Career Development Interventions Spencer Niles, JoAnn Harris-Bowlsbey, 2016-01-03 For courses in Career Counseling. A practical, straightforward approach to the competencies required of today's professional career counselors. This comprehensive, top-selling text presents theories, assessments, planning tools, resources, and technologies relevant to modern career

development in a practical approach that shows theory and research in action. The new edition features a stronger emphasis on the elementary school level, up-to-date coverage of the use of technology in career counseling, including the use of social media for job seeking, and the addition of new case studies and practical assignments throughout. From reviews of the text: Very good scholarship presented in a concise and informative way From my perspective, this is the best introductory career development text available. --James M. O'Neil, University of Connecticut [Key strengths of the book include that it is] well-aligned with CACREP standards, . . . connect[s] developmental models with career needs, [includes] programming interventions offered by level (elementary, middle/high, postsecondary), [includes] . . . more recently proposed theories, [and has a] focus on application. . . . The balance of engaging writing style and

topical depth is better, in my opinion, than any other career text I have reviewed. --Chester R. Robinson, Texas A&M University - Commerce One component I really liked was the option for MyCounselingLab. I feel confident students would benefit from this, especially if this course is taught in an online format. --Joan N. Strutton, The University of Texas at Tyler Also available with MyCounselingLab(R) This title is also available with MyCounselingLab--an online homework, tutorial, and assessment program designed to work with the text to engage students and improve results. Changing Careers Gerald A. Gladstein, 1994 The ten-year demonstration project on career change undertaken by the University of Rochester Adult Counseling Center was unique, drawing on key concepts from developmental psychology, personality theory, counselling theory, and the sociology of careers to provide adult career counselling; the findings of the project will become routinely cited in all fields relating to career change. This book covers the background and history of the Center, its

functioning and management, the clients and the counsellors (with case studies), and conclusions and evaluation.

Career Development, Assessment, and Counseling W. Larry Osborne, 1997 Career counseling is central to the counseling profession. The Career Development, Assessment, and Counseling (C-DAC) approach to career counseling, which facilitates the career development of people throughout their lives, has received wide attention; an analysis of the theory and research from which this model was derived are examined here. The book discusses the test instruments that make up C-DAC's assessment battery and presents specific recommendations for applying the C-DAC approach to high school, university, and community agency clientele. Chapter 1 provides the history of the C-DAC approach and explains its goals and implementation measures. Chapter 2 offers a detailed analysis of the instruments used in C-DAC, with special emphasis on adult career concerns, the career development inventory, and other measures. Chapter 3 emphasizes developmental career counseling with adolescents, and includes a careful analysis of theoretical considerations. The career development stage of college students is examined in chapter 4, along with C-DAC applications for this population.

Chapter 5 discusses the theory and career development of adults and ways in which C-DAC can help adults. Numerous case studies with culturally diverse clients from different age groups and settings are used to illustrate the C-DAC approach. Contains name and subject indexes and approximately 155 references. (RJM)

Counseling for the Real World Angie O'Gieblyn, 2018-12-31

Counseling for the Real World: Case Studies Across the Curriculum bridges the gap between theory and practice by providing students with the opportunity to actively analyze true-to-life case simulations. cases. Each chapter contains a beginner, intermediate, and advanced level case, along with discussion questions and application activities for each case. Topics covered include: the foundations of clinical mental health counseling, legal considerations, using counseling skills to build therapeutic rapport, multicultural competence, trauma treatment, child and adolescent counseling, career counseling, and much more. Designed to provide students of all skill levels with meaningful insight and practice, *Counseling for the Real World* is ideal for clinical mental health and professional counseling preparation programs. The text features a standalone chapter for students pursuing their Ph.D. in counselor education and supervision.
