**Cephalopod Culture** José Iglesias,Lidia Fuentes,Roger Villanueva,2014-03-26 Cephalopod Culture is the first compilation of research on the culture of cephalopods. It describes experiences of culturing different groups of cephalopods: nautilus, sepioids (*Sepia officinalis*, *Sepia pharaonis*, *Sepiella inermis*, *Sepiella japonica* *Euprymna hyllebergi*, *Euprymna tasmanica*), squids (*Loligo vulgaris*, *Doryteuthis opalescens*, *Sepioteuthis lessoniana*) and octopods (*Amphioctopus aegina*,

Enteroctopus megalocyathus, Octopus maya, Octopus mimus, Octopus minor, Octopus vulgaris, Robsonella fontaniana). It also includes the main conclusions which have been drawn from the research and the future challenges in this field. This makes this book not only an ideal introduction to cephalopod culture, but also a valuable resource for those already involved in this topic.

Politics, Gender, and the Mexican Novel, 1968-1988 Cynthia Steele, 2010-07-05 The student massacre at Tlatelolco in Mexico City on October 2, 1968, marked the beginning of an era of rapid social change in Mexico. In this illuminating study, Cynthia Steele explores how the writers of the next two decades responded to the massacre and to the social crisis it signaled in terms of political change and gender identity.

**Mexican Travel Writing** Thea Pitman, 2008 This book is a detailed study of salient examples of Mexican travel writing from the nineteenth and twentieth centuries. While scholars have often explored the close relationship between European or North American travel writing and the discourse of imperialism, little has been written on how postcolonial subjects might relate to the genre. This study first traces the development of a travel-writing tradition based closely on European imperialist models in mid-nineteenth-century Mexico. It then goes on to analyse how the narrative techniques of postmodernism and the political agenda of postcolonialism might combine to help challenge the genre's imperialist tendencies in late twentieth-century works of travel writing, focusing in particular on works by writers Juan Villoro, Héctor Perea and Fernando Solana Olivares.

*The Invention of Argentina* Nicolas Shumway, 2023-04-28 The nations of Latin America came into being without a strong sense of national purpose and identity. In *The Invention of Argentina*, Nicholas Shumway offers a cultural history of one nation's efforts to determine its nature, its destiny, and its place among the nations of the world. habitat types. They collectively provide a snap-shot of the sorts of studies and actions being taken in Europe to address issues in biodiversity and conservation – topical examples that make the volume especially valuable for use in conservation biology courses.

The Metabolism of Islands Simron Singh, Marina Fischer-Kowalski, Marian Chertow, 2021-08-04 This book makes the case for why we should care about islands and their sustainability. Islands are hotspots of biocultural diversity and home to 600 million people that depend on one-sixth of the earth's total area, including the surrounding oceans, for their subsistence. Today, they are at the frontlines of climate change and face an existential crisis. Islands are, however, potential “hubs of innovation” that are uniquely positioned to be leaders in sustainability and climate action. This volume argues that a full-fledged program on “island industrial ecology” is urgently needed, with the aim of offering policy-relevant insights and strategies to sustain small islands in an era of global environmental change. The nine contributions in this volume cover a wide range of applications of socio-metabolic research, from flow accounts to stock analysis and their relationship to services in space and time. They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change.

**Drought in Bulgaria** Ivan Raev, 2018-01-18 Given the different geographical and human contexts in which climate change impacts will be experienced, thinking by analogy provides one useful way to explore dimensions of such change. This landmark book, based on the human dimensions of global change paradigm, examines climate impacts through the study of a contemporary society's response to a drought period analogous to expected future climate. Bulgaria suffered severe drought from 1982 to 1994, conditions which models suggest better reflects future climate than existing norms. The Center for Integrated Regional Assessment at Penn State and the

Bulgarian Academy of Sciences collaborated to research this drought period as an analogy for future climate. This book shows their assessment of what can be learned from the impacts of and responses to contemporary drought in Bulgaria. It therefore makes an important contribution to the literature on regional climate change and methods used to address anticipated impacts of that change.

*Meeting the Sustainable Development Goals in Small Developing States with Climate Vulnerabilities: Cost and Financing* International Monetary Fund, 2021-03-05 Small Developing States (SDS) face substantial challenges in achieving sustainable development. Many of these challenges relate to the small size and limited diversification of their economies. SDS are also among the most vulnerable countries to the impact of climate change and natural disasters. Meeting SDS sustainable development goals goes hand-in-hand with building their climate resilience. But the additional costs to meet development and resilience objectives are substantial and difficult to finance. This work adapts the IMF SDG Costing methodology to capture the unique characteristics and challenges of climate-vulnerable SDS. It also zooms into financing options, estimating domestic tax potential and discussing the possibility of accessing 'climate funds.'
