**Word Frequencies in Written and Spoken English** Geoffrey Leech,Paul Rayson,Andrew (All Of Lancaster University) Wilson,2014-06-11 Word Frequencies in Written and Spoken English is a landmark volume in the development of vocabulary frequency studies. Whereas previous books have in general given frequency information about the written language only, this book provides information on both speech and writing. It not only gives information about the language as a whole, but also about the differences between spoken and written English, and between different spoken and written varieties of the language. The frequencies are derived from a wide ranging and up-to-date corpus of English: the British National Corpus, which was compiled from over 4,000 written texts and spoken transcriptions representing the present day language in the UK. The book is based on a new version of the corpus (available from 2001) providing more accurate grammatical information, which is essential (for example) for distinguishing words like leaves (noun) and leaves (verb) with different meanings. The book begins with a general introduction, explaining why such information is important and highlighting interesting linguistic findings that emerge from the statistical analysis of the British National Corpus vocabulary. It also contains twenty four 'interest boxes' which highlight and comment on different aspects of frequency - for example, the most common colour words in English in order of frequency, and a comparison of male words (e.g. man) and female words (e.g. woman) in terms of their frequency.

**Cultural Roads and Itineraries** Jonathan Paquette,Aur lie Lacassagne,Christophe Alcantara,2021-11-11 This book provides the first synthetic review of the literature on cultural roads and itineraries, providing a template for developing typologies and clarity on existing research. It additionally develops a unique conceptual framework for understanding the social, political, ethical, and spatial dynamics behind cultural roads and itineraries. The book takes the discussion on cultural roads in two different directions. Firstly, by taking a step back from tourism studies, leisure studies, and heritage studies in order to further the conversation on cultural roads with a broader set of disciplines, namely those in the humanities and social sciences. Secondly, through a series of broader theoretical reflections and considerations, the book draws its focus back to the development of the cultural road and cultural itineraries with a new conceptual apparatus that can inspire new questions for research and new ideas for practice. Throughout the text, concepts, theories, principles, and practices are explored and explained through detailed case study analyses.

*Indonesia Beyond the Water's Edge* R. B. Cribb,Michele Ford,2009 Indonesia is the world's largest archipelagic state, with more than 18,000 islands and over 7.9 million square kilometres of sea. The marine frontier presents the nation with both economic opportunities and political and strategic challenges. Indonesia has been affected more than most countries in the world by a slow revolution in the management of its waters. Whereas Indonesia's seas were once conceived administratively as little more than the empty space between islands, successive governments have become aware that this view is outmoded. The effective transfer to the seas of regulatory regimes that took shape on land, such as territoriality, has been an enduring challenge to Indonesian governments. This book addresses issues related to maritime boundaries and security, marine safety, inter-island shipping, the development of the archipelagic concept in international law, marine conservation, illegal fishing, and the place of the sea in national and regional identity.

Out of Control Natalie Collins,2019-04-26 All of us will be familiar with supporting friends, family and colleagues through the ups and downs of relationships. But could some of the more difficult times of argument and conflict be more than general relationship issues? Is there something more sinister going on? Over the course of a lifetime, 30% of women and 16% of men will be subjected to abuse by a partner, yet so many of us are unsure exactly what constitutes domestic abuse, and wouldn't know how to react if we, or one of our friends or family, found ourselves in a relationship with an abuser. Natalie Collins is the perfect guide to lead you through this subject, amassing over a decade's experience leading workshops, raising awareness and capturing national media attention in her work against domestic abuse. Highly readable, invaluable and steeped in theological insight, Natalie starts right from the basics, exploring what domestic abuse is, why it is perpetrated and the impact it has on children and adults. Filled with case studies, including Natalie's own story, this book offers much-needed advice on how we can address domestic abuse, both as individuals and as a church community.

Consuming Mexican Labor Ronald L. Mize,Alicia C. S. Swords,2010-01-01 Mexican migration to the United States and Canada is a highly contentious issue in the eyes of many North Americans, and every generation seems to construct the northward flow of labor as a brand new social problem. The history of Mexican labor migration to the United States, from the Bracero Program (1942-1964) to the North American Free Trade Agreement (NAFTA), suggests that Mexicans have been actively encouraged to migrate northward when labor markets are in short supply, only to be turned back during economic downturns. In this timely book, Mize and Swords dissect the social relations that define how corporations, consumers, and states involve Mexican immigrant laborers in the politics of production and consumption. The result is a comprehensive and contemporary look at the increasingly important role that Mexican immigrants play in the North American economy.

**Multi-Center Phase III Clinical Trials and NCI Cooperative Groups** Institute of Medicine,National Cancer Policy Forum,2009-03-02 The NCI-sponsored cooperative groups have made important contributions to improving treatment for many types of cancer, including breast, ovarian, colorectal, and childhood cancers. Cooperative group research has been instrumental in establishing innovative treatments that improve outcomes and quality of life. Despite these successes, the Cooperative Group Program has faced a number of challenges that threaten its effectiveness. To address this problem, the National Cancer Policy Forum (NCPF) convened a workshop titled Multi-Center Phase III Clinical Trials and NCI Cooperative Groups in Washington, DC, on July 1-2, 2008. The purpose of the workshop was to outline the challenges that the public clinical cancer research enterprise faces, and to identify possible solutions to these challenges.

It finds that the continued rise in agricultural support has been slower than sector growth in recent years, but has been driven to record highs mainly by temporary factors.

**Venture Capital & the Finance of Innovation** Andrew Metrick, 2021-02 Many interesting developments have occurred in the world of venture capital since the publication of the first edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options

**Researching Non-Heterosexual Sexualities** Dr Constantinos N Phellas, 2012-11-01 After widespread neglect over many years, the study of human sexuality has recently come to the forefront of many of the most important debates in contemporary society and culture. This book addresses seriously the issue of how to improve the methodological basis of research into non-heterosexual sexualities, exploring the key question of what different methodological and theoretical uses of intersectionality contribute to our understandings of non-heterosexual sexualities. Bringing together research from the UK, USA, Europe and Australasia, this innovative collection rethinks traditional methodologies, creating new epistemologies and applying new approaches, whilst critically examining key issues, including communities, identities, relationships, sexualities, homosexual parenthood, fostering, civil marriage, and politics. As such, it will be of interest to researchers, scholars and students across the social sciences and health professionals.
