Science and Pseudoscience in Clinical Psychology, First Edition Scott O. Lilienfeld, Steven Jay Lynn, Jeffrey M. Lohr, 2012-12-18 This is the first major text designed to help professionals and students evaluate the merits of popular yet controversial practices in clinical psychology, differentiating those that can stand up to the rigors of science from those that cannot. Leading researchers review widely used therapies for alcoholism, infantile autism, ADHD, and posttraumatic stress disorder; herbal remedies for depression and anxiety; suggestive techniques for memory recovery; and self-help models. Other topics covered include issues surrounding psychological expert testimony, the uses of projective assessment techniques, and unanswered questions about dissociative identity disorder. Providing knowledge to guide truly accountable mental health practice, the volume also imparts critical skills for designing and evaluating psychological research programs. It is ideal for use in advanced undergraduate- and graduate-level courses in clinical psychology, psychotherapy, and evidence-based practice.

Mother Teresa Gezim Alpi, 2006-10-16 Mother Teresa was one of the most written about and publicised women in modern times. Apart from Pope John Paul II, she was arguably the most advertised religious celebrity in the last quarter of the twentieth century. During her lifetime as well as posthumously, Mother Teresa continues to generate a huge level of interest and heated debate. Gezim Alpi explores the significance of Mother Teresa to the mass media, to celebrity culture, to the Church and to various political groups. A section explores the ways different vested interests have sought to appropriate her after her death, and also examines Mother Teresa's own attitude to her childhood and to the Balkan conflicts in the 1980s and 1990s. This book sheds a new and fascinating light upon this remarkable and influential woman, which will intrigue followers of Mother Teresa and those who study the vagaries of stardom and celebrity culture.

St John of the Cross: His Life and Poetry Gerald Brenan, 1973-05-17 The paperback edition of a very successful and in some ways remarkable book, first published in 1973. Gerald Brenan is well known for his 'expository' works on Spanish history and literature, and now in his eighties he has returned to an early interest in the Spanish mystics to produce an absorbing study of St John of the Cross, one of the foremost of Catholic mystics and poets. The book is perhaps the first in English to combine an objective - but sensitive and lively - account of St John's life with a fresh translation (by Mr Brenan's associate Lynda Nicholson) of his verse.

The Mystery of Mother Teresa & Sainthood Prabira Ghosh, 2006 Mother Teresa, 1910-1997, nun who founded the Missionary Sisters and Brothers of Charity in Calcutta and winner of Nobel Prize for peace in 1979.

Indigenous Heritage and Intellectual Property Silke von Lewinski, 2008-01-01 For indigenous cultures, property is an alien concept. Yet the market-driven industries of the developed world do not hesitate to exploit indigenous raw materials, from melodies to plants, using intellectual property law to justify their behaviour. Existing intellectual property law, for the most part, allows industries to use indigenous knowledge and resources without asking for consent and without sharing the benefits of such exploitation with the indigenous people themselves. It should surprise nobody that indigenous people object. Recognizing that the commercial exploitation of indigenous knowledge and resources takes place in the midst of a genuine and significant clash of cultures, the eight contributors to this important book explore ways in which intellectual property law can expand to accommodate the interests of indigenous people to their traditional knowledge, genetic resources, indigenous names and designations, and folklore. In so doing they touch upon such fundamental issues and concepts as the following: collective rights to the living heritage; relevant human rights norms; benefit-sharing in biological resources; farmers rights; the practical needs of documentation, assistance, and advice; the role of customary law; bioprospecting and biopiracy; and public domain. As a starting point toward mutual understanding and a common basis for communication between Western-style industries and indigenous communities, *Indigenous Heritage and Intellectual Property* is of immeasurable value. It offers not only an in-depth evaluation of the current legal situation under national, regional and international law including analyses of the Convention on Biological Diversity and other international instruments, as well as initiatives of the World Intellectual Property Organization (WIPO), the UN Food and Agriculture Organization (FAO), and other international bodies but also probes numerous further possibilities. While no one concerned with indigenous culture or environmental issues can afford to ignore it, this book is also of special significance to practitioners and policymakers in intellectual property law in relation to indigenous heritage. This book, here in its second edition, presents the most recent state of knowledge in the field.

Surviving Trauma David Aberbach, 1989

Something Beautiful for God Malcolm Muggeridge, 1986-10-01 No woman alive today has inspired so many with her simplicity of faith and compassion so all-encompassing. As she daily embraces the least of the least in her arms, Mother Theresa challenges the whole world to greater acts of service and understanding in the name of love. First published in 1971, this classic work introduced Mother Theresa to the Western World. As timely now as it was then, *Something Beautiful for God* interprets her life through the eyes of a modern-day skeptic who became literally transformed within her presence, describing her as a light which could never be extinguished.

Intellectual Property and Human Development Tzen Wong, Graham Dutfield, 2010-10-21 This book examines the social impact of intellectual property laws. It addresses issues and trends relating to health, food security, education, new technologies, preservation of bio-cultural heritage and contemporary challenges in promoting the arts. It explores how intellectual property frameworks could be better calibrated to meet socio-economic needs in countries at different stages of development, with local contexts and culture in mind. A resource for policy-makers, stakeholders, non-profits and students, this volume furthermore highlights alternative modes of innovation that are emerging to address such diverse challenges as neglected or resurgent diseases in developing countries and the harnessing of creative possibilities on the Internet. The collected essays emphasize not only fair access by individuals and communities to intellectual property - protected material, whether a cure, a crop variety, clean technology, a textbook or a tune - but also the enhancement of their own capabilities in cultural participation and innovation.

The Collected Works of St. John of the Cross Saint John of the Cross, 1979

Intellectual Property Rights and China Bryan S. Bachner, 2009 The aim of this book is to analyze the patent law that regulates traditional Chinese medicine and to suggest how it may be improved so as, on the one hand, to ensure that pharmaceutical firms have sufficient incentives to continue to research and develop traditional Chinese medicine while, on the other hand, to recognize the value of the authentic traditional contributions. This book raises to a new level the continuing discussion of the correlation between intellectual property rights and environmental law. In the establishment of the law concerning intellectual property rights, the state is primarily

concerned with creating incentives for invention through the assignment of property rights. In enacting environmental law, the state prioritizes the prevention of environmental injury by regulating the harmful by-products of a particular economic activity. A welcome addition to the literature, this study will be of interest to academics, practising lawyers, government legal advisors, and investors alike.

Powerful Medicines Jerry Avorn, M.D., 2008-12-10 If you believe that the latest blockbuster medication is worth a premium price over your generic brand, or that doctors have access to all the information they need about a drug's safety and effectiveness each time they write a prescription, Dr. Jerry Avorn has some sobering news. Drawing on more than twenty-five years of patient care, teaching, and research at Harvard Medical School, he shares his firsthand experience of the wide gap in our knowledge of the effectiveness of one medication as compared to another. In *Powerful Medicines*, he reminds us that every pill we take represents a delicate compromise between the promise of healing, the risk of side effects, and an increasingly daunting price. The stakes on each front grow higher every year as new drugs with impressive power, worrisome side effects, and troubling costs are introduced. This is a comprehensive behind-the-scenes look at issues that affect everyone: our shortage of data comparing the worth of similar drugs for the same condition; alarming lapses in the detection of lethal side effects; the underuse of life-saving medications; lavish marketing campaigns that influence what doctors prescribe; and the resulting upward spiral of costs that places vital drugs beyond the reach of many Americans. In this engagingly written book, Dr. Avorn asks questions that will interest every consumer: How can a product judged safe by the Food and Drug Administration turn out to have unexpectedly lethal side effects? Why has the nation's drug bill been growing at nearly 20 percent per year? How can physicians and patients pick the best medication in its class? How do doctors actually make their prescribing decisions, and why do those decisions sometimes go wrong? Why do so many Americans suffer preventable illnesses and deaths that proper drug use could have averted? How can the nation gain control over its escalating drug budget without resorting to rationing or draconian governmental controls? Using clinical case histories taken from his own work as a practitioner, researcher, and advocate, Dr. Avorn demonstrates the impressive power of the well-conceived prescription as well as the debacles that can result when medications are misused. He describes an innovative program that employs the pharmaceutical industry's own marketing techniques to reduce use of some of the most overprescribed and overpriced products. *Powerful Medicines* offers timely and practical advice on how the nation can improve its drug-approval process, and how patients can work with doctors to make sure their prescriptions are safe, effective, and as affordable as possible. This is a passionate and provocative call for action as well as a compelling work of clear-headed science.

Indigenism Alcida Rita Ramos, 1998 Indigenous people comprise only 0.2% of Brazil's population, yet occupy a prominent role in the nation's consciousness. In her important and passionate new book, anthropologist Alcida Ramos explains this irony, exploring Indian and non-Indian attitudes about interethnic relations. Ramos contends that imagery about indigenous people reflects an ambivalence Brazil has about itself as a nation, for Indians reveal Brazilians' contradiction between their pride in ethnic pluralism and desire for national homogeneity. Based on her more than thirty years of fieldwork and activism on behalf of the Yanomami Indians, Ramos explains the complex ideology called indigenism. She evaluates its meaning through the relations of Brazilian Indians with religious and lay institutions, non-governmental organizations, official agencies such as the National Indian Foundation as well as the very discipline of anthropology. Ramos not only examines the imagery created by Brazilians of European descent--members of the Catholic church, government officials, the army and the state agency for Indian affairs--she also scrutinizes Indians' own self portrayals used in defending their ethnic rights against the Brazilian state. Ramos' thoughtful and complete analysis of the relation between indigenous people of Brazil and the state will be of great interest to lawmakers and political theorists, environmental and civil rights activists, developmental specialists and policymakers, and those concerned with human rights in Latin America.

Death by Prescription Terence H. Young, Terence Young, 2011-11 INDUSTRY & INDUSTRIAL STUDIES. Michael Jackson and Whitney Houston get the headlines, but there are thousands of other people who suffer and die because of the wrong prescription. This is one harrowing story about a father, a family, a daughter. After fifteen years of Vanessa taking Prepidol to alleviate a stomach disorder, suddenly, unexpectedly, she collapsed and died in her family home. Confusion, grief, and remorse are channeled by Terence Young into determination to get to the root causes of his daughter's death. His investigations take him from Health Canada to the Corner's Office, from the salespeople of major drug manufacturers to the medical profession, from the legal profession to the courts.

Interim Agreement for Peace and Self-Government in Kosovo Various Authors, 2022-09-15 This is a transcript of a 1999 agreement that aimed at ending the violence in Kosovo and facilitating the return of refugees and people who were cast out. It also called for adopting a new constitution for Kosovo that respects the territorial honor of the Former Republic of Yugoslavia while establishing the principles of democratic self-government for three years until the final status of Kosovo is resolved.

Peter Hujar Paul Kasmin Gallery, 2016 It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 - filled with artists, wannabe artists and hangers-on - was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hujar's camera - and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

Marilyn Manson by Perou, 2020-05-19 'I often get asked, 'Who was your favorite person to photograph?' or 'Who is the best person you've photographed?'' says photographer Perou. 'It's always 'Marilyn Manson.' Which is just as well, considering how many times I've photographed him.' Perou has been photographing Marilyn Manson since a 1998 magazine cover shoot. Twenty-one years of collaborating have resulted in this unique book, featuring over 350

photographs including previously unpublished work, conceptual portraits, onstage and informal behind-the-scenes images, giving a rare insight into Manson's world.

Wild Cards V: Down and Dirty George R. R. Martin, Wild Cards Trust, 2015-10-27 Soon to be a show on Hulu! Rights to develop Wild Cards for TV have been acquired by Universal Cable Productions, the team that brought you The Magicians and Mr. Robot, with the co-editor of Wild Cards, Melinda Snodgrass as executive producer. Let the secret history of the world be told-of the alien virus that struck Earth after World War II, and of the handful of the survivors who found they now possessed superhuman powers. Some were called Aces, endowed with powerful mental and physical prowess. The others were Jokers, tormented by bizarre mind or body disfigurements. Some served humanity. Others caused terror. And now, forty years later, as a gang war between the Shadow Fists and the mafia rages out of control in the streets of Jokertown, Aces and Jokers go underground-to wage their own war against the powers of the netherworld. Here, in the fifth volume of the exciting series, ten of science fiction's most gifted writers take readers on a journey of wonder and excitement in an astounding alternate history. Featuring the talents of John J. Miller, Roger Zelazny, Leanne C. Harper, Arthur Byron Cover, Melina C. Snodgrass, Edward Bryant, Stephen Leigh, Pat Cadigan, Walter Jon Williams, and George R. R.
