Amazons of the Huk Rebellion Vina A. Lanzona,2009-04-22 Labeled “Amazons” by the national press, women played a central role in the Huk rebellion, one of the most significant peasant-based revolutions in modern Philippine history. As spies, organizers, nurses, couriers, soldiers, and even military commanders, women worked closely with men to resist first Japanese occupation and later, after WWII, to challenge the new Philippine republic. But in the midst of the uncertainty and violence of rebellion, these women also pursued personal lives, falling in love, becoming pregnant, and raising families, often with their male comrades-in-arms. Drawing on interviews with over one hundred veterans of the movement, Vina A. Lanzona explores the Huk rebellion from the intimate and collective experiences of its female participants, demonstrating how their presence, and the complex questions of gender, family, and sexuality they provoked, ultimately shaped the nature of the revolutionary struggle. An Historical Geography of Tourism in Victoria, Australia Ian Clark,2014-01-01 A Historical Geography of Tourism in Victoria, Australia – Case studies is concerned with the emergence of tourism in colonial Victoria, Australia. It explores a fundamental set of questions: how does a tourist site come in to being? How does a tourist gaze emerge in a ‘settler society’? How does an ‘era of discovery’ segue into ‘tourism’? And, how was the tourist map of Victoria created by settler colonists? Through the application of the classical models of MacCannell, Butler, and Gunn to construct the history of tourism at eight case studies, this work shows that Victoria’s tourism landscape is dynamic and constantly changing. There are many other significant natural and cultural attractions in Victoria and much more research needs to be undertaken to understand more fully the evolution of Victoria’s tourism landscape.

Bibliography of Art and Architecture in the Islamic World (2 Vol. Set) Susan Sinclair,C. H. Bleaney,Pablo García Suárez,2012 Following the tradition and style of the acclaimed Index Islamicus, the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and, in many cases, annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. The editors have ensured that material from a wide range of scholarly traditions and approaches has been consulted in order to make this comprehensive bibliography an indispensable tool for everyone

involved in the study of material culture in Muslim societies.

Integrative Addiction and Recovery Shahla Modir, George Munoz, 2018-11-13 Integrative Addiction and Recovery offers an authentic model of comprehensive integrative modalities germane and specific to the field of addiction and recovery treatment. Although many treatment services for addiction include holistic, alternative, or integrative in their descriptions, they contain no substantive programs or services consistent with the mind, body, spirit paradigm contained within the integrative approach to health and healing. Consequently, many patients do not have the opportunity to benefit from the true spirit of an integrative approach within the discipline of addiction and recovery medicine. This book sets the standard for a bona fide integrative approach for others to follow, providing information that is immediately useful in clinical practice and rigorously evidence-based. Authored by world-class experts in the field of addiction medicine, Integrative Addiction and Recovery presents both scientific and holistic data regarding a wide variety of holistic and conventional approaches to the treatment of substance abuse and behavioral addictions. Its chapters cover both conventional and holistic treatment and provide background for each of the major classes of drugs of abuse, including opiates, alcohol, tobacco, stimulants, sedative-hypnotics, hallucinogens and marijuana. It also includes chapters on the topics of food addiction and behavioral addictions such as gambling and shopping. The authors explore the major holistic modalities, providing background and theory in areas like acupuncture, Traditional Chinese Medicine, Homeopathy, Aromatherapy, and Ayurvedic Medicine, while at the same time providing spiritual approach chapters on Shamanism and Ibogaine, as well as more conventional issues with a holistic view including Co-Occurring

Disorders and Psychosocial Treatment, and Group Support. The very complex issue of chronic pain and addiction is also addressed, along with relapse prevention strategies.

Agricultural Policy Monitoring and Evaluation 2022 Reforming Agricultural Policies for Climate Change Mitigation OECD,2022-06-23 This annual report monitors and evaluates agricultural policies in 54 countries, including the 38 OECD countries, the five non-OECD EU Member States, and 11 emerging economies. It finds that the continued rise in agricultural support has been slower than sector growth in recent years, but has been driven to record highs mainly by temporary factors.

Extended Abstracts Fall 2015 Elizabeth A. Ainsbury,M.Luz Calle,Elisabeth Cardis,Jochen Einbeck,Guadalupe Gómez,Pere Puig,2017-05-05 This two-part volume gathers extended conference abstracts corresponding to selected talks from the Biostatnet workshop on Biomedical (Big) Data and from the DoReMi LD-RadStats: Workshop for statisticians interested in contributing to EU low dose radiation research, which were held at the Centre de Recerca Matemàtica (CRM) in Barcelona from November 26th to 27th, 2015, and at the Institut de Salut Global ISGlobal (former CREAL) from October 26th to 28th, 2015, respectively. Most of the contributions are brief articles, presenting preliminary new results not yet published in regular research journals. The first part is devoted to the challenges of analyzing so called Biomedical Big Data, tremendous amounts of biomedical and health data that are generated every day due to the use of recent technological advances such as massive genomic sequencing, electronic health records or high-resolution

medical imaging, among others. The analysis of this information poses significant challenges for researchers in the fields of biostatistics, bioinformatics, and signal processing. Furthermore, other relevant challenges in biostatistical research, not necessarily involving big data, are also discussed. In turn, the second part is dedicated to low dose radiation research, where there is a need to fully understand and characterize potential sources of uncertainty before they can be reduced. Further, the book demonstrates why formal uncertainty analysis has the potential to provide a common platform for multidisciplinary research in this field. This book is intended for established researchers, as well as for PhD and postdoctoral students who want to learn more about the latest advances in these highly active areas of research.
