Common and Uncommon Quotes: A Theory and History of Epigraphs Jared A. Griffin,2023-03-07 'Common and Uncommon Quotes: A Theory and History of Epigraphs' is a prolegomenon to the study of epigraphic paratextuality. Building on the work of Gerard Genette's paratextual studies, this volume contextualizes and traces the practice of epigraphy in Anglophone literary history, from the fifteenth to the early twentieth century. This study explores how epigraphs are used by author-functions as a hermeneutic for their text and to establish ethos with their audience, and how that paratextual relationship changed as publishing opportunities and literacy rates grew over four centuries. The first broad-reaching study of this kind, 'Common and Uncommon Quotes' seeks to understand how epigraphs work: through their privilege on the page, their appeal to conjured ideas of the past, and their calls to citizenship.

Law of Value and Theories of Value Tiago Camarinha Lopes,2022-01-21 In Law of Value and Theories of Value, Tiago Camarinha Lopes presents the genesis of Karl Marx's understanding of the law of value by showing that Classical and Neoclassical economics are equally hit by Marx's Critique of Political Economy.

Art and Advertising in Buffalo Bill's Wild West Michelle Delaney,2019-10-24 William F. "Buffalo Bill" Cody, star of the American West, began his journey to fame at age twenty-three, when he met writer Ned Buntline. The pulp novels Buntline later penned were loosely based on Cody's scouting and bison-hunting adventures and sparked a national sensation. Other writers picked up the living legend of "Buffalo Bill" for their own pulp novels, and in 1872 Buntline produced a theatrical show starring Cody himself. In 1883, Cody opened his own show, Buffalo Bill's Wild West, which ultimately became the foundation for the world's image of the American frontier. After the Civil War, new transcontinental railroads aided rapid westward expansion, fostering Americans' long-held fascination with their western frontier. The railroads enabled traveling shows to move farther and faster, and improved printing technologies allowed those shows to print in large sizes and quantities lively color posters and advertisements. Cody's show team partnered with printers, lithographers, photographers, and iconic western American artists, such as Frederic Remington and Charles Schreyvogel, to create posters and advertisements for Buffalo Bill's Wild West. Circuses and other shows used similar techniques, but Cody's team perfected them, creating unique posters that branded Buffalo Bill's Wild West as the true Wild West experience. They helped attract patrons from across the nation and ultimately from around the world at every stop the traveling show made. In Art and Advertising in Buffalo Bill's Wild West, Michelle Delaney showcases these numerous posters in full color, many of which have never before been reproduced, pairing them with new research into previously inaccessible manuscript and photograph collections. Her study also includes Cody's correspondence with his staff, revealing the showman's friendships with notable American and European artists and his show's complex, modern publicity model. Beautifully designed, Art and Advertising in Buffalo Bill's Wild West presents a new perspective on the art, innovation, and advertising acumen that created the international frontier experience of Buffalo Bill's Wild West.

Rescue Thyself Sylvanus Ayeni,2017-03-29 This book is an in-depth and bold dialogue with several constituencies about the necessity of finding alternative pathways to solve the monumental problems facing the nations of Sub-Saharan Africa. It asserts that the most formidable barriers to progress in Sub-Saharan Africa are Sub-Saharan Africans, particularly the leaders. Thus, for these nations to escape from destitution, change must originate from within. African leaders are reminded that life anchored on the pursuit of money, material wealth, and power by any means, is hollow, empty, and meaningless. The future leaders of Sub-Saharan Africa are reminded that the Creator has endowed them and the citizens of their nations with the talents they need to develop themselves and their societies. Furthermore, nature has been so kind to their nations, endowing them with more than sufficient natural resources. Thus, they need not continue the culture of dependency on the rest of the human race.

The Rise of China and India in Africa Fantu Cheru,Cyril Obi,2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

Liberalism and Hegemony Michel Ducharme,Jean-François Constant,2009-01-01 The essays collected here explore the possibilities and limits presented by The Liberal Order Framework for various segments of Canadian history, and within them, the paramount influence of liberalism throughout the nineteenth and twentieth centuries is debated in various contexts.

Large-Scale Land Investments in Least Developed Countries Luis Tomás Montilla Fernández,2017-11-09 This book analyses large-scale land investments for agricultural purposes in Africa's least developed countries from a law and economics perspective. Focusing on the effects of foreign land investments on host countries' local populations and the apparent failure of international law to create incentives to offset them, it also examines the legal and economic mechanisms to hold investors accountable in cases where their investment leads to human rights violations. Applying principal agent and contract theory, it elucidates the sources of opportunism and develops control mechanisms to ameliorate the negative effects. It shows that although judicial mechanisms fail to deliver justice, international law offers alternatives to safeguard against arbitrary and abusive state and

investor conduct, and also to effectuate human rights and, thus, tackle opportunistic behaviour.

Fit to be Canadian? Lisa Tink, 2022-06-09 In recent years, recreation scholars and professionals began calling for a return to municipal recreation's historical roots as a "public good." Blaming neoliberal ideology for the current pay-per-use model, these calls for a more inclusive recreation system have suggested the sector's business-like practices should be of concern because they are in direct opposition to the historic mandate of "equal opportunity." A central assumption underlying these calls for the recreation profession to return to its "historical roots" is that municipal recreation services, until the late 1980s and early 1990s, were available to all members of society. This narrative is, however, a romanticized account of recreation's history. In this book, Lisa Tink challenges the often-repeated narrative of a more inclusive and equitable era in recreation's past. Tracing some of the conditions that have given rise to what she has termed the recreation industrial complex, Tink's research demonstrates how recreation has, by design, served the interests of white, heterosexual, able-bodied, middle- to upper-class Canadians. By exposing the ways particular bodies came to be centered in a recreation context, the purpose of this important piece of recreation scholarship is to demonstrate how historical inclusions and exclusions (whether intentional or not) were in fact part of a broader biopolitical project intended to sustain white supremacy, with the ultimate goal of encouraging critical dialogues about what is inherently problematic, difficult, and dangerous in the discourses, practices, and policies that govern our contemporary recreation systems.

The Art Direction Handbook for Film & Television Michael Rizzo, 2014-07-11 In this new and expanded edition of The Art Direction Handbook, author Michael Rizzo now covers art direction for television, in addition to updated coverage of film design. This comprehensive, professional manual details the set-up of the art department and the day-to-day job duties: scouting for locations, research, executing the design concept, supervising scenery construction, and surviving production. Beyond that, there is an emphasis on not just how to do the job, but how to succeed and secure other jobs. Rounding out the text is an extensive collection of useful forms and checklists, as well as interviews with prominent art directors.

West from Appomattox Heather Cox Richardson, 2007-03-28 "This thoughtful, engaging examination of the Reconstruction Era . . . will be appealing . . . to anyone interested in the roots of present-day American politics" (Publishers Weekly). The story of Reconstruction is not simply about the rebuilding of the South after the Civil War. In many ways, the late nineteenth century defined modern America, as Southerners, Northerners, and Westerners forged a national identity that united three very different regions into a country that could become a world power. A sweeping history of the United States from the era of Abraham Lincoln to the presidency of Theodore Roosevelt, this engaging book tracks the formation of the American middle class while stretching the boundaries of our understanding of Reconstruction. Historian Heather Cox Richardson ties the North and West into the post-Civil War story that usually focuses narrowly on the South. By weaving together the experiences of real individuals who left records in their own words—from ordinary Americans such as a plantation mistress, a Native American warrior, and a labor organizer, to prominent historical figures such as Andrew Carnegie, Julia Ward Howe, Booker T. Washington, and Sitting Bull—Richardson tells a story about the creation of modern America.

The Sovereign Psyche Ezra Aharon, 2016-04-30 The Sovereign Psyche is not just the title of the book. More importantly The Sovereign Psyche is the motivating consciousness, intellect, and willpower that is necessary to materialize what the book defines as Self-Authentic Freedom as opposed to Chattel Freedom. Chattel freedom is when the value of a people is predicated upon the extent to which they serve the interests and institutions of others. As such, this work asserts that there is no such thing as intellectual or institutional equality, and that Black/African people have been unknowingly thrust into an intellectual and institutional war, where second-place finishers either experience varying degrees of chattel freedom or they could end-up dead. Regardless of the issue, genuine solutions entail what we as Black/African people intellectually and institutionally do for ourselves. If Black Lives Matter we must channel the end-uses of our intellect and the resources of our institutions to not only prove and enforce it, but also leverage powers to penalize and/or repudiate violators. Although this work centers upon Black/African people, the sovereign functions and frameworks herein are universal in application, being that today's world rotates upon systems of sovereignty and power, not beliefs in democracy or equality. In this context, the sovereign concepts and criteria presented are far more rational than radical. The central question is, to what extent will Black/African people harness the willpower and employ the intellect of The Sovereign Psyche to actualize our own systems and institutions of self-authentic freedom, government, and development, without apology or permission? This work offers the ideological apparatus to make this possible, just as others are doing all around the globe.

Sovereignty in the Exercise of the Right to Self-Determination Jane A. Hofbauer, 2016-11-03 In Sovereignty in the Exercise of the Right to Self-Determination Jane Hofbauer explores to what extent (indigenous) peoples can be designated as sovereign entities through the exercise of different tiers of self-determination.

Reckoning with Empire: Self-Determination in International Law Miriam Bak McKenna, 2022-11-28 The book adopts a new approach to self-determination's international legal history, tracing the ways in which various actors have sought to reinvent self-determination in different juridical, political, and economic iterations to create the conditions for global transformation.

The International Criminal Court at the Mercy of Powerful States Res Schuerch, 2017-07-15 This book aims to investigate whether, and if so, how, an institution designed to bring to justice perpetrators of the most heinous crimes can be regarded a tool of oppression in a (neo-)colonial sense. To do so, it re-invents the concept of neo-colonialism, which is traditionally associated more with economic or political implications, from an international criminal law perspective, combining historical, political and legal analyses. Allegations of neo-colonialism in relation to the International Criminal Court (ICC) became widespread after the Court had issued an arrest warrant against the Sudanese President Omar Al-Bashir in 2009. While the Court, since its entry into function in 2002, has been confronted with criticism from various corners, the neo-colonialism controversy was sparked by African stakeholders. Unlike other contributions in this domain, thus, this book provides a Western perspective on an issue more often addressed from an African standpoint, with the intention of distinguishing itself from the more political and emotive and sometimes superficial arguments that exist within critical legal approaches towards the ICC. The subject matter will primarily be of interest to scholars of international criminal law or those operating at the intersection of law and politics/history, nationals of African states and from other parts of the world professionally interested and/or involved in international criminal law and justice and the ICC, and governmental and non-governmental organizations. Secondly, the book will also appeal and speak to critical legal scholars and

those interested in historical legal analysis. Res Schuerch is a Swiss lawyer specialized in the field of International Criminal Law and the ICC. He previously worked as a researcher at the University of Amsterdam and as an academic assistant at the University of Zürich.

Gaston County, North Carolina, in the Civil War Robert C. Carpenter,2016-04-15 Civil War histories typically center on the deeds of generals and sweeping depictions of battle. This unique study of one Southern county's war experience tells of ordinary soldiers and their wives, mothers and children, slaves, farmers, merchants, Unionists and deserters--through an examination of tax records. The recently discovered 1863 Gaston County, North Carolina, tax list provides a detailed economic and social picture of a war-weary community, recording what taxpayers owned, cataloging slaves by name, age and monetary value, and assessing luxury items. Contemporary diaries, letters and other previously unpublished documents complete the picture, describing cotton mill operations, the lives of slaves, political disagreements, rationales for soldiers' enlistments and desertions, and economic struggles on the home front.

Africa and the Shaping of International Human Rights Derrick M. Nault,2021-01-17 Africa throughout its postcolonial history has been plagued by human rights abuses ranging from intolerance of political dissent to heinous crimes such as genocide. Yet this book argues that the continent has also been pivotal in helping shape contemporary human rights norms and practices.

Imagining a Nation Ruramisai Charumbira,2015-09-29 In *Imagining a Nation*, Ruramisai Charumbira analyzes competing narratives of the founding of Rhodesia/Zimbabwe constructed by political and cultural nationalists both black and white since occupation in 1890. The book uses a wide array of sources—including archives, oral histories, and a national monument—to explore the birth of the racialized national memories and parallel identities that were in vigorous contention as memory sought to present itself as history. In contrast with current global politics plagued by divisions of outsider and insider, patriot and traitor, Charumbira invites the reader into the liminal spaces of the region's history and questions the centrality of the nation-state in understanding African or postcolonial history today. Using an interdisciplinary methodology, Charumbira offers a series of case studies, bringing in characters from far-flung places to show that history and memory in and of one small place can have a far-reaching impact in the wider world. The questions raised by these stories go beyond the history of colonized or colonizer in one former colony to illuminate contemporary vexations about what it means to be a citizen, patriot, or member of a nation in an ever-globalizing world. Rather than a history of how the rulers of Rhodesia or Zimbabwe marshaled state power to force citizens to accept a single definition of national memory and identity, *Imagining a Nation* shows how ordinary people invested in the soft power of individual, social, and collective memories to create and perpetuate exclusionary national myths. *Reconsiderations in Southern African History*

Uncovering the Germanic Past Bonnie Effros,2012-06-14 This volume suggests how the slow genesis of Merovingian archaeology in France challenged the prevailing views of the population's exclusively Gallic ancestry. A history of the first century of the discipline, Effros' interdisciplinary study looks at the important contributions of medieval archaeological finds to modern French identity.

Socialism, Markets, and the Critique of Money Tsuyoshi Yuki,2021-09-20 This book provides a comprehensive overview of historical and international debates on the theory of “labor money” or “labor notes.” These debates exist in a triangular context of market socialism, communism (community-based socialism), and local currency, joining numerous socialists, anarchists, and Marx and Engels. Labor note theory encompasses theoretical, ideological, and practical doctrines aimed at designing a fair and desirable labor-based market or non-market economy by reforming the monetary and credit system. This theory was considered an unfeasible utopian idea in the context of orthodox Marxism, which is typically based on a historical study of surplus value doctrines. However, this book eschews Marx’s critique of “labor money” that limits the debate regarding a concrete alternative society, and instead proposes practical and gradual approaches to social reform by scrutinizing the primary sources of labor money theories and practical experiences and reconstructs their theoretical relationships.
