Lucien F. Trueb

Astonishing the Wild Pigs Lucien F. Trueb, 2015-02-17 A hydraulic machine for astonishing wild pigs was one of the many technological highlights the author encountered in the course of his career as a research scientist and science writer. Writing a book about them, never taking more (or less) than two printed pages for each of 146 subjects was a very special challenge. The book covers fundamentally important achievements of technology that directly impacted mankind or even profoundly changed it. Many of those highlights are quite new, at least one of them (power generation by nuclear fusion) is not available yet. But particularly ingenious things dating way back were also included, as they are the base of our technical civilization. Good examples are ceramics as well as copper, bronze and iron; whole periods of history have been named for the latter three. The analog computer of Antikythera used for stellar navigation was made some 2100 years ago, gunpowder was used in China as early as 1044 A.D., the astronomical clock in the Strasburg cathedral was built in the 19th century. On the other hand, Theodor W. Hänsch and John L. Hall were granted a Nobel Prize in 2005 for a discovery that brought us extremely accurate optical clocks. And the Smartphone was a 2007 breakthrough; hundreds of millions of them have been sold since then. The basic concept of describing and explaining major technological highlights to non-scientists with just 800 words was inspired by the column Inventions - fifty years later in the Swiss daily *Neue Zürcher Zeitung* (NZZ), to which the author contributed on a regular base since 2007. The column was later renamed Achievements of Technology - no more time limits. Many of the book-chapters were taken from those sources, updated, edited and translated into English. Other sources were articles the author wrote for various newspapers and magazines. However, many highlights of technology were researched and written specifically for this book. Reading it is both fun and highly instructive.

KRINK New York City Craig Costello, 2020-04-07 Craig Costello, aka KR, grew up in Queens, New York, where graffiti was part of the landscape and a symbol of the city. While living in San Francisco, he quickly garnered attention when his signature KR tag popped up throughout the city. As he became one of the more prominent figures on the streets on NYC and San Francisco, he began to hone his craft by creating better tools launching his own line of homemade markers and mops, combining his moniker KR with the word INK. In KRINK: GRAFFITI, ART, AND INVENTION,

Costello has compiled a visual memoir: from his early days of the '80s and '90s and launch with the hip New York City retailer Alife, which put his brand on the map, to his evolution as an artist and high-fashion collaborator. The book showcases Costello's seminal style and his extensive body of work, including site specific installations around the world. It also chronicles his myriad collaborations with Alife, Nike, Coach, Moncler, Modernica, Marc Jacobs, Levi Strauss & Co., Mini (BMW), Casio, Smith Optics, Carhartt, Kidrobot, Medicom Toy, agnès b., and Colette, among many others. Today, Costello's reach and influence goes far beyond urban street culture. Krink has grown exponentially into a global artist materials brand with expanding collections of apparel, tools, and accessories, while Costello's unique aesthetic can be seen on objects from sneakers to luxury goods to cars. KRINK is both stylish and informative, capturing the ethos of punk and hip-hop culture, and is sure to appeal to the fans of high/low cultural crossovers, as well as die-hard fans of street art and fashion.

Climate Shock Gernot Wagner, Martin L. Weitzman, 2016-04-19 How knowing the extreme risks of climate change can help us prepare for an uncertain future If you had a 10 percent chance of having a fatal car accident, you'd take necessary precautions. If your finances had a 10 percent chance of suffering a severe loss, you'd reevaluate your assets. So if we know the world is warming and there's a 10 percent chance this might eventually lead to a catastrophe beyond anything we could imagine, why aren't we doing more about climate change right now? We insure our lives against an uncertain future—why not our planet? In *Climate Shock*, Gernot Wagner and Martin Weitzman explore in lively, clear terms the likely repercussions of a hotter planet, drawing on and expanding from work previously unavailable to general audiences. They show that the longer we wait to act, the more likely an extreme event will happen. A city might go underwater. A rogue nation might shoot particles into the Earth's atmosphere, geoengineering cooler temperatures. Zeroing in on the unknown extreme risks that may yet dwarf all else, the authors look at how economic forces that make sensible climate policies difficult to enact, make radical would-be fixes like geoengineering all the more probable. What we know about climate change is alarming enough. What we don't know about the extreme risks could be far more dangerous. Wagner and Weitzman help readers understand that we need to think about climate change in the same way that we think about insurance—as a risk management problem, only here on a global scale. With a new preface addressing recent developments Wagner and Weitzman demonstrate that climate change can and should be dealt with—and what could happen if we don't do so—tackling the defining environmental and public policy issue of our time.

Retro Watches Josh Sims, Mitch Greenblatt, 2020-06-23 A popular collector's guide to discovering the world of unusual, rare, and dazzlingly retro watches. What you wear on your wrist can be more than merely functional. Eschewing the common categories of the "classics," the ostentatiously high-priced, and the "blingy," this book brings together individualist pieces that few have seen and even fewer own. *Retro Watches* is a collector's guide for those who want to make a statement with the watch they wear, but who are looking for something a little different. It collects the most intriguing, visually striking, and out-there watch designs from little-known but influential watch brands, along with overlooked but brilliant pieces from the major players. Over one hundred watch models are featured, specially photographed for the book and accompanied by accessible, informative texts discussing the watch's design, history, and intriguing features, as well as info panels detailing rarity, value, and other key attributes. Additional breakout spreads dive into the cultural and fashion history of watch design and the many innovations of the '60s, '70s, and '80s. Beautifully presented, *Retro Watches* is the volume for the watch wearer who wants to stand out from the crowd.

Of Bananas and Hard-Boiled Eggs Mary Lou Codman-Wilson Ph. D., Mary Lou Codman-Wilson, 2012-02-29 America as a nation is arguably the most pluralistic nation of the twenty-first century. It is common to hear many different languages in the schools, shopping centers, airports, or neighborhoods in the United States. ESL classes help people of these different language groups learn how to communicate in English, so it is only natural that an ESL curriculum addresses topics relevant to a person's journey toward biculturalism. The goal of this advanced English conversation curriculum is to help ESL learners mainstream into the dominant culture and develop a comfortable bicultural identity. That way, they can be at home in both their culture of origin and their new foreign culture. The expectation is that through English conversation practice and discussion of topics relevant to them, learners will develop the confidence to move outside the cocoon of their own language group. They can then interact successfully in English in the daily routines of life because they understand English and can be understood by English-speaking people. The content is developed from real-life stories, written by a team including ESL learners about issues they have experienced in learning how to live successfully in the United States. Since the curriculum is discussion-based, it gives the learners the opportunity to discuss their feelings and to support one another in their cultural adjustment.

Sometimes I Lie Alice Feeney, 2018-03-13 My name is Amber Reynolds. There are three things you should know about me: 1. I'm in a coma. 2. My husband doesn't love me anymore. 3. Sometimes I lie. Amber wakes up in a hospital. She can't move. She can't speak. She can't open her eyes. She can hear everyone around her, but they have no idea. Amber doesn't remember what happened, but she has a suspicion her husband had something to do with it. Alternating between her paralyzed present, the week before her accident, and a series of childhood diaries from twenty years ago, this brilliant psychological thriller asks: Is something really a lie if you believe it's the truth?
