Stand in Confidence Amanda Pittman,2022-09-06 Esther Press Presents Stand in Confidence by Amanda Pittman Culture, church, and life have sold us narratives about who we're supposed to be as women. If we play the part well, we gain love, acceptance, validation, and significance. When we don't know which role to play from one day to the next, we sink in insecurity. We feel driven to people-please, downplay, settle, and perform. In all this, we accept less than the abundant life Jesus died to give us. Amanda Pittman, founder of Confident Woman Co., explains how we can rewrite their damaging self-beliefs with the truth about our God-given identity by establishing the Four Components of Confidence: Clarity—Embrace our identity and define our design Connection—Connect with God and

connect with others Competency—Develop our ability and expand our capacity Conviction—Know our responsibility and use our authority With a new perspective and focus, we will stand confidently upon the finished work of Jesus and live boldly in our God-given callings.

Encyclopedia of Nanoscience and Society David H. Guston,2010 Labeled either as the 'next industrial revolution' or as just 'hype', nanoscience and nanotechnologies are controversial, touted by some as the likely engines of spectacular transformation of human societies and even human bodies, and by others as conceptually flawed. These challenges make an encyclopedia of nanoscience and society an absolute necessity. Providing a guide to what these understandings and challenges are

about, the Encyclopedia of Nanoscience and Society offers accessible descriptions of some of the key technical achievements of nanoscience along with its history and prospects. Rather than a technical primer, this encyclopedia instead focuses on the efforts of governments around the world to fund nanoscience research and to tap its potential for economic development as well as to assess how best to regular a new technology for the environmental, occupational, and consumer health and safety issues related to the field. Contributions examine and analyze the cultural significance of nanoscience and nanotechnologies and describe some of the organizations, and their products, that promise to make nanotechnologies a critical part of the global economy. Written by noted scholars and practitioners from around the globe, these two volumes offer nearly 500 entries describing the societal aspects of nanoscience and nanotechnology.--Publisher's description.
