**Micky Lee, Frank Rudy Cooper, Patricia Reeve**

**Dis/ability in Media, Law and History** Micky Lee, Frank Rudy Cooper, Patricia Reeve, 2022-06-17 This book explores how being disabled originates in the physical world, social representations and rules, and historical power relations—the interplay of which render bodies normal or not. Do parking signs that represent people in wheelchairs as self-propelling influence how we view dis/ability? How do wheelchair users understand their own bodies and an environment not built for them? By asking questions like these the authors reveal how normalization has informed people’s experiences of their bodies and their fight for substantive equality. Understanding these processes requires acknowledging the tension between social construction and embodiment as well as centering the intersection of dis/abilities with other identities, such as race, class, gender, sex orientation, citizen status, and so on. Scholars and researchers will find that this book provides new avenues for thinking about dis/ability. A wider audience will find it accessible and informative.

*Digital Disability* Gerard Goggin, Christopher Newell, 2003 Media representation of and for the disabled has been recharged in recent years with the expansion of new media worldwide. Interactive digital communications -- such as the Internet, new varieties of voice and text telephones, and digital broadcasting -- have created a need for a more innovative understanding of new media and disability issues. This engaging analysis offers a global perspective on how people with disabilities are represented as users, consumers, viewers, or listeners of new media, by policymakers, corporations, programmers, and the disabled themselves.

**Vulnerable People and Digital Inclusion** Panayiota Tsatsou, 2022-08-30 This edited collection explores the role of digital inclusion in the welfare and social inclusion of vulnerable people. With interdisciplinary contributors from six continents, working in diverse fields such as digital media studies, social computing, community informatics and cultural studies, the collection brings together theoretical and applied research evidence on three vulnerable population categories: ethnic minorities, older people and people with disabilities. Each section is accompanied by a critical commentary on the research insights presented, from third sector community and policy experts. The collection explores whether vulnerable populations face similar experiences and challenges in relation to their digital inclusion status, stressing the central presence of intersectionality, and arguing for the inclusion of the age, ethnicity/immigration status and disability aspects of one’s identity. At the same time, it argues for multi-directional action that tackles intersectional discrimination in the digital realm on behalf of more than one single population category or group. Challenging popular discourse on the overcoming of digital inequalities in the West, this essential book contends that accounts of non-western contexts do not focus on the parameter of vulnerability or on particular population groups. Disability and the Media Charles A. Riley, 2005 A journalist's passionate expose of the media's portrayal of the disabled.

**Disability Media Studies** Elizabeth Ellcessor, Bill Kirkpatrick, 2017-10-03 Introduces key ideas and offers a sense of the new frontiers and questions in the emerging field of disability media studies Disability Media Studies articulates the formation of a new field of study, based in the rich traditions of media, cultural, and disability studies. Necessarily interdisciplinary and diverse, this collection weaves together work from scholars from a variety of disciplinary homes, into a broader conversation about exploring media artifacts in relation to disability. The book provides a comprehensive overview for anyone interested in the study of disability and

media today. Case studies include familiar contemporary examples—such as Iron Man 3, Lady Gaga, and Oscar Pistorius—as well as historical media, independent disability media, reality television, and media technologies. The contributors consider disability representation, the role of media in forming cultural assumptions about ability, the construction of disability via media technologies, and how disabled audiences respond to particular media artifacts. The volume concludes with afterwords from two different perspectives on the field—one by disability scholar Rachel Adams, the other by media scholars Mara Mills and Jonathan Sterne—that reflect upon the collection, the ongoing conversations, and the future of disability media studies. *Disability Media Studies* is a crucial text for those interested in this flourishing field, and will pave the way for a greater understanding of disability media studies and its critical concepts and conversations.

**Granny @ Work** Karen E. Riggs, 2004-08-02 *Granny @ Work* is an impassioned comment on aging, work, and technology in American culture. As Riggs challenges popular assumptions with surprising research—for example, people over the age of 60 spend more time on the Internet than people of any other age group—and trenchant cultural critique, she forces us to confront the deeply entrenched ageism in today's technology-driven workplace.

**E-Government Implementation and Practice in Developing Countries** Zaigham Mahmood, 2013-05-31 This book provides research on the current actions being taken by developing countries toward the design, development, and implementation of e-government policies—Provided by publisher.

*Encyclopedia of Cyber Behavior* Yan, Zheng, 2012-03-31 This book offers a complete look into the field of cyber behavior, surveying case studies, research, frameworks, techniques, technologies, and future developments relating to the way people interact and behave online—Provided by publisher.

**Communicating COVID-19** Monique Lewis, Eliza Govender, Kate Holland, 2021-10-07 This book explores communication during the first year of the COVID-19 pandemic. Featuring the work of leading communication scholars from around the world, it offers insights and analyses into how individuals, organisations, communities, and nations have grappled with understanding and responding to the pandemic that has rocked the world. The book examines the role of journalists and news media in constructing meanings about the pandemic, with chapters focusing on public interest journalism, health workers and imagined audiences in COVID-19 news. It considers public health responses in different countries, with chapters examining community-driven approaches, communication strategies of governments and political leaders, public health advocacy, and pandemic inequalities. The role of digital media and technology is also unravelled, including social media sharing of misinformation and memetic humour, crowdsourcing initiatives, the use of data in modelling, tracking and tracing, and strategies for managing uncertainties created in a pandemic.

**Disability and New Media** Katie Ellis, Mike Kent, 2011-05-11 *Disability and New Media* examines how digital design is triggering disability when it could be a solution. Video and animation now play a prominent role in the World Wide Web and new types of protocols have been developed to accommodate this increasing complexity. However, as this has happened, the potential for individual users to control how the content is displayed has been diminished. Accessibility choices are often portrayed as merely technical decisions but they are highly political and betray a disturbing trend of ableist assumption that serve to exclude people with disability. It has been argued that the Internet will not be fully accessible until disability is considered a cultural identity in the same way that class, gender and sexuality are. Kent and Ellis build on this notion using more recent Web 2.0 phenomena, social networking sites,

virtual worlds and file sharing. Many of the studies on disability and the web have focused on the early web, prior to the development of social networking applications such as Facebook, YouTube and Second Life. This book discusses an array of such applications that have grown within and alongside Web 2.0, and analyzes how they both prevent and embrace the inclusion of people with disability.

**Global Perspectives on Digital Literature** Torsa Ghosal, 2023-06-22 *Global Perspectives on Digital Literature: A Critical Introduction for the Twenty-First Century* explores how digital literary forms shape and are shaped by aesthetic and political exchanges happening across languages and nations. The book understands global as a mode of comparative thinking and argues for considering various forms of digital literature—the popular, the avant-garde, and the participatory—as realizing and producing global thought in the twenty-first century. Attending to issues of both political and aesthetic representation, the book includes a diverse group of contributors and a wide-ranging corpus of texts, composed in a variety of languages and regions, including East and South Asia, parts of Europe, Latin America, North America, Australia, and Western Africa. The book’s contributors adopt an array of interpretive approaches to make visible new connections and possibilities engendered by cross-cultural encounters. Among other topics, they reflect on the shifting conditions for production and distribution of literature, participatory cultures and technological affordances of Web 2.0, the ever-changing dynamics of global and local forces, and fundamental questions, such as, What do we mean when we talk about literature today? and What is the future of literature?

*Disability, Media, and Representations* Jacob Johanssen, Diana Garrisi, 2020-02-27 Bringing together scholars from around the world to research the intersection between media and disability, this edited collection aims to offer an interdisciplinary exploration and critique of print, broadcast and online representations of physical and mental impairments. Drawing on a wide range of case studies addressing how people can be ‘othered’ in contemporary media, the chapters focus on analyses of hateful discourses about disability on Reddit, news coverage of disability and education, media access of individuals with disabilities, the logic of memes and brain tumour on Twitter, celebrity and Down Syndrome on Instagram, disability in TV drama, the metaphor of disability for the nation; as well as an autoethnography of treatment of breast cancer. Providing a much-needed global perspective, *Disability, Media, and Representations* examines the relationship between self-representation and representations in either reinforcing or debunking myths around disability, and ways in which academic discourse can be differently articulated to study the relationship between media and disability. This book will be of interest to students and researchers of disability studies and media studies as well as activists and readers engaged in debates on diversity, inclusivity and the media.

*The Routledge Companion to Disability and Media* Katie Ellis, Gerard Goggin, Beth Haller, Rosemary Curtis, 2019-10-31 An authoritative and indispensable guide to disability and media, this thoughtfully curated collection features varied and provocative contributions from distinguished scholars globally, alongside next-generation research leaders. Disability and media has emerged as a dynamic and exciting area of contemporary culture and social life. Media—especially digital technology—play a vital role in disability transformations, with widespread implications for global societies and how we understand communications. This book addresses this development, from representation and audience through technologies, innovations and challenges of the field. Through the varied and global perspectives of leading researchers, writers, and practitioners, including many authors with lived experience of disability, it covers a wide range of traditional, emergent and future media forms and formats. International in scope and orientation, *The Routledge Companion to Disability and Media* offers students and scholars alike a comprehensive survey of the intersections between

disability studies and media studies This book is available as an accessible eBook. For more information, please visit <https://taylorandfrancis.com/about/corporate-responsibility/accessibility-at-taylor-francis/>.

**Digital Youth with Disabilities** Meryl Alper,2014-11-07 An examination of media and technology use by school-aged youth with disabilities, with an emphasis on media use at home. Most research on media use by young people with disabilities focuses on the therapeutic and rehabilitative uses of technology; less attention has been paid to their day-to-day encounters with media and technology—the mundane, sometimes pleasurable and sometimes frustrating experiences of “hanging out, messing around, and geeking out.” In this report, Meryl Alper attempts to repair this omission, examining how school-aged children with disabilities use media for social and recreational purposes, with a focus on media use at home. In doing so, she reframes common assumptions about the relationship between young people with disabilities and technology, and she points to areas for further study into the role of new media in the lives of these young people, their parents, and their caregivers. Alper considers the notion of “screen time” and its inapplicability in certain cases—when, for example, an iPad is a child's primary mode of communication. She looks at how young people with various disabilities use media to socialize with caregivers, siblings, and friends, looking more closely at the stereotype of the socially isolated young person with disabilities. And she examines issues encountered by parents in selecting, purchasing, and managing media for youth with such specific disabilities as ADHD and autism. She considers not only children's individual preferences and needs but also external factors, including the limits of existing platforms, content, and age standards.

**The Palgrave Handbook of Disability and Citizenship in the Global South** Brian Watermeyer, Judith McKenzie, Leslie Swartz,2018-08-11 This handbook questions, debates and subverts commonly held assumptions about disability and citizenship in the global postcolonial context. Discourses of citizenship and human rights, so elemental to strategies for addressing disability-based inequality in wealthier nations, have vastly different ramifications in societies of the Global South, where resources for development are limited, democratic processes may be uncertain, and access to education, health, transport and other key services cannot be taken for granted. In a broad range of areas relevant to disability equity and transformation, an eclectic group of contributors critically consider whether, when and how citizenship may be used as a lever of change in circumstances far removed from UN boardrooms in New York or Geneva. Debate is polyvocal, with voices from the South engaging with those from the North, disabled people with nondisabled, and activists and politicians intersecting with researchers and theoreticians. Along the way, accepted wisdoms on a host of issues in disability and international development are enriched and problematized. The volume explores what life for disabled people in low and middle income countries tells us about subjects such as identity and intersectionality, labour and the global market, family life and intimate relationships, migration, climate change, access to the digital world, participation in sport and the performing arts, and much else.

**Social Inclusion of People with Disabilities** Arie Rimmerman,2013 Social inclusion is often used interchangeably with the terms social cohesion, social integration, and social participation, positioning social exclusion as the opposite. This book provides a thorough conceptual review and search for domestic and international perspectives of social inclusion and disability. It highlights and responds to core questions related to social inclusion of people with disabilities nationally and internationally.

**Young Children's Rights in a Digital World** Donell Holloway, Michele Willson, Karen Murcia, Catherine Archer, Francesca Stocco,2021-08-19 This volume focuses on very young children's (aged 0-8) rights in a digital world. It gathers current research from

around the globe that focuses on young children's rights as agential citizens to the provision of and participation in digital devices and content—as well as their right to protection from harm. The UN Digital Rights Framework of 2014 addresses children's needs, agency and vulnerability to harm in today's digital world and implies roles and responsibilities for a variety of social actors including the state, families, schools, commercial entities, researchers and children themselves. This volume presents a broad range of research, including chapters on parental supervision and control, the changing forms of play, early childhood education, media and cultural studies, law, design, health, special-needs education, and engineering. Implicit within this book is the acknowledgement that children of various ages, abilities, socioeconomic and geographic backgrounds should have equal access to, and positive / non-harmful experiences with, new digital technologies and content—as well as adult support and expertise that enhances these experiences. This passionate book celebrates the diversity of young children's activities in the digital world. It interrogates these through four intersecting lenses: their rights, play experiences, contextualised design, and best practice. Balancing children's eager engagement with digital content alongside adult responsibilities for education, privacy and protection, the volume provides a fitting showcase for work of global relevance. Professor Lelia Green Professor of Communications Edith Cowan University Perth, Western Australia This compelling text provides a critical resource to inform our understanding of the intersection of the digital world and children's rights. Ilene R. Berson, Ph.D. Professor of Early Childhood Education Affiliate Faculty, Learning Design & Technology Area Coordinator, Early Childhood Coordinator, Early Childhood Ph.D. Program University of South Florida College of Education A truly international collection that investigates young children's engagement with digital technologies. Identifying issues of public interest around digital practices, this highly readable book is a valuable resource for researchers, parents and policy makers. Professor Susan Danby Director, ARC Centre of Excellence for the Digital Child and, Faculty of Education School of Early Childhood and Inclusive Education QUT Kelvin Grove, Queensland

Media, Margins and Civic Agency Heather Savigny, Einar Thorsen, Daniel Jackson, Jenny Alexander, 2015-08-31 This collection brings together new research on contemporary media, politics and power. It explores ways and means through which media can and do empower or dis-empower citizens at the margins that is, how they act as vehicles of, or obstacles to, civic agency and social change.

Disability, the Media and the Paralympic Games Carolyn Jackson-Brown, 2020-06-04 This book focuses on the ground-breaking coverage of the London 2012 Paralympic Games by the UK's publicly owned but commercially funded Channel 4 network, coverage which seemed to deliver a transformational shift in attitudes towards people with disabilities. It sheds important new light on our understanding of media production and its complex interactions with sport and wider society. Drawing on political economy and cultural studies, the book explores why and how a marginalised group was brought into the mainstream by the media, and the key influencing factors and decision-making processes. Featuring interviews with key people involved in the television and digital production structures, as well as organisational archives, it helps us to understand the interplay between creativity and commerce, between editorial and marketing workflows, and about the making of meaning. The book also looks at coverage of the Rio Paralympics, and ahead to the Tokyo Games, and at changing global perceptions of disability through sport. This is fascinating reading for any advanced students, researchers, or sport management or media professionals looking to better understand the media production process or the significance of sport and disability in wider society.
