*World Migration Report 2011* International Organization for Migration, 2012-02-13 This report presents available evidence on public perceptions and attitudes regarding migration globally. It analyzes how they can influence and be influenced by policy and the media. It suggests several ways to improve communication about migration to promote better understanding and recognition of the benefits of migration. The publication comprises two parts: part A analyses major migration trends in 2010/2011, offering an overview of developments in policy, legislation, international cooperation and dialogue on migration, and part B reviews the evolution of the agency's approach to migration management since the end of the Cold War. It also presents a statistical overview of the organization's programmes over the last decade.

**Regime and Periphery in Northern Yemen** Barak A. Salmoni, Bryce Loidolt, Madeleine Wells, 2010-04-28 For nearly six years, the government of Yemen has conducted military operations north of the capital against groups of its citizens known as Huthis. In spite of using all means at its disposal, the government has been unable to subdue the Huthi movement. This book presents an in-depth look at the conflict in all its aspects. The authors detail the various stages of the conflict and map out its possible future trajectories.

How to Start a Business for Free David Caplan, 2003 Most prosperous businesses are started on extremely tight budgets, and founders hustle hard to deliver innovative--or simply good--products or services. This book focuses on strategies to make great business ideas reality as cheaply as possible.

*Etat de la migration dans le monde 2011* International Organization for Migration, 2012-04-24 Le Rapport présente les informations disponibles sur les représentations et les attitudes du public au sujet de la migration. Il analyse la manière dont celles-ci sont façonnées, et comment elles peuvent influencer sur, ou être influencées par, l'action des pouvoirs publics et les médias. Il étudie en outre le rôle que jouent ces derniers lorsqu'ils relaient l'opinion, rendent compte des tendances migratoires et orientent le discours sur la migration, et livre des exemples de bonnes pratiques suivies par les pouvoirs publics, la société civile et les médias pour communiquer une image positive et nuancée des migrants. Enfin, il propose divers moyens pour mieux communiquer sur la migration, de façon à faciliter la compréhension et la reconnaissance des avantages de celle-ci, à encourager la formulation de politiques davantage fondées sur des données probantes, et à s'assurer une meilleure participation des migrants eux mêmes.

**The Oxford Handbook of Grand Strategy** Thierry Balzacq, Ronald R. Krebs, 2021-09-13 A clearly articulated, well-defined, and relatively stable grand strategy is supposed to allow the ship of state to steer a steady course through the roiling seas of global politics. However, the obstacles to formulating and implementing grand strategy are, by all accounts, imposing. The Oxford Handbook of Grand Strategy addresses the conceptual and historical foundations, production, evolution, and future of grand strategy from a wide range of standpoints. The seven constituent sections present and critically examine the history of grand strategy, including beyond the West; six distinct theoretical approaches to the subject; the sources of grand strategy, ranging from geography and technology to domestic politics to individual psychology and culture; the instruments of grand strategy's implementation, from military to economic to covert action; political actors', including non-state actors', grand strategic choices; the debatable merits of grand strategy, relative to alternatives; and the future of grand strategy, in light of challenges ranging from political polarization to technological change to aging populations. The result is a field-defining, interdisciplinary, and comparative text that will be a key resource for years to come.

**Armed Conflicts in South Asia 2011** D. Suba Chandran, P. R. Chari, 2017-11-01 Fourth in the annual series, this volume reviews the transformative changes which have emerged in the armed conflicts in South Asia in 2010, several of these with long and convoluted histories, including the conflicts in Jammu & Kashmir, northeast India and the Naxalite movement in central India; as also issues of autonomy in Balochistan, the FATA region in Pakistan, the Chittagong Hill Tracts in Bangladesh, and the Terai foothills in Nepal. The book examines whether armed conflicts have transformed since their inception; or only metamorphosed into the sullen acceptance that could usher future violence. While conflicts in South Asia have been interspersed with peace efforts, the book looks at the complex trajectories that such attempts have taken. Specifically, it identifies three regions where most significant transformative trends were witnessed in South Asia in 2010: conflict-ridden Sri Lanka, Af-Pak and the Naxalite regions of India.

**Research capacity building for development** Irish-African Partnership for Research Capacity Building, 2010-09-24 This publication is a product of a new strategic partnership between universities and higher education institutes in Ireland and their counterparts in Malawi, Mozambique, Tanzania and Uganda. Research capacity building is the planned improvement of the capacity and competency of the higher education sector to conduct research that contributes to the alleviation of poverty and to achieving the Millennium Development Goals. In addition to discursive chapters that provide background and context to the field, expert contributors offer their insights into best practice in six thematic areas: research management; research bid writing; research finance; human resources; postgraduate research; and ICT in research capacity building. Models for the conduct of practical workshops on those themes are included and additional electronic resources are provided by the accompanying CD.

Nano-Hype David M. Berube, 2009-12-04 Nanotechnology, the science of molecular engineering at the atomic scale, has captured the popular imagination. From movies to TV series to video games, utopian fantasies and horror scenarios involving nanotechnology have become a staple of the entertainment industry. The hyperbole surrounding this new technology comes not only from the media but also from scientists who exaggerate the anticipated benefits of nanotechnology to justify research funding, as well as from environmentalists and globalization opponents, who sometimes indulge in doom-and-gloom prophecies to advance their own agendas. The result is widespread misinformation and an uninformed public. In an effort to set the record straight, professor of communication studies David M. Berube has written this thoroughly researched, accessible overview of nanotechnology in contemporary culture. He evaluates the claims and counterclaims about nanotechnology by a broad range of interested parties including government officials and bureaucrats, industry leaders and entrepreneurs, scientists, journalists, and other persons in the media. Berube appraises programs and grand initiatives here and abroad, and he examines the environmental concerns raised by opponents, as well as the government and private responses to these concerns. With so much argumentation on both sides, it is difficult for anyone to determine what is true. Nano-Hype provides up-to-date, objective information to inform the public. Based on over a decade of research and interviews with many of the movers and shakers in nanotechnology, this critical study will help the reader separate the realistic prospects from the hype surrounding this important cutting-edge technology.

Elsevier's Dictionary of Medicine and Biology G. Konstantinidis, 2005-08-18 Dictionaries are didactic books used as consultation instruments for self-teaching. They are composed by an ordered set of linguistic units which reflects a double structure, the macrostructure which corresponds to the word list and the microstructure that refers to the contents of each lemma. The great value of dictionaries nests in the fact that they establish a standard nomenclature and prevent in that way the appearance of new useless synonyms. This dictionary contains a total of about 27.500 main English entries, and over of 130.000 translations that should normally sufficiently cover all fields of life sciences. The basic criteria used to accept a word a part of the dictionary during the development period in order of importance were usage, up-to-dateness, specificity, simplicity and conceptual relationships. The dictionary meets the standards of higher education and covers all main fields of life sciences by setting its primary focus on the vastly developing fields of cell biology, biochemistry, molecular biology, immunology, developmental biology, microbiology, genetics and also the fields of human anatomy, histology, pathology, physiology, zoology and botany. The fields of ecology, paleontology, systematics, evolution, biostatistics, plant physiology, plant anatomy, plant histology, biometry and lab techniques have been sufficiently covered but in a more general manner. The latest Latin international anatomical terminology Terminologia Anatomica or TA has been fully incorporated and all anatomical entries have been given their international Latin TA synonym. This dictionary will be a valuable and helpful tool for all scientists, teachers, students and generally all those that work within the fields of life sciences.
