Circular Economy Helen Kopnina, Kim Poldner, 2021-08-11 How can we design circular business models? How can we organize the transition from a linear to a circular economy? And how can we imagine circular futures that help us transform current realities? This book aims to provide answers to these questions while addressing the challenges and opportunities of the circular economy. The authors reflect on why conventional sustainability models – such as the ‘triple P’ (People, Profit and Planet) or eco-efficiency – have failed in addressing environmental challenges, including climate change, biodiversity loss and pollution. They then move on to explore innovative circular business models, which propose to eliminate environmental damage by radically reforming the system of industrial production. Organizing the transition is a collaborative effort: entrepreneurs, consumers, policymakers, multinationals and intermediaries need to work together to foster the emergence of the circular economy as an institutional field. Together with younger generations of learners and equipped with beyond-human-centred values towards awareness of the material and natural world, novel circular futures can be imagined. Offering points of reference for continued critical

discourse and examples of practically applicable sustainability solutions, this book will be of great interest to students, teachers, practitioners and scholars of circular economy.

Perfect Me Heather Widdows, 2020-02-25 How looking beautiful has become a moral imperative in today's world The demand to be beautiful is increasingly important in today's visual and virtual culture. Rightly or wrongly, being perfect has become an ethical ideal to live by, and according to which we judge ourselves good or bad, a success or a failure. *Perfect Me* explores the changing nature of the beauty ideal, showing how it is more dominant, more demanding, and more global than ever before. Heather Widdows argues that our perception of the self is changing. More and more, we locate the self in the body--not just our actual, flawed bodies but our transforming and imagined ones. As this happens, we further embrace the beauty ideal. Nobody is firm

enough, thin enough, smooth enough, or buff enough—not without significant effort and cosmetic intervention. And as more demanding practices become the norm, more will be required of us, and the beauty ideal will be harder and harder to resist. If you have ever felt the urge to make the best of yourself or worried that you were letting yourself go, this book explains why. *Perfect Me* examines how the beauty ideal has come to define how we see ourselves and others and how we structure our daily practices—and how it entralls us with promises of the good life that are dubious at best. *Perfect Me* demonstrates that we must first recognize the ethical nature of the beauty ideal if we are ever to address its harms.

Humans Tom Phillips, 2019-05-07 “If Sapiens was a testament to human sophistication, this history of failure cheerfully reminds us that humans are mostly idiots.” –Greg Jenner, author of A Million Years in a Day Now an International Bestseller A Toronto Star-Bestselling Book of the Year Modern humans have come a long way in the seventy thousand years they’ve walked the earth. Art, science, culture, trade—on the evolutionary food chain, we’re true winners. But it hasn’t always been smooth sailing, and sometimes—just occasionally—we’ve managed to truly f*ck things up. Weaving together history, science, politics and pop culture, Humans offers a panoramic exploration of humankind in all its glory, or lack thereof. From Lucy, our first ancestor, who fell out of a tree and died, to General Zhou Shou of China, who stored gunpowder in his palace before a lantern festival, to the Austrian army attacking itself one drunken night, to the most spectacular fails of the present day, Humans reveals how even the most mundane mistakes can shift the course of civilization as we know it. Lively, wry and brimming with brilliant insight, this unique compendium offers a fresh take on world history and is one of the most entertaining reads of the year. “It’s hard to imagine someone other than Phillips pulling off a 250+ page roast of mankind, but his perfect blend of brilliance and goofiness makes it a joy to read.” –Buzzfeed “With the delicate touch of a scholar and the laugh-out-loud chops of a comedian, Tom Phillips shows us how our species has been messing things up . . . [for

four million years.” –Steve Brusatte, New York Times–bestselling author

The book discusses ultraviolet phototherapy for skin diseases and infections and presents the basic science of photodynamic therapy and its use in cancer therapy and other medical specialties. It then covers mechanistic studies and clinical applications of low-level laser (light) therapy as well as the use of high power or surgical laser therapy in specialties, such as dentistry and dermatology.
