Business Cycles Victor Zarnowitz,2007-11-01 This volume presents the most complete collection available of the work of Victor Zarnowitz, a leader in the study of business cycles, growth, inflation, and forecasting.. With characteristic insight, Zarnowitz examines theories of the business cycle, including Keynesian and monetary theories and more recent rational expectation and real business cycle theories. He also measures trends and cycles in economic activity; evaluates the performance of leading indicators and their composite measures; surveys forecasting tools and performance of business and academic economists; discusses historical changes in the nature and sources of business cycles; and analyzes how successfully forecasting firms and economists predict such key economic variables as interest rates and inflation.

Kanuni i Lekë Dukagjinit Lekë Dukagjini,1989 THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament. It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor.--David Binder, The New York Times. This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg. The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression.--Victor Meier, The Frankfurter Allgemeine Zeitung. The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice. The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life.--Ismail Kadare, Albanian writer.

Pedagogies of Disaster Adam Staley Groves,Nico Jenkins,Vincent W. J. van Gerven Oei,2013-10 We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of less profitable academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history.Because of the absence of a historically grounded establishment of the Humanities, academic peripheries, usually accompanied by a weak civil society infrastructure, seem to offer the most fertile ground for rethinking the Humanities, their pedagogical practice, and their politics, as well as the greatest threats, such as the ongoing capitalization of research, and profitability as the norm of educational achievement. The sprawling presence of for-profit universities and in academic peripheries such as Albania and Kosovo is indicative of this problematic, as are consistent underfunding of universities and the relentless budget cuts in American and English, and to a lesser extent European, universities. Motivations for this ongoing attack on the university are often driven by a political system or a politics with an aggressive stance to critical thought.

The General of the Dead Army Ismail Kadare,2012-04 This is the story of an Italian general, accompanied by his chaplain, charged with the mission of scouring Albania in search of the bones of their fallen countrymen, killed twenty years earlier during World War II.

Kerplunk! Patrick F. McManus,2008-09-30 Presents a collection of curmudgeonly tales on Pacific Northwest country living as enjoyed by both outdoorsmen and armchair enthusiasts, in a volume that explores the lighter side of such topics as gun safes, fly tying, and bird dog flatulence.

Broken April Ismail Kadare,1990 Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

A Girl in Exile Ismail Kadare,2019-01-22 A New York Times Book Review Editors' Choice "Erotic, paranoid and lightly fantastical." —The Wall Street Journal "Ismail Kadare's readers are astonished every year when the Nobel committee overlooks him. . . . A Girl in Exile, published in Albanian in 2009, may rekindle the worldwide hopes." —The New York Times Book Review During the bureaucratic machinery of Albania's 1945–1991 dictatorship, playwright Rudian Stefa is called in for questioning by the Party Committee. A girl—Linda B.—has been found dead, with a signed copy of his latest book in her possession. He soon learns that Linda's family, considered suspect, was exiled to a small town far from the capital. Under the influence of a paranoid regime, Rudian finds himself swept along on a surreal quest to discover what really happened to Linda B. "At a time when parts of the world are indulging nostalgia for communism, Kadare's novel confronts the infuriating impossibility of art in an autocratic, anti-individualist system." —The Washington Post "A Girl in Exile confirms Kadare to be the best writer at work today who remembers—almost aggressively so, refusing to forget—European totalitarianism." —The New Republic

The Crime of Aggression Noah Weisbord,2019-06-11 A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

Inclusive Teaching J. Michael Peterson,Mishael Marie Hittie,2010 The second edition of Inclusive Teaching takes a uniquely different approach. Organized around the profound question, "How can we create schools and classrooms where vastly diverse students learn well together?" the text strives to provide a myriad of creative answers to this question for our future teachers-leaders of the classroom impacting positive change for tomorrow's schools. Centrally focused on how to create an effective school for all learners-students with mild to severe disabilities,

gifted and talented students, racially and culturally diverse students, students with differing sexual preferences and more--the authors have offered strategies for including and supporting all students to learn effectively in the general education classroom. The text synthesizes a vast array of strategies from many different sources, including workshop approaches to learning, differentiated instruction, universal design for learning, multicultural education, positive behavior support, anti-bullying practices, reducing the learning gap between minority and majority groups, and more. Clearly organized around the way in which teachers think, from arranging the physical classroom to dealing with the social-emotional needs of students, to designing effective, multi-level, differentiated instruction, the text remains positively devoted to teaching change and impacting the future of all students learning together.

Arabic Thought and Islamic Societies (RLE Politics of Islam) Aziz Al-Azmeh,2013-07-18 This is a study of the structure and composition of the official learning current in medieval Arabic culture. This comprises natural sciences both exoteric and esoteric (medicine, alchemy, astrology and others), traditional and religious sciences (such as theology, exegesis and grammar), philosophical sciences such as metaphysics and ethics, in addition to technical disciplines like political theory and medicine, and other fields of intellectual endeavour. The book identifies and develops a number of conceptual elements common to the various areas of official Arabic scientific discourse, and shows how these elements integrate these disparate sciences into an historical epistemic unity. The specific profile of each of these different sciences is described, in terms of its conceptual content, but especially with reference to its historical circumstances. These are seen to be embodied in a number of institutional supports, both intellectual and social: paradigms, schools of thought, institutions of learning, pedagogic techniques, and a body of professionals, all of which combine to form definite, albeit ever renewed, traditions of learning. Finally, an attempt is made to relate Arabic scientific knowledge in the Middle Ages to patterns of scientific and political authority. First published in 1986.

Economics of Travel and Tourism Adrian Bull,1995-01-31 This book examines the economics of the travel and tourism industries and their customer markets - tourists. It clearly identifies the special factors within tourism which distinguish its analysis, in economic terms, from other activities.

Eugenie Grandet Honoré de Balzac,2024-01-05 Eugénie Grandet is a novel first published in 1833 by French author Honoré de Balzac. While he was writing it he conceived his ambitious project, *La Comédie humaine*, and almost immediately prepared a second edition, revising the names of some of the characters so that Eugénie Grandet then fitted into the section: *Scenes from provincial life (Scènes de la vie de province)* in the *Comédie*. He dedicated the edition to Maria Du Fresnay, who was then his lover and was the mother of his daughter, Marie-Caroline Du Fresnay. Eugénie Grandet is set in the town of Saumur, which should have been familiar to Balzac since he grew up in Tours about 35 miles away. The two towns are both on the Loire, with châteaux, and of similar size. Tours was much more important historically and politically, which may explain why Balzac allows the impression in the opening that the Grandet residence was Saumur's most important building. Though Balzac grew up in the aftermath of the Revolution, he came to adulthood in Paris under the restored Bourbon monarchy (Louis XVIII & Charles X) and wrote most of what we know under the July Monarchy (1830-1848) of Louis Philippe, which came to power when the revolution of 1830 deposed the Bourbon monarchy. It is worth noting that though the Republic had replaced the Livre with the Franc (of equal value), both continued to circulate, as did the Louis. (wikipedia.org) About the author: Honoré de Balzac born Honoré Balzac; (20 May 1799 - 18 August 1850) was a French novelist and playwright. The novel sequence *La Comédie humaine*, which presents a panorama of post-Napoleonic French life, is generally viewed as his magnum opus. Owing to his keen observation of detail and unfiltered representation of society, Balzac is regarded as one of the founders of realism in European literature. He is renowned for his multi-faceted characters; even his lesser characters are complex, morally ambiguous and fully human. Inanimate objects are imbued with character as well; the city of Paris, a backdrop for much of his writing, takes on many human qualities. His writing influenced many famous writers, including the novelists Émile Zola, Charles Dickens, Marcel Proust, Gustave Flaubert, and Henry James, and filmmakers François Truffaut and Jacques Rivette. Many of Balzac's works have been made into films and continue to inspire other writers. James called him really the father of us all. An enthusiastic reader and independent thinker as a child, Balzac had trouble adapting to the teaching style of his grammar school. His willful nature caused trouble throughout his life and frustrated his ambitions to succeed in the world of business. When he finished school, Balzac was apprenticed in a law office, but he turned his back on the study of law after wearying of its inhumanity and banal routine. Before and during his career as a writer, he attempted to be a publisher, printer, businessman, critic, and politician; he failed in all of these efforts. *La Comédie Humaine* reflects his real-life difficulties, and includes scenes from his own experience. Balzac suffered from health problems throughout his life, possibly owing to his intense writing schedule. His relationship with his family was often strained by financial and personal drama, and he lost more than one friend over critical reviews. In 1850, Balzac married Ewelina Hańska (née Contessa Rzewuska), a Polish aristocrat and his longtime love. He died in Paris six months later. (wikipedia.org)

Human Behavior in Organizations Rodney C. Vandever,Michael L. Menefee,2006 This text builds a solid foundation in organizational behavior concepts needed to understand individual and group behavior in organizations. The focus is on developing effective leadership behavior beginning with discovery of your own preferences in terms of your behavioral choices, your preferred behavior in groups, and your behavioral preference for certain organizational structures. A blend of current theory, practical applications, self-assessment exercises, and case studies help explain and apply concepts in an experiential manner. Book jacket.

Introduction to Finance Lawrence J. Gitman,Jeff Madura,2001 Due to ongoing advancements in technology, new legislation, and other innovations, the field of finance is rapidly changing. Developments in financial markets and investments necessitate that students be exposed to these topics as well as to financial management, the traditional focus of the introductory finance course. *Introduction to Finance* develops the three components of finance in an interactive framework that is consistent with the responsibilities of all financial professionals, managers, intermediaries, and investors in today's economy. To show the interrelationships between the areas of finance, the text emphasizes how investor activities monitor firms and focuses on the role of financial markets in channeling funds from investors to firms.

Microelectronic Circuits and Devices Mark N. Horenstein,1996 This introduction to microelectronic circuits and devices views a circuit as an entire electronic system, rather than as a collection of individual devices. Providing students with the tools necessary to make intelligent choices in the design of analogue and digital systems, it introduces the MOSFET, BJT, and JFET in a single chapter on device properties; covers the non-ideal properties of op-amps using an approach that can be understood by those with little prior knowledge of transistor theory; and contains an optional discussion of photonic devices - including the photodiode, phototransistor, light-emitting diode, and laser diode.
