Silk Road to Belt Road Md. Nazrul Islam, 2018-11-30 This volume approaches China's Belt and Road Initiative as a process of culturalization, one that started with the Silk Road and continued over the millennium. In mainstream literature, the Belt and Road Initiative (BRI) has been portrayed as the geo-economic vision and geo-political ambition of China's current leaders, intended to shape the future of the world. However, this volume argues that although geo-politics and geo-economy may play their part, the BRI more importantly creates a venue for the meeting of cultures by promoting people-to-people interaction and exchange. This volume explores the journey from the Silk-Road to Belt-Road by analyzing topics ranging from history to religion, from language to culture, and from environment to health. As such, scholars, academics, researchers, undergraduate and graduate students from the Humanities, Social Sciences, and Business will find an alternative approach to the Belt and Road Initiative.

Self-Determination and Secession Natalija Shikova, 2023-08-28 This book offers a comprehensive summary of extant international law scholarship on the topics of self-determination and secession and positions the concepts among present-day theory and relevant practice, illustrated through various ongoing cases and historical examples. The right to self-determination is among the least understood rights within international law. Theoretical dilemmas – as to whether there is a link between self-determination and secession – are nothing new. In essence, self-determination is a much broader concept than secession and obtaining independent statehood. Unilateral secession is not prohibited by international law, but neither is it per se welcomed or accepted in practice. Beyond the context of decolonization, secession claims have long been viewed with disapproval in international law, and lawyers have been extremely skeptical about the issue. Although this is still the case, there are also new trends and opportunities to explore situations in which secession can be accepted, legitimized, or even legally permissible. The yardstick for this is the diplomatic response to secessionism and the growing involvement of the international community in mediation and conflict resolution. Though finding solutions can be difficult, within the existing frame, the ongoing tension between the duty of every society to recognize pluralism and diversity on the one hand, and the inherent desire of every culture – whether majority, minority or indigenous – to protect its values and ensure conformity on the other, must be resolved. The practices and modalities that envisage the internal dimension of the right to self-determination as a right that is exercised within the state borders can offer such opportunities. The appropriate role of the state and the international community is to serve as mediators between competing forces and to set parameters that can transform destructive conflicts into productive political models.

Association of Southeast Asian Nations (ASEAN) Konstantinos D. Magliveras, Gino J. Naldi, 2021-12-21 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the structure, competence, and management of Association of Southeast Asian Nations (ASEAN) provides substantial and readily accessible information for lawyers, academics, and policymakers likely to have dealings with its activities and data. The monograph proceeds logically from the organization's genesis and historical development to the structure of its membership, its various organs and their mandates, its role in intergovernmental cooperation, and its interaction with decisions taken at the national level. Its competence, its financial management, and the nature and applicability of its data and publications are fully described. Systematic in presentation, this valuable time-saving resource offers the quickest, easiest way to acquire a sound understanding of the workings of Association of Southeast Asian Nations (ASEAN) for all interested parties. The Collectivization of Agriculture in Communist Eastern Europe Constantin Iordachi, Arnd Bauerkamper, 2014-03-31 This book explores the interrelated campaigns of agricultural collectivization in the USSR and in the communist dictatorships established in Soviet-dominated Eastern Europe. Despite the profound, long-term societal impact of collectivization, the subject has remained relatively underresearched. The volume combines detailed studies of collectivization in individual Eastern European states with issue-oriented comparative perspectives at regional level. Based on novel primary sources, it proposes a reappraisal of the theoretical underpinnings and research agenda of studies on collectivization in Eastern Europe. The contributions provide up-to-date overviews of recent research in the field and promote new approaches to the topic, combining historical comparisons with studies of transnational transfers and entanglements.

Modifications of Einstein's Theory of Gravity at Large Distances Eleftherios Papantonopoulos, 2014-11-04 In the last few years modified gravity theories have been proposed as extensions of Einstein's theory of gravity. Their main motivation is to explain the latest cosmological and astrophysical data on dark energy and dark matter. The study of general relativity at small scales has already produced important results (cf e.g. LNP 863 Quantum Gravity and Quantum Cosmology) while its study at large scales is challenging because recent and upcoming observational results will provide important information on the validity of these modified theories. In this volume, various aspects of modified gravity at large scales will be discussed: high-curvature gravity theories; general scalar-tensor theories; Galileon theories and their cosmological applications; $F(R)$ gravity theories; massive, new massive and topologically massive gravity; Chern-Simons modifications of general relativity (including holographic variants) and higher-spin gravity theories, to name but a few of the most important recent developments. Edited and authored by leading researchers in the field and cast into the form of a multi-author textbook at postgraduate level, this volume will be of benefit to all postgraduate students and newcomers from neighboring disciplines wishing to find a comprehensive guide for their future research.

Playing on the Periphery Tara Brabazon, 2006-04-18 Part of the Sport in the Global Society series, this innovative and creative text explores collective history, memory, and sport culture, tracking the passage of sports away from England. The author investigates why 'elite' English sports - such as rugby and cricket - became national sports in New Zealand and Australia, and asks why 'working class' English sports - such as football - have travelled less well to these areas. Focusing on these sports, the author tracks narratives and myths, tracing the passage of colonial truths, behaviours and practices. Clearly defined sections in the book focus on: * sport and tourism * sport and history * sport and memory. Using a refreshingly broad range of sources to analyze differences between popular culture and sporting memory, this book offers new perspectives on sport and makes an interesting reference for masters and postgraduate readers in sport and cultural studies.

Moon Viorel Badescu, 2012-03-22 The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

The European Guilds Sheilagh Ogilvie, 2021-06-15 Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution, and have always attracted debate and controversy. They were sometimes viewed as efficient institutions that guaranteed quality and skills. But they also excluded competitors, manipulated markets, and blocked innovations. Did the benefits of guilds outweigh their costs? Analyzing thousands of guilds that dominated European economies from 1000 to 1880, *The European Guilds* uses vivid examples and clear economic reasoning to answer that question. Sheilagh Ogilvie's book features the voices of honorable guild masters, underpaid journeymen, exploited apprentices, shady officials, and outraged customers, and follows the stories of the vile encroachers--Women, migrants, Jews, gypsies, bastards, and many others--desperate to work but hunted down by the guilds as illicit competitors. She investigates the benefits of guilds but also shines a light on their dark side. Guilds sometimes provided important services, but they also manipulated markets to profit their members. They regulated quality but prevented poor consumers from buying goods cheaply. They fostered work skills but denied apprenticeships to outsiders. They transmitted useful techniques but blocked innovations that posed a threat. Guilds existed widely not because they corrected market failures or served the common good but because they benefited two powerful groups--guild members and political elites.--Rabat de la jaquette.
