**Echelon Defense** Ryan D. Martinson,2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. **Risk Methodologies for Technological Legacies** Dennis Bley,Vitaly A. Eremenko,2012-12-06 The Cold War Era left the major participants, the United States and the former Soviet Union (FSU), with large legacies in terms of both contamination and potential accidents. Facility contamination and environmental degradation, as well as the accident vulnerable facilities and equipment, are a result of weapons development, testing, and production. Although the countries face similar issues from similar activities, important differences in waste management practices make the potential environmental and health risks of more immediate concern in the FSU and Eastern Europe. In the West, most nuclear and chemical waste is stored in known contained locations, while in the East, much of the equivalent material is unconfined, contaminating the environment. In the past decade, the U.S. started to address and remediate these Cold War legacies. Costs have been very high, and the projected cost estimates for total cleanup are still increasing. Currently in Russia, the resources for starting such major activities continue to be unavailable.

**Exploiting IBM PowerHA SystemMirror V6.1 for AIX Enterprise Edition** Dino Quintero,Benny Abrar,Adriano Almeida,Michael Herrera,SoHee Kim,Bjorn Roden,Andrei Socoliuc,Tom Swart,IBM Redbooks,2014-02-18 This IBM® Redbooks® publication positions the IBM PowerHA® SystemMirror® V6.1 for AIX® Enterprise Edition as the cluster management solution for high availability. This solution enables near-continuous application service and minimizes the impact of planned and unplanned outages. The primary goal of this high-availability solution is to recover operations at a remote location after a system or data center failure, establish or strengthen a business recovery plan, and provide separate recovery location. The IBM PowerHA SystemMirror Enterprise Edition is targeted at multisite high-availability disaster recovery. The objective of this book is to help new and existing PowerHA customers to understand how to plan to accomplish a successful installation and configuration of the PowerHA SystemMirror for AIX Enterprise Edition. This book emphasizes the IBM Power Systems™ strategy to deliver more advanced functional capabilities for business resiliency and to enhance product usability and robustness through deep integration with AIX, affiliated software stack, and storage technologies. PowerHA SystemMirror is designed, developed, integrated, tested, and supported by IBM from top to bottom.

*Strengthening the Disaster Resilience of the Academic Biomedical Research Community* National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Health and Medicine Division,Institute for Laboratory Animal Research,Board on Earth Sciences and Resources,Board on Health Sciences Policy,Committee on Strengthening the Disaster Resilience of Academic Research Communities,2017-11-20 The academic biomedical research community is a hub of employment, economic productivity, and scientific progress. Academic research institutions are drivers of economic development in their local and state economies and, by extension, the national economy. Beyond the economic input that the academic biomedical research community both receives and provides, it generates knowledge that in turn affects society in myriad ways. The United States has experienced and continues to face the threat of disasters, and, like all entities, the academic biomedical research community can be affected. Recent disasters, from hurricanes to cyber-attacks, and their consequences have shown that the investments of the federal government and of the many other entities that sponsor academic research are not uniformly secure. First and foremost, events that damage biomedical laboratories and the institutions that house them can have impacts on the safety and well-being of humans and research animals. Furthermore, disasters can affect career trajectories, scientific progress, and financial stability at the individual and institutional levels. Strengthening the Disaster Resilience of the Academic Biomedical Research Community offers recommendations and guidance to enhance the disaster resilience of the academic biomedical research community, with a special focus on the potential actions researchers, academic research institutions, and research sponsors can take to mitigate the impact of future disasters.

**The Internet of Things** Olivier Hersent,David Boswarthick,Omar Elloumi,2011-12-19 An all-in-one reference to the major Home Area Networking, Building Automation and AMI protocols, including 802.15.4 over radio or PLC, 6LowPAN/RPL, ZigBee 1.0 and Smart Energy 2.0, Zwave, LON, BACNet, KNX, ModBus, mBus, C.12 and DLMS/COSEM, and the new ETSI M2M system level standard. In-depth coverage of Smart-grid and EV charging use cases. This book describes the Home Area Networking, Building Automation and AMI protocols and their evolution towards open protocols based on IP such as 6LowPAN and ETSI M2M. The authors discuss the approach taken by service providers to interconnect the protocols and solve the challenge of massive scalability of machine-to-machine communication for mission-critical applications, based on the next generation machine-to-machine ETSI M2M architecture. The authors demonstrate, using the example of the smartgrid use case, how the next generation utilities, by interconnecting and activating our physical environment, will be able to deliver more energy (notably for electric vehicles) with less impact on our natural resources. Key Features: Offers a comprehensive overview of major existing M2M and AMI protocols Covers the system aspects of large scale M2M and smart grid applications Focuses on system level architecture, interworking, and nationwide use cases Explores recent emerging technologies: 6LowPAN, ZigBee SE 2.0 and ETSI M2M, and for existing technologies covers recent developments related to interworking Relates ZigBee to the issue of smartgrid, in the more general context of carrier grade M2M applications Illustrates the benefits of the smartgrid concept based on real examples, including business cases This book will be a valuable guide for project managers working on smartgrid, M2M, telecommunications and utility projects, system engineers and developers, networking companies, and home automation companies. It will also be of use to senior academic researchers, students, and policy makers and regulators.

**School Leadership - International Perspectives** Stephan Huber,2009-12-24 Recent research into school effectiveness has corroborated the theory that the school leader plays a pivotal role making their school a successful institution, and is most often cited as the key factor in a school's development. Reflecting the importance it is given in the today's education landscape, this book explores the latest trends in school leadership from both theoretical and practical perspectives. Each chapter provides insight into an aspect of current research, with detailed case studies coming from as far afield as Hong Kong and Canada. In the context of the ever-increasing burden of responsibility placed on education management to safeguard and enhance the quality of education they provide, school leadership is now a core concern of policy makers. In addition, most countries are undertaking fundamental education reforms that will have a major influence on the nature of school leadership. Offering the most up-to-date research on this central issue, this book will both inform and shape the debate.

**Professionalism in the Information and Communication Technology Industry** John Weckert,Richard Lucas,2013-10-15 Professionalism is arguably more important in some occupations than in others. It is vital in some because of the life and death decisions that must be made, for example in medicine. In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation. The core idea behind this book is that Information and Communication Technology (ICT) is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind.

**The Engineering of Sport 6** Eckehard Moritz,Steve Haake,2010-04-26 This proceedings volume of the ISEA 2006 examines sports engineering, an interdisciplinary subject which encompasses and integrates not only sports science and engineering but also biomechanics, physiology and anatomy, and motion physics. This is the first title of its kind in the emerging field of sports technology.
