Counterterrorism and Cybersecurity Newton Lee, 2013-04-15 Imagine James Bond meets Sherlock Holmes: Counterterrorism and Cybersecurity is the sequel to Facebook Nation in the Total Information Awareness book series by Newton Lee. The book examines U.S. counterterrorism history, technologies, and strategies from a unique and thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from great thought leaders, and even the make-believe of Hollywood. Demystifying Total Information Awareness, the author expounds on the U.S. intelligence community, artificial intelligence in data mining, social media and privacy, cyber attacks and prevention, causes and cures for terrorism, and longstanding issues of war and peace. The book offers practical advice for businesses, governments, and individuals to better secure the world and protect cyberspace. It quotes U.S. Navy Admiral and NATO's Supreme Allied Commander James Stavridis: "Instead of building walls to create security, we need to build bridges." The book also provides a glimpse into the future of Plan X and Generation Z, along with an ominous prediction from security advisor Marc Goodman at TEDGlobal 2012: "If you control the code, you control the world." Counterterrorism and Cybersecurity: Total Information Awareness will keep you up at night but at the same time give you some peace of mind knowing that "our problems are manmade — therefore they can be solved by man [or woman]," as President John F. Kennedy said at the American University commencement in June 1963.

With the help of international law, the book explains what corporate management should know about white-collar crimes in different areas of business. It offers the biggest business crime cases from all over the world. At the heart of the business crimes, there is corruption, money laundering, fraud, and extortion. None of the law areas is immune to the crimes: they occur in company law, competition law, tax law, labor law, environmental law and intellectual property law - just to mention a few. The book helps to outline business-friendly models for crime prevention. Most of all, it increases knowledge of white-collar business crimes and helps people to avoid making their own ones. The book is aimed at business leaders and at everyone who runs their own business. It also provides information for business developers as well as business and law students.

SQL Tuning Dan Tow, 2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

From Prairie To Palestine Lyla Ann May, 2012-06-19 This three-part work presents a comprehensive look at a unique woman whose life spanned almost the full 20th Century. Educated well beyond her peers in the 1920's, never satisfied with less than the high standards her upbringing had trained her to value and expect, Eva Marshall Totah struck out across the world to pursue her calling. She sought to pass on her prairie-bred character to those around her, to create beauty and to uplift her surrounding environment. Readers interested in the history of the American Midwest and the history of American Quakers will be drawn to her story, which begins with her birth in the claim shanty of her parents' homestead in the new State of South Dakota. Genealogy buffs will enjoy the well-documented family genealogical histories of Eva's eight great grandparents. Students of the history of the modern Middle East will be fascinated by her first-person accounts of life in Palestine during the waning years of the British Mandate, before the creation of Israel. Part I – The Autobiography of Eva Marshall Totah From the South Dakota prairie, a young Quaker woman was recruited in 1927 to teach for a year in the Holy Land. Well-prepared by her college and graduate studies, as well as two years as a Bible teacher in a Chicago after-school religious education program, she ventures overseas. Not realizing there were Arabs in Palestine, Eva Rae Marshall was expecting to teach Jewish children at the Friends' Girls School in Ramallah. Discovering the varied religious landscape in Jerusalem's environs was only one of many surprises in store for her! In Eva's autobiography, she recounts her childhood in Wessington Springs, South Dakota and the choices she made that took her across the world at a time when most women did not even finish high school. Always supported and guided by her loving parents, Eva describes how she found her life's purpose at the Quaker school in Palestine among the varied and colorful religious groups that called the country their home, and recounts her travels throughout the surrounding Levantine region during the British Mandate period. Eva found love and purpose in Palestine, eventually marrying a Palestinian Quaker, Dr. Khalil Totah. She spent 17 years in Palestine before she and Dr. Totah moved their family to America, sailing on a Liberty Ship through the mine-strewn Mediterranean waters during World War II. After several years on the East Coast, Eva lived the rest of her years in California. Part II – Eva's Letters Home from Palestine (1927 - 1944) The second section contains Eva's letters to her family in South Dakota from Palestine. The letters are the only ones known to remain from a correspondence that was carried on weekly for 17 years. They span from her arrival in 1927 to the family's departure from Palestine in 1944, and include remarkable observations of the colorful life of the Middle East of that period. Part III – Genealogy of Eva Marshall Totah The third portion of the book contains well researched genealogy and family history narratives of eight of Eva's ancestral families: Jesse Marshall, Mary Pickering, William Owen Lancaster, Olive Ruddick, Phillip Strahl, Rhoda Ann French, Arthur Ginn and Mary Eliza Barton. Since Eva was of almost completely Quaker stock, the research benefits from the volume of rich sources of information available on members of the Society of Friends. Eva Rae Marshall was also a direct descendant of Mayflower pilgrim Stephen Hopkins.
