Rufus Butler Seder

Jungle Dan Kainen, Kathy Wollard, 2016-09-06 Trek into the wild heart of the rain forest. Discover a world teeming with life. Dense and humid and filled with secrets, rain forests are home to more than half the world's plants and animals. Using unique Photicular technology, *Jungle* parts the mysterious veil of this sun-dappled land, revealing in color and motion the living exuberance within. Watch a tarantula scuttle across the forest floor. A dancing whipsnake flick its tongue. A Bengal tiger on the prowl, and a brilliant red-and-green macaw soar above the canopy. Experience it for yourself.

Safari Dan Kainen, Carol Kaufmann, 2012-10-16 A New York Times bestseller, *Safari* is a magical journey for the whole family. Readers, as if on African safari, encounter eight wild animals that come alive using never-before-seen Photicular technology. Each full-color image is like a 3-D movie on the page, delivering a rich, fluid, immersive visual experience. The result is breathtaking. The cheetah bounds. The gazelle leaps. The African elephant snaps its ears. The gorilla munches the leaves off a branch. It's mesmerizing, as visually immediate as a National Geographic or Animal Planet special. Accompanying the images is *Safari*, the guide: It begins with an evocative journal of a safari along the Mara River in Kenya and interweaves the history of safaris. Then for each animal there is a lively, informative essay and an at-a-glance list of important facts. It's the romance of being on safari—and the thrill of seeing the animals in motion—in a book unlike any other.

Ocean Dan Kainen, Carol Kaufmann, 2014-10-01 Offers informative essays and factual statistics on eight distinctive marine animals, each accompanied by video-like Photicular illustrations, as well as an introductory piece chronicling a journey on a submersible.

Polar Dan Kainen, Carol Kaufmann, 2015-10-06 Take a stunning journey to the ends of the earth through the colorful,

fluid motion of Photicular® technology. A phenomenon first seen in the bestsellers *Safari* and *Ocean*, Photicular technology uses sliding lenses and video imagery to display realistic living motion in the pages of a book. It's like a movie in your hand. Penguins waddle in their irresistibly happy way. A walrus lumbers across the snowy landscape. There's a polar bear with her lively cubs. A beluga whale, breaching. A team of sled dogs sprinting directly at the viewer. And the miracle of the Northern Lights, shimmering like a silk rainbow through the star-filled night. National Geographic writer Carol Kaufmann brings the reader along on a voyage to the North and South Poles, and writes a lively and informative essay for each image, including vital statistics for each animal, such as their size, range, habitat, and more.

The Wonder Garden Jenny Broom, 2015-09-03 Open the gates of the Wonder Garden to explore five of Earth's most extraordinary habitats, each filled with incredible creatures and epic scenery. Trek through the Amazon Rainforest, travel to the Chihuahuan Desert, dive in the Great Barrier Reef, delve deep into the Black Forest and stand on the roof of the world - the Himalayan Mountains - to see nature at its wildest. Breathtaking, engraved illustrations bring to life Earth's spectacular Wonder Garden.

Dinosaur Dan Kainen, Kathy Wollard, 2018-09-04 Journey a hundred million years back in time, and see 8 amazing dinosaurs in motion. A New York Times bestseller! Using unique Photicular® technology that's like a 3-D movie on the page, *DINOSAUR* brings these legendary, long-extinct creatures to life. Each image delivers a rich, immersive visual experience—and the result is breathtaking. There's a herd of giant sauroposeidons, with their impossibly long necks, lumbering across the sun-drenched plains, a threatened velociraptor waving its wildly feathered arms, and more. Flipping through these pages is transports readers to Earth's distant past. With informative text by science writer Kathy Wollard, it's like a natural history

museum but better—experience it for yourself!

Wild Dan Kainen, Kathy Wollard, 2017-09-05 Come face to face with our vanishing wildlife. Using unique Photicular technology, Wild brings to vivid life the animals who are under threat of extinction. It turns abstract numbers and names into touching and unforgettable images. From the cover panda, lazily munching on leaves, to an albatross swooping its magnificent wings, to the hovering bumblebee, among the most critical of threatened animals in terms of its effect on the global food supply, Wild captures eight endangered animals in living motion. We see gorillas at play, a rhinoceros and its baby trotting across the savanna, a pangolin skittering along the landscape, an elephant bathing in a river. An opening essay explores the environmental and economic threats to animal populations and how conservationists are working to slow—and when they can, reverse—the damage. Profiles of each animal accompany the images. Wild joins four other books in the Photicular series—Safari, Ocean, Polar, and Jungle.

Outback Dan Kainen, Ella Morton, 2019-10-01 Embark on an eye-opening adventure in the land Down Under, and see eight creatures in astounding motion. From the New York Times bestselling series. Using Photicular® technology that's like a 3-D movie on the page, OUTBACK whisks you to the vast, remote world of wild Australia, where heat waves dance forever and animals, isolated by the vagaries of continental drift, are unlike those found anywhere else on Earth. Each moving image delivers a rich, immersive visual experience—and the result is breathtaking. The kangaroo hops. A wombat waddles. The frilled lizard races on two legs across the desert floor. A peacock spider dances and shows off its vibrant colors. Experience it for yourself!

Star Wars: A Scanimation Book Rufus Butler Seder, 2010-05-12 Imagine: the first Star Wars book that actually moves, bringing to life the most memorable scenes from the epic: Obi-Wan battles Darth Maul The Millennium Falcon zooms away

from an exploding Death Star Luke rides a galloping Tauntaun, Yoda twirls his green lightsaber, Boba Fett blasts up, up and away! And of course the most memorable scene of all—red and blue lightsabers flashing, Luke and Darth Vader fight the ultimate battle between good and evil. It's a marriage made in a galaxy far, far away: phenomenal Scanimation meets Star Wars, the enduring epic that's sold \$42 billion in ticket sales and earned the title #1 Boys Action Toy License of all time. Created by Rufus Butler Seder, *Star Wars: A Scanimation Book* presents 12 of the most memorable scenes, in a landscape, i.e., movie format. It's an homage from an artist obsessed with the earliest forms of capturing visual motion to an artist obsessed with the most advanced. But that's not what young fans will care about—this is having pure movie magic in the palm of your hand, to replay again and again.

The Lay of the Land Joe Greer, 2022-05-10 A spiritually uplifting and beautiful designed visual memoir by the hugely popular photographer on Instagram, Joe Greer, combining thoughtful essays and more than 100 gorgeous landscape photos—half fan favorites, and half never-before-seen. “Each photograph really does come down to a split second when you decide to freeze that moment in time. . . . You ask yourself what the story is that you want to tell, and let the rest unfold: Click.”—from the introduction Joe Greer never imagined he would become a photographer. Raised in Florida by an aunt and uncle after his mother's death when he was four, Joe had a seemingly normal childhood, spending summers at church camp and dreaming of going to college. But nearly fifteen years later, the ground shifted beneath his feet when he discovered a family secret that would impact the rest of his life. Trying to make sense of that revelation and what it meant for his future, Greer set his sights on becoming a pastor at Spokane's Moody Bible Institute. There, he discovered Instagram—and a passion for photography. His pictures of the lush, wild beauty of the Pacific Northwest

landscape attracted a large following that has grown to more than three quarters of a millions fans and continues to expand. The Lay of the Land is Joe's story in words and pictures. In this stunning compendium, he reflects on the trauma of his early life and what photography has taught him: how to find his light; how to slow down; how to appreciate the world around him, a reverence for the nature world that that both nurtures and amplifies his creativity and faith; how to love—his photography led him to his wife, Madison—and how to heal. For Joe, photography has been a way to find purpose, better understand his faith, and express himself. Though he began with landscapes, meeting his wife sparked a new love of portraiture, and he turned to making photos of street scenes that explored his complicated feelings about family. A love letter to the natural world, to faith, and to finding your calling in the most unexpected places, The Lay of the Land is a window into the beautiful mind and heart of one of the internet's favorite photographers. Moving and inspiring, it is a creative and spiritual journey that offers lessons on life and living. As Greer reminds us all, whatever it is you want, it's up to you to make the moment (and the photograph).

How to Be a Conscious Eater Sophie Egan, 2020-03-17 A radically practical guide to making food choices that are good for you, others, and the planet. Is organic really worth it? Are eggs ok to eat? If so, which ones are best for you, and for the chicken—Cage-Free, Free-Range, Pasture-Raised? What about farmed salmon, soy milk, sugar, gluten, fermented foods, coconut oil, almonds? Thumbs-up, thumbs-down, or somewhere in between? Using three criteria—Is it good for me? Is it good for others? Is it good for the planet?—Sophie Egan helps us navigate the bewildering world of food so that we can all become conscious eaters. To eat consciously is not about diets, fads, or hard-and-fast rules. It's about having straightforward, accurate information to make smart, thoughtful choices amid the chaos of conflicting news and marketing hype. An expert on food's impact on human

and environmental health, Egan organizes the book into four categories—stuff that comes from the ground, stuff that comes from animals, stuff that comes from factories, and stuff that’s made in restaurant kitchens. This practical guide offers bottom-line answers to your most top-of-mind questions about what to eat. “The clearest, most useful food book I own.”—A. J. Jacobs, New York Times bestselling author

Panda Love, 2018-06-05 Panda Love is a collection of incredible images of these gentle giants. Ami Vitale's stunning photographs, taken on location in China, document the efforts to breed pandas and release them back into the wild. Ami was given unprecedented access to the pandas and her photos give an amazing insight into the bears' lives in both the sanctuaries and their natural habitat. Fluffy panda cubs tumble out of baskets and play hide-and-seek with their carers, while the adult pandas curiously explore the forest and climb trees. The giant panda is everyone's favorite bamboo-munching bear. China may be on its way to successfully saving its most famous ambassador, and Panda Love lovingly documents the process of putting the wild back into an icon.
