**Agricultural Value Chains in India** Ashok Gulati, Kavery Ganguly, Harsh Wardhan, 2022-01-01 This open access book provides a clear holistic conceptual framework of CISS-F (competitiveness, inclusiveness, sustainability, scalability and access to finance) to analyse the efficiency of value chains of high value agricultural commodities in India. It is based on the understanding that agriculture is an integrated system that connects farming with logistics, processing and marketing. Farmer's welfare being central to any agricultural policy makes it very pertinent to study how a value chain works and can be strengthened further to realize this policy goal. This book adds value to the existing research by studying the value chains end-to-end across a wide spectrum of agricultural commodities with the holistic lens of CISS-F. It is not enough that a value chain is competitive but not inclusive or it is competitive and inclusive but not sustainable. The issue of scalability is very critical to achieve macro gains in terms of greater farmer outreach and sectoral growth. The research undertaken here brings out some very useful insights for policymaking in terms of what needs to be done better to steer the agricultural value chains towards being more competitive, inclusive, sustainable and scalable. The value chain specific research findings help draw very nuanced policy recommendations as well as present a

big picture of the future direction of policy making in agriculture.

**The Hormone Myth** Robyn Stein DeLuca,2017-08-01 "The Hormone Myth is a bracing, accurate breath of fresh air. It turns conventional wisdom about

hormones on its head, and provides a far more liberating view of women's health than what we've all been taught." —Christiane Northrup, MD, author of *Women's Bodies, Women's Wisdom* "Is it that time of month?" "Is your biological clock ticking?" You're so emotional lately—are you going through menopause? We've all heard it before. From the moody menstrual monster to the menopausal maniac, the idea that women become raving lunatics when their hormones fluctuate is firmly entrenched in American culture—and deeply fueled by the media. But where exactly did this stereotype come from? How has it hurt women? And how can we move past it once and for all? In this breakthrough book, Robyn Stein DeLuca fearlessly exposes and debunks pervasive myths about women's hormones, and reveals how flawed, outdated research and sexism have joined forces throughout history to keep women "in their place." With a revolutionary exploration of women's hormonal lives—from menstruation to childbirth to menopause—DeLuca shines a much-needed light on the lies that have impacted women. Now more than ever, it's time to resist the myth that women are ruled by their hormones. It's time for women to take charge of their lives. And it's time for women to own their emotions in a healthy and realistic way.

**Databases for Pharmacoepidemiological Research** Miriam Sturkenboom, Tania Schink, 2021-01-12 This book allows readers to gain an in-depth understanding of the role of real-world data in pharmacoepidemiology, and highlights the strengths and limitations of the respective databases with regard to pharmacoepidemiological research. Over the past decade, the increasing use of real-world data in pharmacoepidemiological research has been accompanied by a growing recognition of the value of real-world evidence in clinical and regulatory decision-making. Electronic healthcare databases allow analyses of drug and vaccine utilization in routine care after approval, as well as investigations of their comparative effectiveness and safety. They are especially useful for the identification of rare risks and rare drug exposures over long periods of time, and as such sustainably extend the basis for drug safety research. This book provides an introduction to the role of real-world data in pharmacoepidemiological research and the main developments in the last 15 years. It also offers a comprehensive overview of the general classification characteristics of databases, together with their strengths and limitations, and a detailed description of 21 individual databases, written by professionals who work with or maintain them.

Rothwell, 2004-12-01 Why a focus on jobs is not enough Force-fitting employees to job descriptions leads to unhappy people and substandard performance. For years, HR professionals have struggled with this dilemma. But it doesn't have to be that way. *Competency-Based Human Resource Management* describes a new

model of performance management that matches employee talents to the work that must be done. By focusing on the critical competencies that distinguish star performers, HR professionals can transform the way they recruit, select, train, develop, and compensate top-performing employees.

*This Is Not a Program* Tiqqun, 2011-05-06 An urgent critique of the biopolitical subject and omnipresent Empire. Historical conflict no longer opposes two massive molar heaps, two classes—the exploited and the exploiters, the dominant and dominated, managers and workers—between which, in each individual case, it would be possible to differentiate. The front line no longer cuts through the middle of society; it now runs through each one of us... “—from *This Is Not a Program* Traditional lines of revolutionary struggle no longer hold. Rather, it is ubiquitous cybernetics, surveillance, and terror that create the illusion of difference within hegemony. Configurations of dissent and the rhetoric of revolution are merely the other face of capital, conforming identities to empty predicates, ensuring that even “thieves,” “saboteurs,” and “terrorists” no longer exceed the totalizing space of Empire. *This Is Not a Program* offers two texts, both originally published in French by Tiqqun with Introduction to Civil War in 2001. In *This Is Not a Program*, Tiqqun outlines a new path for resistance and struggle in the age of Empire, one that eschews the worn-out example of France's May '68 in favor of what they consider to be the still fruitful and contemporary insurrectionary movements in Italy of the 1970s. “As a Science of Apparatuses” examines the way Empire has enforced on the subject a veritable metaphysics of isolation and pacification, “apparatuses” that include chairs, desks, computers; surveillance (security guards, cameras); disease (depression); crutch (cell phone, lover, sedative); and authority. Tiqqun's critique of the biopolitical subject and omnipresent Empire is all the more urgent as we become inured to the permanent state of exception that is the War on Terror and to other, no less intimate forms of pacification. But all is not lost. In its unrelenting production of the Same, Empire itself creates the conditions necessary for the insurrection to come.

**Trauma, Autism, and Neurodevelopmental Disorders** Jason M. Fogler, Randall A.

Phelps,2018-11-29 This book examines the diagnostic overlap and frequent confusion between the newly named DSM-5 diagnostic categories of neurodevelopmental disorders (NDDs), which include autism spectrum disorder (ASD), and trauma and stressor related disorders (TSRDs). These conditions are similar in that a) children with developmental disorders are particularly vulnerable to traumatic events and b) all have pervasive effects on the brain and development. Chapters provide a wealth of effective clinical, family, and school-based interventions, developed from established studies and important new findings. In addition, chapters use illustrative case studies to survey assessment challenges in today's healthcare climate and consider alternative routes for improving correct diagnoses, identifying appropriate interventions, and referring proper targeted, evidence-based treatment and services. The book concludes with the editors' recommendations for needs-based service access, including a more widespread use and acceptance of the Research Domain Criteria (RDoC) and the International Classification of Functioning, Disability, and Health (ICF) framework. Topics featured in this book include: The neurobiological contributors to posttraumatic stress disorder (PTSD). Fetal alcohol spectrum disorders (FASDs) and its diagnosis in children with a history of trauma. Interventions for trauma and stressor-related disorders in preschool-aged children. Reactive attachment disorder (RAD) and autism spectrum disorder (ASD) diagnosis and care in a cultural context. Special population consideration in ASD identification and treatment. Challenges associated with the transition to adulthood. Trauma and neurodevelopmental disorders from a public health perspective. Trauma, Autism, and Neurodevelopmental Disorders is a must-have resource for researchers, clinicians and related professionals, and graduate students in developmental psychology, child and adolescent psychiatry, public health, social work, pediatrics, and special education.
