**Life in a Pond (eBook)** Ilene L. Follman,1997-09-01 The information contained in this resource and activity book enhances children's knowledge and awareness of the living and non-living components of a pond, including the variety of life forms that can be found living on, under, and around the surface of a pond. Through observation and investigation, children will discover similarities, differences, and interactions among living things that inhabit a pond. Activities that emphasize plant and animal adaptations, interdependence, and food chains enable students to learn more about how living things survive in a still, freshwater ecosystem. Four transparencies (print books) or PowerPoint slides (eBooks) are included to engage students in discussion and reinforce the concepts presented in the book.

**Teaching Science with Favorite Picture Books** Ann Flagg,Teri Ory,Mary Ory,2002-02 Explains how to use fifteen science-based picture books to teach students in grades one through three the basic fundamentals of science; includes reproducibles and easy activities.

Through 15 mystery stories, this book memorably illustrates science concepts for students and reinforces the value of learning science through inquiry. Each mystery presents opportunities for students to create questions, form hypotheses, test their ideas, and come up with explanations. Focused on concepts such as periodic motion, thermodynamics, temperature and energy, and sound and sound transmission, these mysteries draw students into the stories by grounding them in experiences students are familiar with, providing them with a foundation for classroom discussion and inquiry.
