Slavery and the British Country House Madge Dresser, Andrew Hann, 2013 The British country house has long been regarded as the jewel in the nation's heritage crown. But the country house is also an expression of wealth and power, and as scholars reconsider the nation's colonial past, new questions are being posed about these great houses and their links to Atlantic slavery. This book, authored by a range of academics and heritage professionals, grew out of a 2009 conference on 'Slavery and the British Country house: mapping the current research' organised by English Heritage in partnership with the University of the West of England, the National Trust and the Economic History Society. It asks what links might be established between the wealth derived from slavery and the British country house and what implications such links should have for the way such properties are represented to the public today. Lavishly illustrated and based on the latest scholarship, this wide-ranging and innovative volume provides in-depth examinations of individual houses, regional studies and critical reconsiderations of existing heritage sites, including two studies specially commissioned by English Heritage and one sponsored by the National Trust.

The Darker Side of Travel Richard Sharpley, Philip R. Stone, 2009 The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and

attractions associated with death, disaster and suffering.

Introduction to Psychology Jennifer Walinga, Charles Stangor, This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section.

Networking Tatiana Bazzichelli, 2009-02 Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, [epidemiC],

Revitalizing Endangered Languages Justyna Olko, Julia Sallabank, 2021-01-31 Of the approximately 7,000 languages in the world, at least half may no longer be spoken by the end of the twenty-first century. Languages are endangered by a number of factors, including globalization, education policies, and the political, economic and cultural marginalization of minority groups. This guidebook provides ideas and strategies, as well as some background, to help with the effective revitalization of endangered languages. It covers a broad scope of themes including effective planning, benefits, wellbeing, economic aspects, attitudes and ideologies. The chapter authors have hands-on experience of language revitalization in many countries around the world, and each chapter includes a wealth of examples, such as case studies from specific languages and language areas. Clearly and accessibly written, it is suitable for non-specialists as well as academic researchers and students interested in language revitalization. This book is also available as Open Access on Cambridge Core.

The Palace Complex Michał Murawski, 2019-03-22 The Palace of Culture and Science is a massive Stalinist skyscraper that was gifted to Warsaw by the Soviet Union in 1955. Framing the Palace's visual, symbolic, and functional prominence in the everyday life of the Polish capital as a sort of obsession, locals joke that their city suffers from a Palace of Culture complex. Despite attempts to privatize it, the Palace remains municipally owned, and continues to play host to a variety of public institutions and services. The Parade Square, which surrounds the building, has resisted attempts to convert it into a money-making commercial center. Author Michał Murawski traces the skyscraper's powerful impact on 21st century Warsaw; on its architectural and urban landscape; on its political, ideological, and cultural lives; and on the bodies and minds of its inhabitants. The Palace Complex explores the many factors that allow Warsaw's Palace to endure as a still-socialist building in a post-socialist city.

Conquering Complexity Mike Hinchey,Lorcan Coyle,2012-01-03 Software has long been perceived as complex, at least within Software Engineering circles. We have been living in a

recognised state of crisis since the first NATO Software Engineering conference in 1968. Time and again we have been proven unable to engineer reliable software as easily/cheaply as we imagined. Cost overruns and expensive failures are the norm. The problem is fundamentally one of complexity: software is fundamentally complex because it must be precise. Problems that appear to be specified quite easily in plain language become far more complex when written in a more formal notation, such as computer code. Comparisons with other engineering disciplines are deceptive. One cannot easily increase the factor of safety of software in the same way that one could in building a steel structure, for example. Software is typically built assuming perfection, often without adequate safety nets in case the unthinkable happens. In such circumstances it should not be surprising to find out that (seemingly) minor errors have the potential to cause entire software systems to collapse. The goal of this book is to uncover techniques that will aid in overcoming complexity and enable us to produce reliable, dependable computer systems that will operate as intended, and yet are produced on-time, in budget, and are evolvable, both over time and at run time. We hope that the contributions in this book will aid in understanding the nature of software complexity and provide guidance for the control or avoidance of complexity in the engineering of complex software systems.

The Philosophy of Christopher Nolan Jason T. Eberl, George A. Dunn, 2017-06-20 As a director, writer, and producer, Christopher Nolan has substantially impacted contemporary cinema through avant garde films, such as *Following* and *Memento*, and his contribution to wider pop culture with his Dark Knight trilogy. His latest film, *Interstellar*, delivered the same visual qualities and complex, thought-provoking plotlines his audience anticipates. *The Philosophy of Christopher Nolan* collects sixteen essays, written by professional philosophers and film theorists, discussing themes such as self-identity and self-destruction, moral choice and moral doubt, the nature of truth and its value,

whether we can trust our perceptions of what's "real," the political psychology of heroes and villains, and what it means to be a "viewer" of Nolan's films. Whether his protagonists are squashing themselves like a bug, struggling to create an identity and moral purpose for themselves, suffering from their own duplicitous plots, donning a mask that both strikes fear and reveals their true nature, or having to weigh the lives of those they love against the greater good, there are no simple solutions to the questions Nolan's films provoke; exploring these questions yields its own reward.

An Innocent Abroad J. Hillis Miller, 2015-11-30 Since 1988, J. Hillis Miller has traveled to China to lecture on literary theory, especially the role of globalization in literary theory. Over time, he has assisted in the development of distinctively Chinese forms of literary theory, Comparative Literature, and World Literature. The fifteen lectures gathered in *An Innocent Abroad* span both time and geographic location, reflecting his work at universities across China for more than twenty-five years. More important, they reflect the evolution of Miller's thinking and of the lectures' contexts in China as these have markedly changed over the years, especially on either side of Tiananmen Square and in light of China's economic growth and technological change. A foreword by the leading theorist Fredric Jameson provides additional context.
