Grid and Cooperative Computing Minglu Li,Xian-He Sun,Qianni Deng,Jun Ni,2004-04-19 Grid and cooperative computing has emerged as a new frontier of information technology. It aims to share and coordinate distributed and heterogeneous network resources for better performance and functionality that can otherwise not be achieved. This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing, GCC 2003, which was held in Shanghai, P.R. China, during December 7–10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and users in grid computing, web services and cooperative computing, including theory and applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, significance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The organizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers). The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Australia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.

Management of Natural Disasters S. Syngellakis,2016-12-12 Comprising a selection of articles dedicated to disaster management this volume focuses on the challenges arising from extreme natural phenomena and descriptions of methods for assessing their occurrence probability and of measures for mitigating their intensity and detrimental effects. The first group of articles describes general strategies for risk assessment and mitigation, providing examples in the context of various kinds of natural disasters. The economic impact of mitigation measures, communities' differing coping capabilities, human attitudes towards relocation and possible links to climate change are among the topics considered. Natural strategies are outlined in the contexts of Turkey, Brazil and United Arab Emirates. The second part of the book is concerned with disasters from specific natural causes starting with a group of ten articles on floods. The corresponding contributions address flood frequency, vulnerability and resilience of communities, response of small and medium enterprises, risk in terms of financial losses, private investment participation to mitigation measures, assessment of design solutions against flood hazard, sleeper dykes as a means of reducing risk, preparedness of hospitals, causes of highway flooding and their relative importance, and impact of floods on poor communities. The third set of articles are related to earthquake-related hazards describing, in particular, an analysis tool providing integrated risk, coping capacity and management output, a method for assessing vulnerability considering key contributing factors, a technique for urban aftershock management and damage assessment, and neural network modelling to estimate tsunami damage. Finally, a group of three articles address issues related to landslides, namely, slope management as a means of reducing risk and losses, early warning based on rainfall data, and hazard prediction using favourability function modelling and spatial target mapping software. Providing a unique global perspective this volume focuses on recent developments over a wide range of topics that cannot be found in similar, currently available, publications in this field. This is a valuable addition to the relevant literature available to researchers and engineers working on risk assessment and mitigation of natural disaster intensity and consequences. It will appeal of those working in academic and research environments as well as governmental, professional, national and international organisations.

Montague Grammar Barbara H Partee,2014-05-10 Montague Grammar is a collection of papers that discusses Richard Montague's work on the syntax and semantics of natural languages. The papers examine the applications of Montague's theory to problems of syntax and semantics, and compares Montague's approach to other theories of language. One paper describes the features in Montague's The Proper Treatment of Quantification in Ordinary English (PTQ), namely, the grammatical categories and lexicon, the rules most similar to CF-rules, and the treatment of quantification. Another paper presents mechanisms to Montague's grammatical framework which will allow a variety of English constructions—especially those involving sentence embedding. The paper discusses syntactic rules, such as noun phrases, verb phrases, subject-predicate sentences, variable binding, abstracts, verbs taking infinitive complements, the copula, participles. One paper describes a fragment of English that is a variation and extension of the fragment presented in Montague. It also analyses adjectival phrases, three-place and other kinds of verbs, the passive voice, reflexive pronouns, and sentences using the dummy subject it. Another paper proposes rules, syntactics, and semantics for use in nonrestrictive clauses in a Montague grammar. One paper analyzes factives, their semantic and syntactic properties using the work of Kiparsky and Kiparsky (1971). Montague's Universal Grammar (UG) invokes expositions of Montague syntax, Cooper syntax, theorems on conversion process, semantic interpretation, semantic equivalence of the two systems, and interpretive semantics. The collection is intended for readers of Montague, as well as for linguists, philosophers, and students of language.

The Routledge Handbook of Development and Environment Brent McCusker,Waquar Ahmed,Maano Ramutsindela,Patricia Solís,2021-11-29 The handbook seeks to illuminate the key concepts in the study of development-environment through showcasing some of the Majoritarian (formerly Developing) world's scholars in order to explore theoretical connections through critical/radical theory, "small" theory, various conceptual frameworks, and non-Western and subaltern viewpoints. The volume examines the themes around the study of the relationship between economic and social development and the environment. Part 1 covers theoretical and conceptual approaches to the study of development and environment by examining the diverse ways in which people perceive, understand, and act upon the world around them. Cross-scalar topics such

as neo-liberalism and globalization, human rights, climate change, sustainability, and technology are covered in Part 2. The book shifts to examinations of resources and production in Part 3, where authors with a focus on one or more environmental resources or types of economic production are presented. Topics range from water, agriculture, and food, to energy, bioeconomy, and mining. The fourth section presents chapters where people are at the center of the development-environment nexus through topics such as gender relations, children, health, and cities. Finally, policy and governance of development and environment are explored in Part 5. The section includes both academics and practitioners who have worked with policy makers and are policy makers themselves. The book is primarily intended for scholars and graduate students in geography, environmental studies, and development studies for whom it will provide an invaluable and up-to-date guide to current thinking across the range of disciplines, which converge in the study of development and environment.

Thanks to the local organizers for working hard on arranging the conference — with the hard work they put in, it was a great success. Thanks to Sophia Drossopoulou for her dedicated work as PC Chair in assembling a ?ne scienti?c program including forward-looking keynotes, and for her e?orts to reduce the environmental impact of the PC meeting by replacing a physical meeting with a virtual meeting. I would also like to thank James Noble for taking the time and e?ort to write up last year’s banquet speech so that it could be included in this year’s proceedings. One of the strong features of ECOOP is the two days of workshops preceding the main conference that allows intense interaction between participants. Thanks to all workshop organizers. Last year’s successful summer school tutorials were followed up this year with seven interesting tutorials. Thanks to the organizers and speakers. This year’s Dahl-Nygaard award honored yet another pioneer in the ?eld, namely, David Ungar for his contributions including Self. I appreciate his e?orts in providing us with an excellent award talk. The world is changing and so is ECOOP. Please contemplate my short note on the following pages entitled On Future Trends for ECOOP.

Geografía ambiental en Boyacá Jorge Vicente Ruiz Linares,Adriana Palacios Manrique,Fabián Guzmán Patiño,2023-06-07 El presente libro consta de cuatro capítulos que abordan la dinámica boscosa y sus conductores, la función de las áreas protegidas en la conservación de los bosques y, finalmente, el deshielo glaciar en el departamento de Boyacá. La dinámica boscosa y sus conductores se estudian inicialmente para 2001-2010 con un sensor de teledetección de resolución espacial grueso como lo es el MODIS. En el Capítulo 2 se estudia tan solo la variación boscosa entre 2009-2015, pero con un sensor de mediana resolución espacial como LANDSAT, además se calculan algunas métricas de ecología del paisaje. Para sorpresa de muchos, Boyacá presentó una ganancia boscosa superior a la deforestación para ambos periodos, aunque en la última ventana de observación esta ganancia boscosa se desaceleró. En el capítulo 3 se examina cuál ha sido el papel de las áreas protegidas a todo nivel, desde las reservas de la sociedad civil, parques municipales y regionales, hasta las áreas protegidas nacionales en el concierto de la protección de la cobertura boscosa. Los resultados son indicativos de ganancia boscosa en todas las ecorregiones presentes en el departamento. Las áreas protegidas nacionales y las reservas de la sociedad civil contribuyeron a conservar la cobertura boscosa, pero no así las áreas protegidas municipales y regionales. Adicionalmente, hubo un aumento de las áreas protegidas a nivel regional y local, que generó una reducción de presión en la cobertura boscosa en los términos de medición del Índice de Riesgo de Conservación de Bosques. El Capítulo 4 estudia el deshielo de la Sierra Nevada del Cocuy y estima que este glaciar, el más grande de Colombia, se extinguirá en su totalidad para mediados del presente siglo si la actual tendencia continúa.

Integrated Risk and Vulnerability Management Assisted by Decision Support Systems A.V. Gheorghe,2008-09-30 Introduction This book includes terms of reference and offers an augmented volume of relevant work initiated within the comprehensive concept of “Knowledge Management and Risk Governance”. The latter stood for the initial title of an ad-hoc meeting held in Ascona, Switzerland, organized by the Technological Risk Management Unit of the Joint Research Centre of the European Commission (JRC) and the KOVERS Centre of Excellence in Risk and Safety Sciences of the Swiss Federal Institute of Technology, ETH Zurich.

Background Risk governance, in addition to the continuous interest of researchers, has recently attracted the attention of policy-makers and the media and the concern of the public. New and emerging risks in various fields and a number of risk-related issues increased the public interest and prompted for a new framework in dealing with risks. The Conference on Science and Governance organized by the European Commission in October 2000 is one of the international forums addressing this issue. Other recent events such as the establishment of the International Risk Governance Council outline the importance of the governance concept in relation to that of risk management (see www.irgc.org). At the same time noticeable progress has been made in Information Technologies and Decision Support, passing from the process of information PREFACE xvi to the process of knowledge. In this context new tools and methods became available, whose application in risk management may be beneficial.

Growth Alternatives Of The Japanese Economy: Structure And Simulations Of Dynamic Econometric Model With Input-output System (Demios) Shuntaro Shishido,Osamu Nakamura,2019-02-27 The book describes the structure of the Keynes-Leontief Model (KLM) of Japan and discusses how the Japanese economy can overcome the long-term economic deflation that has taken place since the mid-1990s. The large-scale econometric model and its analysis have been important for planning several policy measures and examining the economic structure of a country. However, it seems that the development and maintenance of the KLM would be very costly. The book discusses how the KLM is developed and employed for the policy analyses.

Road Map to Developing a Regional Risk Transfer Facility for CAREC Asian Development Bank,2023-11-01 The Central Asia Regional Economic Cooperation (CAREC) region is highly exposed to natural hazards, particularly earthquakes and floods, and the adverse economic impacts of climate change. A regional disaster risk transfer facility could help CAREC countries diversify risk, reduce costs, increase access to international insurance and capital markets, and coordinate risk analysis and modeling. This report draws on lessons from other regions to explore opportunities and options for developing a CAREC Risk Facility. It suggests next steps in establishing a facility and considers the role of stakeholders including the Asian Development Bank.

El turismo en Santander Amado Guerrero, Carlos Ramírez, Yurley Rojas, 2022-11-10 La expansión y el desarrollo que el sector turístico ha experimentado en las últimas décadas lo han convertido en uno de los principales pilares sobre los cuales se ha sustentado la economía en el ámbito mundial. De hecho, es uno de los pocos sectores que ha crecido en medio de la crisis de la última década, lo que ha permitido un mejor posicionamiento de algunas economías en el contexto internacional (OMT, 2016). Sin embargo, estudios recientes han llamado la atención en que el turismo no ha logrado cumplir cabalmente con los propósitos inicialmente señalados. Frente a estas críticas, no es de extrañar entonces que, desde finales de la década de los ochenta del siglo pasado, se halla iniciado una profunda reflexión sobre la búsqueda de un modelo de desarrollo más equilibrado. Incluso la conceptualización del desarrollo ha sido modificada para incorporar cada vez más los aspectos sociales, el bienestar y las oportunidades de sus miembros, es decir, el concepto de desarrollo humano como fin último del desarrollo. Es en este marco contextual que se ha centrado el análisis del turismo en el caso de Santander y que se expone en los diferentes capítulos de este libro. Consideramos que este análisis ofrece los argumentos necesarios para inducir a una reflexión profunda en todos los actores públicos y privados involucrados en el desarrollo del sector turismo. De esta forma, el libro apuesta por cumplir con la promesa de hacer del turismo un motor de desarrollo económico para el conjunto de la sociedad santandereana; un sector que contribuya a elevar en forma equitativa y sostenible la calidad de vida de todos los habitantes de este territorio.
