Homeless Heritage Rachael Kiddey, 2017 *Homeless Heritage* describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city. Drawing on fieldwork undertaken in Bristol and York, the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world, before exploring the historical development of the concept of homelessness. Working with homeless people, the author undertook surveys and two excavations of contemporary homeless sites, and the team co-curated two public heritage exhibitions - with surprising results. Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups, *Homeless Heritage* details what it means to be

Computer Graphics Through OpenGL® Sumanta Guha, 2018-12-19 COMPREHENSIVE COVERAGE OF SHADERS AND THE PROGRAMMABLE PIPELINE From geometric primitives to animation to 3D modeling to lighting, shading and texturing, *Computer Graphics Through OpenGL®: From Theory to Experiments* is a comprehensive introduction to computer graphics which uses an active learning style to teach key concepts. Equally emphasizing theory and practice, the book provides an understanding not only of the principles of 3D computer graphics, but also the use of the OpenGL® Application Programming Interface (API) to code 3D scenes and animation, including games and movies. The remaining chapters explore more advanced topics, including the structure of curves and surfaces, applications of projective spaces and transformations and the implementation of graphics pipelines. This book can be used for introductory undergraduate computer graphics courses over one to two semesters. The careful exposition style attempting to explain each concept in the simplest terms possible should appeal to the self-study student as well. Features • Covers the foundations of 3D computer graphics, including animation, visual techniques and 3D modeling • Comprehensive coverage of OpenGL® 4.x, including the GLSL and vertex, fragment, tessellation and geometry shaders • Includes 180 programs with 270 experiments based on them • Contains 750 exercises, 110 worked examples, and 700 four-color illustrations • Requires no previous knowledge of

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Archaeogaming Andrew Reinhard, 2018-06-18 Video games exemplify contemporary material objects, resources, and spaces that people use to define their culture. Video games also serve as archaeological sites in the traditional sense as a place, in which evidence of past activity is preserved and has been, or may be, investigated using the discipline of archaeology, and which represents a part of the archaeological record. This book serves as a general introduction to archaeogaming; it describes the intersection of archaeology and video games and applies archaeological method and theory into understanding game-spaces as both site and artifact.

Digital Wine Tara Brabazon, Mick Winter, Bryn Gandy, 2014-05-12 This book explores the way in which QR codes (Quick Response codes) can help the wine industry facilitate distribution and more effectively market and sell their product. It examines the interventions, invention and opportunities brought about by QR codes for the wine industry. It also investigates how QR codes can help enable regional development as well as information and knowledge about winemakers and regions. The book begins with an introduction to QR codes. It explains how to use them as well as shows how QR codes combine analogue and online promotion and information dissemination. Next, the book explores strategies and examples from the creative industries, small nation theory and emerging wine industries. It then goes on to examine how to integrate QR codes with wine media, including marketing the bottle and using QR codes to build new wine regions. The book concludes with a case study of how Aotearoa/New Zealand wine producers deploy QR codes. QR codes can store and digitally present, a range of helpful data, including URL links, geo-coordinates and text and can be scanned by smart phones, making them a useful marketing and business tool. Presenting detail research on how QR codes can enhance the relationship between producers and consumers as well as aid regional development in the wine industry, this book will be of interest to academics focusing on Wine Studies, small and medium sized enterprises (SMEs) and practitioners and researchers from the creative industries sector. In addition, while this book focuses on the wine industry, the information that it presents about QR codes is relevant and applicable for an array of industries that require a tether between analogue and digital, physical and virtual, especially food and primary production.

Black Feminist Archaeology Whitney Battle-Baptiste, 2017-07-05 Black feminist thought has developed in various parts of the academy for over three decades, but has made only minor inroads into archaeological theory and practice. Whitney Battle-Baptiste outlines the basic tenets of Black

feminist thought and research for archaeologists and shows how it can be used to improve contemporary historical archaeology. She demonstrates this using Andrew Jackson's Hermitage, the W. E. B. Du Bois Homesite in Massachusetts, and the Lucy Foster house in Andover, which represented the first archaeological excavation of an African American home. Her call for an archaeology more sensitive to questions of race and gender is an important development for the field.
