Handbook of Agri-Food Law in China, Germany, European Union Ines Härtel, 2018-01-09 This book offers a new and differentiated overview of Agri-Food Law against the background of national and global integration of markets, and compares for the first time important aspects of the agricultural, environmental and food law of China and Germany / the European Union. In addition to the basics, it discusses a wide range of issues, such as the respective legal regulatory structures for food security, food safety, geographical indications of origin, climate protection, fertilizers, plant protection products, genetic engineering, water protection, soil protection, land resources and organic farming. In addition, it addresses key environmental impacts and developments in order to create integrated value chains. The increasing fusion of upstream and downstream areas is becoming apparent from primary production, to the refinement and trade up level, and even to consumption. Agri-Food Law is now productively taking these important developments into account with regard to the aforementioned countries.

Economic and Social Rights and the Maintenance of International Peace and Security Claire Breen, 2017-06-14 This text comprises cutting-edge research on one of the greatest global challenges: the failure to address systematic economic and social exclusion, and attendant violations of economic and social rights (ESR), as a driver of conflict. The text explores what the UN's obligation to maintain international peace and security can mean when it is informed by the requirement to protect and promote ESR, rights that play a crucial role in maintaining international peace and security but which are often overlooked. The book considers the extent to which Security Council mandated peace operations have been informed by human rights and efforts to promote economic and social development. The approach is to analyse the extent to which the Security Council has interacted with the General Assembly, the Economic and Social Council as well as other Charter-based mechanisms such as the Human Rights Council, and its predecessor, with particular reference to the role of the Special Procedure Mechanisms. The role of the UN High Commissioner for Human Rights is also considered. In this way, the text shows that the connection between peace and security and human rights is well recognised by these organs. In addition, the text considers States' ESR obligations stemming from the extraterritorial application of such rights in the context of peace operations. Given that States' obligations stemming from ESR have often been neglected, the book examines how such provision could be improved using ESR-grounded plans reflecting the rights to health, food, water, education, work and life. The text concludes with a call to reimagine what international peace and security can look like when it is informed by the need to recognise the emergence of post-conflict legal obligations based on broader concepts of international peace and security that draw from ESR. This text will appeal to legal scholars, policy advisors, members of the military, those working in the area of development, NGOs and final-year undergraduate and/or postgraduate students working in the areas of international law, political science and international relations, and associated fields of research.

Territorial Disputes and Conflict Management Rongxing Guo, 2012-01-25 This book examines the problems of boundary demarcation and its impact on territorial disputes, and offers techniques to manage and resolve the resulting conflicts. Historically, most civil conflicts and internal wars have been directly related to boundary or territorial disputes. Cross-border discord directly affects the sustenance and welfare of local populations, often resulting in disease, impoverishment, and environmental damage as well as creating refugees. Although the impact of territorial disputes is great, they can often be settled through bilateral, and sometimes multilateral, agreements or international arbitration. This book sets out to probe into the problems of existing techniques on boundary demarcation and to test their possible impacts on boundary and territorial disputes. Various factors and their influences on cross-border tensions are tested, either qualitatively or quantitatively. After close examination of dozens of the most significant cases, the book presents various alternative solutions to the achievement of cross-border cooperation in disputed territories. An 'art of avoiding war' is included within the book, comprising six key schemes and five negotiating techniques. The comparative advantages, costs and benefits of each of these is analyzed and evaluated. This book will help guide practitioners in territorial disputes and will be of interest to students of conflict management, international security, peace and conflict studies, political violence and IR in general.

Urban Water Reuse Handbook Saeid Eslamian, 2016-01-05 Examining the current literature, research, and relevant case studies, presented by a team of international experts, the Urban Water Reuse Handbook discusses the pros and cons of water reuse and explores new and alternative methods for obtaining a sustainable water supply. The book defines water reuse guidelines, describes the historical and current

Transboundary Freshwater Ecosystems in International Law Ruby Moynihan, 2021-10-14 A global water crisis with far-reaching and interconnected environmental, social, health and economic impacts threatens the world. Healthy ecosystems and ecosystem services are degrading, and access to a sustainable water supply is increasingly inequitable both within and between States. This book demonstrates how to overcome the global freshwater ecosystem crisis by matching the scientific recommendations with an international legal framework fit for the task, which

re-orientates international water law towards a stronger ecosystem approach that also protects vulnerable societies. It illustrates how to understand the fragmented legally binding and non-binding instruments of the United Nations Economic Commission for Europe environmental treaties as one coherent legal regime, which contributes to strengthening general rules and principles of the law concerning transboundary freshwater ecosystems. With the recent global opening of the UNECE regime, this book explores its potential role within the European region, Central Asia, Caucasus, Africa, the Middle East and beyond.

Managing Transboundary Waters of Latin America Asit K. Biswas, 2013-09-13 Definitive analyses of transboundary water management in Latin America are conspicuous by their absence. The situation is a little better for rivers compared to groundwater resources. Transboundary water management in Latin America has been evolving in a somewhat different manner compared to other continents. The book includes eight authoritative case studies of Latin American transboundary rivers and aquifers, as well as a thinkpiece on the complexities of managing aquifers based on global experiences. The case studies are of different scales, ranging from the mighty Amazon to small Silala. The overall focus of the book is on ways in which such difficult and complex rivers and aquifers that are shared by two or more countries can be managed efficiently and equitably, and on the lessons, both positive and negative, that other regions can learn from the Latin American experience. This book was published as a special issue of the *International Journal of Water Resources Development*.

The Practice of Shared Responsibility in International Law André Nollkaemper, Ilias Plakokefalos, 2017-02-02 This is the third book in the series *Shared Responsibility in International Law*, which examines the problem of distribution of responsibilities among multiple states and other actors. In its work on the responsibility of states and international organisations, the International Law Commission recognised that attribution of acts to one actor does not exclude possible attribution of the same act to another state or organisation. Recognising that the applicable rules and procedures for shared responsibility may differ between particular issue areas, this volume reviews the practice of states, international organisations, courts and other bodies that have dealt with the issue of international responsibility of multiple wrongdoing actors in a wide range of issue areas, including energy, extradition, investment law, NATO-led operations and fisheries. These analyses jointly assess the fit of the prevailing principles of international responsibility and provide a basis for reform and further development of international law.

The Community of Interest Approach in International Water Law Julie Gjörtz Howden, 2020-06-02 In *The Community of Interest Approach in International Water Law*, Julie Gjörtz Howden identifies the normative elements of the community of interest approach, and how the approach provides a legal framework for common management of international watercourses.

Research Handbook on International Law and Natural Resources Elisa Morgera, Kati Kulovesi, 2016-11-25 *Research Handbook on International Law and Natural Resources* provides a systematic and comprehensive analysis of the role of international law in regulating the exploration and exploitation of natural resources. It illuminates interactions and tensions between international environmental law, human rights law and international economic law. It also discusses the relevance of soft law, international dispute settlement, as well as of various unilateral, bilateral, regional and transnational initiatives in the governance of natural resources. While the Handbook is accessible to those approaching the subject for the first time, it identifies pressing areas for further investigation that will be of interest to advanced researchers.

The Cambridge Handbook of Disaster Risk Reduction and International Law Katja L. H. Samuel, Marie Aronsson-Storrier, Kirsten Nakjavani Bookmiller, 2019-02-28 The number, intensity, and impact of diverse forms of 'natural' and 'human-made' disasters are increasing. In response, the international community has shifted its primary focus away from disaster response to prevention and improved preparedness. The current globally agreed upon roadmap is the ambitious Sendai Framework for Disaster Risk Reduction 2015–2030, central to which is the better understanding of disaster risk management and mitigation. Sendai also urges innovative implementation, especially multi-sectoral and multi-hazard coherence. Yet the law sector itself remains relatively under-developed, including a paucity of supporting 'DRR law' scholarship and minimal cross-sectoral engagement. Commonly, this is attributable to limited understanding by other sectors about law's dynamic potential as a tool of disaster risk mitigation, despite the availability of many risk-related norms across a broad spectrum of legal regimes. This unique, timely Handbook brings together global and multi-sector perspectives on one of the most pressing policy issues of our time.

Regional Cooperation in Amazonia Maria Antonia Tigre, 2017-08-28 In *Regional Cooperation in Amazonia: A Comparative Environmental Law Analysis*, Maria Antonia Tigre investigates efforts in regional cooperation for the protection of the Amazonian ecosystem by the eight countries in which the world's largest rainforest lies.
