**WEB-BASED INFORMATION TECHNOLOGIES AND DISTRIBUTED SYSTEMS** Quan Z Sheng,2010-06-01 The Fourth International Conference on Signal-Image Technology & Internet-Based Systems (SITIS 2008) has been successfully held during the period 30th November to 3rd of December of the year 2008 in Bali, Indonesia. The Track Web-Based Information Technologies & Distributed Systems (WITDS) is one of the four tracks of the conference. The track is devoted to emerging and novel concepts, architectures and methodologies for creating an interconnected world in which information can be exchanged easily, tasks can be processed collaboratively, and communities of users with similar interests can be formed while addressing security threats that are present more than ever before. The track has attracted a large number of submissions; only fifteen papers have been accepted with acceptance rate 27%. After the successful presentations of the papers during the conference, the track chairs have agreed with Atlantis publisher to publish the extended versions of the papers in a book. Each paper has been extended with a minimum of 30% new materials from its original conference manuscript. This book contains these extended versions as chapters after a second round of reviews and improvement. The book is an excellent resource of information to researchers and it is based on four themes; the first theme is on advances in ad-hoc and routing protocols, the second theme focuses on the latest techniques and methods on intelligent systems, the third theme is a latest trend in Security and Policies, and the last theme is applications of algorithms design methodologies on web based systems.

**Dissecting the Hack** Jayson E Street,2015-07-20 Dissecting the Hack: The V3rb0t3n Network ventures further into cutting-edge techniques and methods than its predecessor, Dissecting the Hack: The F0rb1dd3n Network. It forgoes the basics and delves straight into the action, as our heroes are chased around the world in a global race against the clock. The danger they face will forever reshape their lives and the price they pay for their actions will not only affect themselves, but could possibly shake the foundations of an entire nation. The book is divided into two parts. The first part, entitled The V3rb0t3n Network, continues the fictional story of Bob and Leon, two hackers caught up in an adventure in which they learn the deadly consequence of digital actions. The second part, Security Threats Are Real (STAR), focuses on these real-world lessons and advanced techniques, as used by characters in the story. This gives the reader not only textbook knowledge, but real-world context around how cyber-attacks may manifest. The V3rb0t3n Network can be read as a stand-alone story or as an illustration of the issues described in STAR. Scattered throughout The V3rb0t3n Network are Easter eggs—references, hints, phrases, and more that will lead readers to insights into hacker culture. Drawing on The V3rb0t3n Network, STAR explains the various aspects of reconnaissance; the scanning phase of an attack; the attacker's search for network weaknesses and vulnerabilities to exploit; the various angles of attack used by the characters in the story; basic methods of erasing information and obscuring an attacker's presence on a computer system; and the underlying hacking culture. All new volume of Dissecting the Hack by Jayson Street, with technical edit by Brian Martin Uses actual hacking and security tools in its story – helps to familiarize readers with the many devices and their code Features cool new hacks and social engineering techniques, in real life context for ease of learning

Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. **Protection of Employees' Personal Information and Privacy** Diego Álvarez Alonso, 2014 Bulletin of Comparative Labour Relations Series Volume 88 This collection of essays - an outcome of the 12th Comparative Labour Law Seminar (Tokyo Seminar) hosted by the Japan Institute for Labour Policy and Training - presents detailed country reports on the status of employee privacy law in Australia, China, France, Germany, Japan, Korea, Spain, Taiwan, the United Kingdom, and the United States. The papers were presented by distinguished labour law scholars, and are reproduced here with some revisions to reflect the lively discussions that took place at the meeting. For each country, the topics examined include the following: default rules regarding employees' personal information and privacy; regulatory schemes and available remedies against violation; what personal information an employer is entitled to obtain; ways of striking a balance between employers' legitimate interests and employees' privacy; safeguards designed to secure non-coercive employee consent; drug and alcohol testing; surveillance of employees' off-duty conduct; disclosure of a disciplined employee's name or other work-related information; employee's right to access personal information retained by the employer; information used to care for employees' health and safety and to consider family situations; and prior employer's sharing of personal information with a prospective new employer. In this relatively new area of labour and employment law, in which tools are still developing as new problems emerge in real workplaces, the book's overall comparative viewpoint is especially valuable. Scholars and practitioners alike will appreciate the insight gained into how specific national trends exhibit overlap and difference from a global perspective
