBM Easy Tier® and the DS8000® I/O Priority Manager. The book also describes specific performance considerations that apply to particular host environments, including database applications. This book also outlines the various tools that are available for monitoring and measuring I/O performance for different server environments, and it describes how to monitor the performance of the entire DS8000 storage system. This book is intended for individuals who want to maximize the performance of their DS8880 and DS8870 storage systems and investigate the planning and monitoring tools that are available. The IBM DS8880 storage system features, as described in this book, are available for the DS8880 model family with R8.0 release bundles (Licensed Machine Code (LMC) level 7.8.0).

Smart Sensors and MEMS Sergey Y. Yurish, Maria T.S.R. Gomes, 2007-11-12 The book *Smart Sensors and MEMS* provides a unique collection of contributions on latest achievements in sensors area and technologies that have been made by eleven internationally recognized leading experts from Czech Republic, Germany, Italy, Israel, Portugal, Switzerland, Ukraine and USA during the NATO Advanced Study Institute (ASI) in Póvoa de Varzim, Portugal, from 8 to 19 September 2003. The aims of this volume are to disseminate wider and in-depth theoretical and practical knowledge about smart sensors and its applications, to create a clear consciousness about the effectiveness of MEMS technologies, advanced signal processing and conversion methods, to stimulate the theoretical and applied research in these areas, and promote the practical using of these techniques in the industry. With that in mind, a broad range of physical, chemical and biosensors design principles, technologies and applications were included in the book. It is a first attempt to describe in the same book different physical, chemical, biological sensors and MEMS technologies suitable for smart sensors creation. The book presents the state-of-the-art and gives an excellent opportunity to provide a systematic, in-depth treatment of the new and rapidly developing field of smart sensors and MEMS. The volume is an excellent guide for practicing engineers, researchers and students interested in this crucial aspect of actual smart sensor design.

Sustainability and the Rights of Nature Cameron La Follette, Chris Maser, 2017-06-01 *Sustainability and the Rights of Nature: An Introduction* is a much-needed guide that addresses the exciting and significant paradigm shift to the Rights of Nature, as it is occurring both in the United States and internationally in the fields of environmental law and environmental sustainability. This shift advocates building a relationship of integrity and reciprocity with the planet by placing Nature in the forefront of our rights-based legal systems. The authors discuss means of achieving this by laying out Nature's Laws of Reciprocity and providing a roadmap of the strategies and directions needed to create a Rights of Nature-oriented legal system that

will shape and maintain human activities in an environmentally sustainable manner. This work is enriched with an array of unique and relevant points of reference such as the feudal notions of obligation, principles of traditional indigenous cultivation, the Pope Francis Encyclical on the environment, and the new Rights of Nature-based legal systems of Ecuador and Bolivia that can serve as prototypes for the United States and other countries around the world to help ensure a future of environmental sustainability for all living systems.

Sitopia Carolyn Steel,2020-03-05 'A visionary look at how quality food

should replace money as the new world currency' Tim Spector 'Hugely ambitious and beautifully written...destined to become a modern classic' Bee Wilson How we search for, make and consume food has defined human history. It transforms our bodies and homes, our politics and our trade, our landscapes and our climate. But by forgetting our culinary heritage and relying on cheap, intensively produced food, we have drifted into a way of life that threatens our planet and ourselves. What if there were a more sustainable way to eat and live? Drawing on many disciplines, as well as stories of the farmers, designers and economists who are remaking our relationship with food, this inspiring and deeply thoughtful book gives us a provocative and exhilarating vision for change, and points the way to a better future. Environmental Fate of Two Herbicides in Soils Amrith S. Gunasekara,2007

Pathway to Freedom Gloria J. Kelsey,2022-11-30 Gloria Kelsey has

experienced several traumatic events in her life, including a near-death experience at birth, an abusive and toxic marriage, and the death of her two children. Walking through the chapters of her life, you will discover how unresolved trauma built strongholds of insecurity, fear, and rejection within

her soul. Agreeing with an oath of secrecy, and suppressing negative emotions, caused physical and psychological distress; blocking the healthy flow of energy within her body and creating an environment for disease to exist and develop. As Gloria travelled the healing path, she learned that many diseases originate from traumatic situations and that emotional memories from painful events were stored in her brain, and at the cellular level of her body, along with the anger, grief, and stress associated with those events. Living in a toxic marriage caused Gloria to come into agreement with a casualty covenant that brought reality into being; negating God's Word and impeding her body's ability to heal. As she allowed the Lord to navigate her through the healing process by dealing with the roots, fruit and effects of emotional and psychological trauma, the ticking bomb of unprocessed trauma was diffused. The Lord brought healing to her spirit, soul and body; giving her the freedom to cross over 'Jordan' and come into her divinely appointed destiny!

Handbook of Research on European Business and Entrepreneurship Leo Paul

Dana, 2008 This book is an important contribution to the field of international entrepreneurship. . . it provides a comprehensive account of internationalization strategies adopted by SMEs in a wide range of European countries, and by drawing on a number of empirical studies, it enriches the theory of SME internationalization with a new theoretical framework that can be useful for understanding the complexity of SME internationalization processes in Europe. Julia Korosteleva, Thunderbird International Business Review From Andorra to Wales with stops in more than 35 other European countries along the way, this comprehensive collection of articles is required reading for scholars interested in international entrepreneurship. It provides information on how entrepreneurs and their firms go international from virtually every country in Europe. This unique volume permits researchers to compare how the process of entrepreneurial internationalization is affected by differences in culture, location, technology, and other influences within Europe. Furthermore, the various authors consider a range of theoretically important issues, such as cooperation and trust, venture capital, research and development, learning, networks, and government policy. This book serves as an essential departure point from which scholars can embark on their study of international entrepreneurship in Europe. Benjamin M. Oviatt, Georgia State University, US This is a timely and interesting book that brings together some of the most

insightful contributions on the internationalization of new ventures, with an emphasis on the European experiences. Assembling some of the best scholars, the book offers a distinctively European perspective one that deserves recognition, analysis, and discussion. I applaud the editors for doing such a masterful job in bringing a great group of researchers and ideas together. I highly recommend this book for any serious researcher and scholar. Shaker A. Zahra, University of Minnesota, US This remarkable book provides valuable contributions on how the process of SMEs internationalization is operating in 37 different European countries. Researchers in international entrepreneurship will find new materials for theorization. Numerous facets of international business are carefully documented by a great many well-known scholars. Also, given the variety of situations typical of the European small business sector, the book may prove to be helpful to small-scale entrepreneurs wishing to take steps towards internationalization. Overall, this coordinate work makes you realize why Europe is so fascinating. Jean-Jacques Obrecht, University Robert Schuman, Strasbourg, France This unique comparative study of the internationalization of small firms is a milestone in international business research. It compares the internationalization strategies of fast-growing firms across nearly forty different European countries. It shows that the growth trajectories of firms reflect the investing country's geographical location, natural resource endowments, legal and financial institutions and local culture. There are many important new insights to be gained from a careful study of this important new research resource. Mark Casson, University of Reading, UK This unique Handbook illustrates how entrepreneurs across Europe tackle internationalization. This timely and important book identifies patterns and builds a theory of international entrepreneurship in Europe. The contributors discuss the performances of SMEs on the road to internationalization. Each chapter emphasizes how the process of internationalization of SMEs operates, the challenges and opportunities that arise due to each country's specific political and economic situation, and their subsequent internationalization performance. These processes, challenges and performances can be understood through theories of international business and entrepreneurship. Although at times these theories cannot fully
