The Bermuda Triangle Charles Berlitz, Joseph Manson Valentine, 1996-04-01 Since 1943 hundreds of plane and ships, and thousands of people, have disappeared in the ocean between Bermuda and the Florida coast, the Bermuda Triangle. Charles Berlitz set out to investigate and has spoken to numerous people who have escaped the terrifying forces of the Bermuda Triangle.

The Bermuda Triangle Mystery Solved Larry Kusche, 2006-03-18 The Bermuda Triangle is known as a strange area in the Atlantic that seems to swallow up ships and planes without warning. This book describes dozens of such disappearances with details from sources as diverse as the military, insurance agencies, and newspaper reports. The incidents covered range from 1840 to 1973. The ships and planes discussed include the Rosalie, Bella, Mary Celeste, Atalanta, Ellen Austin, Lotta, Viego, Miramon, Freya, Spray, Cyclops, Carroll A. Deering, Raifuku Maru, Cotopaxi, Suduffco, Stavenger, John and Mary, La Dahama, Gloria Colita, Proteus, Nereus, Rubicon, Flight 19, City Belle, Star Tiger, Star Ariel, Sandra, Connemara IV, Marine Sulphur Queen, Witchcraft, Scorpion, Elizabeth, El Caribe, V.A. Graphic Storytelling Will Eisner, 1996 Examines the fundamentals of storytelling in comic book style and offers advice on story construction and visual narratives.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an

outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Magical Mathematics Persi Diaconis,Ron

Graham,2015-10-13 Magical Mathematics reveals the secrets of amazing, fun-to-perform card tricks--and the profound mathematical ideas behind them--that will astound even the most accomplished magician. Persi Diaconis and Ron Graham provide easy, step-by-step instructions for each trick, explaining how to set up the effect and offering tips on what to say and do while performing it. Each card trick introduces a new mathematical idea, and varying the tricks in turn takes readers to the very threshold of today's mathematical knowledge. For example, the Gilbreath principle--a fantastic effect where the cards remain in control despite being shuffled--is found to share an intimate connection with the Mandelbrot set. Other card tricks link to the mathematical secrets of combinatorics, graph theory, number theory, topology, the Riemann hypothesis, and even Fermat's last theorem. Diaconis and Graham are mathematicians as well as skilled performers with decades of professional experience between them. In this book they share a wealth of conjuring lore, including some closely guarded secrets of legendary magicians.

Magical Mathematics covers the mathematics of juggling and shows how the I Ching connects to the history of probability and magic tricks both old and new. It tells the stories--and reveals the best tricks--of the eccentric and brilliant inventors of mathematical magic. Magical Mathematics exposes old gambling secrets through the mathematics of shuffling cards, explains the classic street-gambling scam of three-card monte, traces the history of mathematical magic back to the thirteenth century and the oldest mathematical trick--and much more-

To Save a Mountain Barry Spitz, 2012-03-01 The vibrant history of the challenges and successes in the preservation of lands on and around Mt. Tamalpais, Marin County, California, and the key role of the Tamalpais Conservation Club played throughout the last 100 years. It is the history of how many key men and women, like William Kent and Alice Eastwood, and both public and private organizations came together for these efforts. This is the first time this has been documented in one book. This is as well a story of the birth of the environmental movement in the Western United States. The seeds were planted by earlier pioneering environmentalists such as President Theodore Roosevelt and John Muir, an honorary early TCC member. The book is rich with stories of people who made a difference through their passion and love for Mt. Tamalpais. The book, commemorating the TCC's 100th anniversary, includes narratives of the creation of the TCC, Muir Woods National Monument, Mt. Tamalpais State Park, Marin Municipal Water District, Golden Gate National Recreation Area (GGNRA), Marin County Open Space District, and other public areas on the mountain. Over 200 historic photos and documents are included.

The Great Golden Sacrifice of the Mahabharata Maggi Lidchi Grassi, 2011-11-20 A stunningly lyrical work, *The Great Golden Sacrifice of the Mahabharata* reinterprets Vyasa's epic from Arjuna's point of view. As Arjuna relives the battle of Kurukshetra, he senses a profound change coming upon himself. He begins to understand the true meaning of surrender and sacrifice. The book comprises three parts, narrated principally by Arjuna. Part I takes us through the childhood and youth of the Pandavas and Kauravas, the game of dice, the Pandavas' exile, and ends with the armies arrayed for battle at Kurukshetra. Part II recounts the battle itself, and the teachings of the Bhagvad Gita. Part III presents a moving and brilliantly original take on the Mahabharata, as Lidchi-Grassi gives a voice to the forgotten victims of every war—the ordinary citizens who must pick themselves up, and resume the business of life. An old order has been swept away, but can the new age—the Kali Yuga—help lessen human strife and misery? Vastly ambitious in scope and epic in scale, *The Great Golden Sacrifice of the Mahabharata* is an astonishing read.

No Accident Neil Arason, 2014-04-29 It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. **No Accident** examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road

engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.

Terrestrial Vegetation of California, 3rd Edition Michael Barbour, Todd Keeler-Wolf, Allan A. Schoenherr, 2007-07-17 This completely new edition of *Terrestrial Vegetation of California* clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them. This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding, managing or conserving these unique plant communities under the growing threats of climate change, biological invasions and development.—Harold Mooney, Professor of Environmental Biology, Stanford University The plants of California are under threat like never before. Traditional pressures of development and invasive species have been joined by a newly-recognized threat: human-caused climate change. It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them. This book represents an important, well-timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals, students, and the general public alike.—Brent Mishler, Director of the University & Jepson Herbaria and Professor of Integrative Biology, University of California, Berkeley

Hunter Mercedes Lackey, 2015-09-01 They came after the Diseray. Some were terrors ripped from our collective imaginations, remnants of every mythology across the world. And some were like nothing anyone had ever dreamed up, even in their worst nightmares. Monsters. Long ago, the barriers between our world and the Otherworld were ripped open, and it's taken centuries to bring back civilization in the wake of the catastrophe. Now, the luckiest Cits live in enclosed communities, behind walls that keep them safe from the hideous creatures fighting to break through. Others are not so lucky. To Joyeaux Charmand, who has been a Hunter in her tight-knit mountain community since she was a child, every Cit without magic deserves her protection from dangerous Othersiders. Then she is called to Apex City, where the best Hunters are kept to protect the most important people. Joy soon realizes that the city's powerful leaders care more about luring Cits into a false sense of security than protecting them. More and more monsters are getting through the barriers, and the close calls are becoming too frequent to ignore. Yet the Cits have no sense of how much danger they're in—to them, Joy and her corp of fellow Hunters are just action stars they watch on TV. When an act of sabotage against Joy takes an unbearable toll, Joy uncovers a terrifying conspiracy in the city. There is something much worse than the usual monsters infiltrating Apex. And it may be too late to stop them?
