**Country Boy** Derek Watts, 2010-07-27 Best known for his unique musical style and blindingly fast hybrid picking technique, English guitarist Albert Lee is often referred to within the music industry as the guitar player's guitar player, renowned for his work across several genres of music and for the respect that he has garnered from other industry giants. This comprehensive biography tells the entire story of Lee's long career and personal experiences, beginning with his upbringing in south London and his early experimentations with skiffle music (the British equivalent of American rockabilly). It covers Lee's career in Chris Farlowe's Thunderbirds and the British rock and country group Heads, Hands, and Feet, his move to the United States in the 1970s and his subsequent work with Eric Clapton, the Crickets, Emmylou Harris and the Hot Band, the Everly Brothers, and, more recently, with Bill Wyman and with Hogan's Heroes. Lee's career is set against the background of changes in popular music and shows how he, as a British artist with nomadic Romany roots, has influenced traditionally American musical genres. The work includes 66 photographs, many from Lee's personal collection, two appendices, and an extensive bibliography.

*The Nordic Storyteller* Susan Brantly, Thomas A. DuBois, 2008-12-18 The Nordic Storyteller: Essays in Honour of Niels Ingwersen consists of a set of nineteen research essays plus an introduction, written by colleagues and admirers of Niels and

Faith Ingwersen, leaders in the field of Scandinavian Studies in North America for some four decades. A first section of seven essays, entitled "Songs and Tales in Oral Tradition," presents research in the area of folklore studies, including balladry, saints' lives, incantations, healing, legendry, and personal experience narrative. Articles take up such issues as classification, thematics, cultural and historical change, and the effects of technology on daily life. A closely related second section, "From Oral Tradition to Literature" includes three essays which examine the adaptation of oral tradition to literary forms, focusing on the works of P. Chr. Asbjørnsen, Esias Tegnér, Elias Lönnrot, F. R. Kreutzwald, and the illustrations of Arthur Rackham—all figures important in the rise of folklore as a key interest of Romantic nationalism. A further set of nine essays grouped under the title "Tales in Literary Form" examine aspects of the writings of some of the greatest storytellers of the nineteenth and twentieth centuries, including H. C. Andersen, Herman Bang, Henrik Ibsen, Jóhann Magnús Bjarnason, Charles Dickens, Thomas Mann, Isak Dinesen, Martin Andersen Nexø, Billy August, Hans Scherfig, Peter Høeg, Klaus Rifbjerg, Leif Panduro, and Kjartan Fløgstad. Articles address topics including autobiography, source criticism, symbolism, personal and national identities, and the representation of political ideals. Together the essays of this volume demonstrate the unflagging salience of narrative—of storytelling—in the personal lives and social experiences of Scandinavians and their neighbors, past and present.

**Proud to Be an Okie** Peter La Chapelle, 2007-04-03 Proud to Be an Okie brings to life the influential country music scene that flourished in and around Los Angeles from the Dust Bowl migration of the 1930s to the early 1970s. The first work to fully illuminate the political and cultural aspects of this intriguing story, the book takes us from Woody Guthrie's radical hillbilly show on Depression-era radio to Merle Haggard's Okie from Muskogee in the late 1960s. It explores how these migrant musicians and their audiences came to gain a sense of identity through music and mass media, to embrace the New Deal, and to celebrate African American and Mexican American musical influences before turning toward a more conservative outlook. What emerges is a clear picture of how important Southern California was to country music and how country music helped shape the politics and culture of Southern California and of the nation.

*Rethinking Environmental Justice in Sustainable Cities* Heather E. Campbell, Yushim Kim, Adam M. Eckerd, 2015-05-15 As the study of environmental policy and justice becomes increasingly significant in today's global climate, standard statistical approaches to gathering data have become less helpful at generating new insights and possibilities. None of the conventional frameworks easily allow for the empirical modeling of the interactions of all the actors involved, or for the emergence of outcomes unintended by the actors. The existing frameworks account for the what, but not for the why. Heather E. Campbell, Yushim Kim, and Adam Eckerd bring an innovative perspective to environmental justice research. Their approach adjusts the narrower questions often asked in the study of environmental justice, expanding to broader investigations of how and why environmental inequities occur. Using agent-based modeling (ABM), they study the interactions and interdependencies among different agents such as firms, residents, and government institutions. Through simulation, the authors test underlying assumptions in environmental justice and discover ways to modify existing theories to better explain why environmental injustice occurs. Furthermore, they use ABM to generate empirically testable hypotheses, which they employ to check if their simulated findings are supported in the real world using real data. The pioneering research on environmental justice in this text will have effects on the field of environmental policy as a whole. For social science and policy researchers, this book explores how to employ new and experimental methods of inquiry on challenging social problems, and for the field of environmental justice, the authors demonstrate how ABM helps illuminate the complex social and policy interactions that lead to both environmental justice and injustice.

**Network Science** National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee on Network Science for Future Army Applications,2006-01-15 The military is currently attempting to develop itself into a force capable of networkcentric operations. While this effort has highlighted the military's dependence on interacting networks, it has also shown that there is a huge gap between what we need to know about networks and our fundamental knowledge about network behavior. This gap makes the military vision of NCO problematic. To help address this problem, the Army asked the NRC to find out whether identifying and funding a new field of network science could help close this gap. This report presents an examination of networks andthe military, an analysis of the promise, content, and challenges of network science, and an assessment of approaches to creating value from network science.

*Production Ergonomics* Cecilia Berlin,Caroline Adams,2017-06-28 Production ergonomics – the science and practice of designing industrial workplaces to optimize human well-being and system performance – is a complex challenge for a designer. Humans are a valuable and flexible resource in any system of creation, and as long as they stay healthy, alert and motivated, they perform well and also become more competent over time, which increases their value as a resource. However, if a system designer is not mindful or aware of the many threats to health and system performance that may emerge, the end result may include inefficiency, productivity losses, low working morale, injuries and sick-leave. To help budding system designers and

production engineers tackle these design challenges holistically, this book offers a multi-faceted orientation in the prerequisites for healthy and effective human work. We will cover physical, cognitive and organizational aspects of ergonomics, and provide both the individual human perspective and that of groups and populations, ending up with a look at global challenges that require workplaces to become more socially and economically sustainable. This book is written to give you a warm welcome to the subject, and to provide a solid foundation for improving industrial workplaces to attract and retain healthy and productive staff in the long run.
