HTTP/2 in Action Barry Pollard,2019-03-06 Summary HTTP/2 in Action is a complete guide to HTTP/2, one of the core protocols of the web. Because HTTP/2 has been designed to be easy to transition to, including keeping it backwards compatible, adoption is rapid and expected to increase over the next few years. Concentrating on practical matters, this interesting book presents key HTTP/2 concepts such as frames, streams, and multiplexing and explores how they affect the performance and behavior of your websites. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology HTTP—Hypertext Transfer Protocol—is the standard for exchanging messages between websites and browsers. And after 20 years, it's gotten a much-needed upgrade. With support for streams, server push, header compression, and prioritization, HTTP/2 delivers vast improvements in speed, security, and efficiency. About the Book HTTP/2 in Action teaches you everything you need to know to use HTTP/2 effectively. You'll learn how to optimize web performance with new features like frames, multiplexing, and push. You'll also explore real-world examples on advanced topics like flow control and dependencies. With ready-to-implement tips and best practices, this practical guide is sure to get you—and your websites—up to speed! Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Disease Control Priorities, Third Edition (Volume 4) Vikram Patel,Dan Chisholm,Tarun Dua,Ramanan Laxminarayan,Mari'a Lena Medina-Mora,Theo Vos,2016-03-10 Mental, neurological, and substance use disorders are common, highly disabling, and associated with significant premature mortality. The impact of these disorders on the social and economic well-being of individuals, families, and societies is large, growing, and underestimated. Despite this burden, these disorders have been systematically neglected, particularly in low- and middle-income countries, with pitifully small contributions to scaling up cost-effective prevention and treatment strategies. Systematically compiling the substantial existing knowledge to address this inequity is the central goal of this volume. This evidence-base can help policy makers in resource-constrained settings as they prioritize programs and interventions to address these disorders.

The Mom Test Rob Fitzpatrick,2013-10-09 The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

Libraries, Telecentres, Cybercafes and Public Access to ICT: International Comparisons Gomez, Ricardo,2011-07-31 Public venues are vital to information access across the globe, yet few formal studies exist of the complex ways people in developing countries use information technologies in public access places.Libraries, Telecentres, Cybercafes and Public Access to ICT: International Comparisons presents groundbreaking research on the new challenges and opportunities faced by public libraries, community telecentres, and cybercafés that offer public access to computers and other information and communication technologies. Written in plain language, the book presents an in-depth analysis of the spaces that serve underserved populations, bridge digital divides, and further social and economic development objectives, including employability. With examples and experiences from around the world, this book sheds light on a surprising and understudied facet of the digital revolution at a time when effective digital inclusion strategies are needed more than ever.

Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A.,2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of “keep it simple and doable”, considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

Prevention, Recognition and Management of Fetal Alcohol Spectrum Disorders Raja A. S. Mukherjee,Neil Aiton,2021-07-31 This book presents clinical assessment and management solutions for those people who are exposed to Alcohol in Pregnancy. Over the last few decades we have begun to understand the enduring effects of prenatal alcohol exposure on the developing fetus. The consequence of prenatal alcohol exposure - Fetal Alcohol Spectrum Disorders is a lifelong disorder and affects children and adults. It is a condition which is significantly under-recognised for many reasons. Assessment and diagnosis requires the input of multiple different professionals, and referral pathways are often poorly developed or non-existent. Information to support and guide these professionals in practical ways, what to do and how to help, remains limited. This book seeks to fill some of that gap by offering professionals, clear and useable research-based information and guidance that will help in their practice whilst also being a useful resource for anyone new to this increasingly recognised area of work. The book is divided into four broad areas bringing together chapters authored by experts in their field including those with lived experiences. Part one focuses on presenting an overview of the condition, and approaching women about their alcohol use and risk followed by part two focusing more around diagnostic issues. Part three follows with management advice, and part four revolves around policy and health prevention in general. Each chapter is designed to offer insight but also practical tips and support in an accessible manner. The book offers an essential guide for a broad range of health and social care professionals

working with this condition.

The Sociology of Gender Amy S. Wharton,2009-02-04 Gender is one of the most important topics in the field of sociology, and as a system of social practices it inspires a multitude of theoretical approaches. The Sociology of Gender offers an introductory overview of gender theory and research, offering a unique and compelling approach. Treats gender as a multilevel system operating at the individual, interactional, and institutional levels. Stresses conceptual and theoretical issues in the sociology of gender. Offers an accessible yet intellectually sophisticated approach to current gender theory and research. Includes pedagogical features designed to encourage critical thinking and debate. Closer Look readings at the end of each chapter give a unique perspective on chapter topics by presenting relevant articles by leading scholars.

Climate Change and Air Pollution Rais Akhtar, Cosimo Palagiano, 2017-10-05 This book discusses regional and international climate-change, air-pollution and human-health scenarios. The research, from both industrialized and developing countries, focuses on region-specific perspectives of climate change impacts on air pollution. After analyzing the variations of climate data over recent decades, the authors consider the different effects of climate change on air pollution and health. As stressed by the IPCC, “pollen, smoke and ozone levels are likely to increase in a warming world, affecting the health of residents of major cities. Rising temperatures will worsen air quality through a combination of more ozone in cities, bigger wild fires and worse pollen outbreaks,” according to a major UN climate report. The report follows the World Health Organization in finding that air pollution is the world’s greatest environmental health risk, killing 7 million people in 2014 (compared to 0.4 million deaths due to malaria). Deteriorating air quality will most affect the elderly, children, people with chronic ill-health and expectant mothers. Another report suggests that more than 5.5 million people die prematurely each year due to air pollution with over half of those deaths occurring in China and India. A study on the air pollution in the USA, suggests that more than half of US population lives in areas with potentially dangerous air pollution, and about six out of 10 of the top cities for air pollution in the USA are located in the state of California. In the face of future climate change, scientists have urged stronger emission controls to avoid worsening air pollution and the associated exacerbation of health problems, especially in more populated regions of the world. It is hoped that the implementation of the Paris Climate Agreement will help minimize air pollution. Additionally the authors consider the various measures that different countries and groups of countries, like the European Union, have adopted to mitigate the problems arising from climate change and to safeguard the health of population. The book examines the increasing incidence of diseases largely caused by climate change. The countries/regions covered in this study include the USA, Northern Europe (U.K.), Southern Europe (Italy), Canada, Australia, East Asia, Russia, Hong Kong, Taiwan, Thailand, Malaysia, Indonesia, India, South Africa, Mexico, Brazil, Caribbean countries, and Argentina.

Creating Value Through Corporate Restructuring Stuart C. Gilson, 2010-04-05 An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to classic buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, vulture investing, equity spin-offs, asset divestitures, and much more Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should pull the trigger From hedge funds to financial fraud to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever.

Teaching ‘Proper’ Drinking? Maggie Brady, 2017-12-12 In *Teaching ‘Proper’ Drinking?*, the author brings together three fields of scholarship: socio-historical studies of alcohol, Australian Indigenous policy history and social enterprise studies. The case studies in the book offer the first detailed surveys of efforts to teach responsible drinking practices to Aboriginal people by installing canteens in remote communities, and of the purchase of public hotels by Indigenous groups in attempts both to control sales of alcohol and to create social enterprises by redistributing profits for the community good. Ethnographies of the hotels are examined through the analytical lens of the Swedish ‘Gothenburg’ system of municipal hotel ownership. The research reveals that the community governance of such social enterprises is not purely a matter of good administration or compliance with the relevant liquor legislation. Their administration is imbued with the additional challenges posed by political contestation, both within and beyond the communities concerned. ‘The idea that community or government ownership and management of a hotel or other drinking place would be a good way to control drinking and limit harm has been commonplace in many Anglophone and Nordic countries, but has been less recognised in Australia. Maggie Brady’s book brings together the hidden history of such ideas and initiatives in Australia ... In an original and wide-ranging set of case studies, Brady shows that success in reducing harm has varied between communities, largely depending on whether motivations to raise revenue or to reduce harm are in control.’ — Professor Robin Room, Director, Centre for Alcohol Policy Research, La Trobe University
