**Saltillo, 1770-1810** Leslie Scott Offutt,2001-08 At the end of the eighteenth century, the community of Saltillo in northeastern Mexico was a thriving hub of commerce. Over the previous hundred years its population had doubled to 11,000, and the town was no longer limited to a peripheral role in the country's economy. Leslie Offutt examines the social and economic history of this major late-colonial trading center to cast new light on our understanding of Mexico's regional history. Drawing on a vast amount of original research, Offutt contends that northern Mexico in general has too often been misportrayed as a backwater frontier region, and she shows how Saltillo assumed a significance that set it apart from other towns in the northern reaches of New Spain. Saltillo was home to a richly textured society that stands in sharp contrast to images portrayed in earlier scholarship, and Offutt examines two of its most important socioeconomic groups—merchants and landowners—to reveal the complexity and vitality of the region's agriculture, ranching, and trade. By delineating the business transactions, social links, and political interaction between these groups, she shows how leading merchants came to dominate the larger society and helped establish the centrality of the town. She also examines the local political sphere and the social basis of officeholding—in which merchants generally held higher-status posts—and shows that, unlike other areas of late colonial Mexico, Saltillo witnessed little conflict between creoles and peninsulars. The growing significance of this town and region exemplifies the increasing complexity of Mexico's social, economic, and political landscape in the late colonial era, and it anticipates the phenomenon of regionalism that has characterized the nation since Independence. Offutt's study reassesses traditional assumptions regarding the social and economic marginality of this trading center, and it offers scholars of Mexican and borderlands studies alike a new way of looking at this important region. **Farm Fences and Gates** Richard Kubik,2014-04-15 If you raise livestock or crops, you'll need a fence. Good fences are critical to success. They protect your animals (and plants) and keep them at home, and they can also minimize the damage done by pests and predators. In *Farm Fences and Gates*, you'll learn how to build and repair the fences you need—and make the difference between a world of trouble and peace of mind. Wood posts or steel, wire mesh, barbed wire, chain link, or rail, this book will help you figure out what kind of fence is appropriate and how to plan its construction. Useful diagrams and charts help you estimate how much material you'll need and how to go about installing and maintaining a solid, dependable fence. Writer and farm consultant Rick Kubik offers clear and expert advice on what works best in certain areas and for particular purposes. His instructions for planning and constructing each variety of fencing take the guesswork out of a job of critical importance to most landowners (and their neighbors). *Farm Fences and Gates* is the first and most essential tool for anyone thinking of building a fence. This complete guidebook will save time and money for beginners and seasoned builders alike by explaining how to do the job right the first time around.

**Constructing Cultural Tourism** Keith Hanley,John K. Walton,2010-11-15 This book is an interdisciplinary collaboration between a literary critic and cultural historian, which examines and recovers a radical and still urgent challenge to the industrialisation of cultural tourism from the work of John Ruskin. Ruskin exerted a formative influence on the definition and development of cultural tourism which was probably as significant as that, for example, of his contemporary Thomas Cook. The book assesses Ruskin's overall influence on the development of national and international tourism in the context of pre-existing expectations about tourism flows and cultural capital and alongside parallel and intersecting trends of the time; examines Ruskin's contribution to the tourist agenda at all social levels; and discusses Ruskin's significance for current debates in tourism studies, especially questions of the place of the 'canon' of traditional European cultural tourism in a post-modern tourist setting, and the various incarnations of 'heritage tourism'.

**Beyond Backpacker Tourism** Kevin Hannam,Anya Diekmann,2010 Building on previous work on backpacking, this book takes the analysis of backpacker tourism further by engaging both with new theoretical debates into tourism experiences and mobilities as well as with new empirical phenomena such as the rise of the 'flashpacker' and alternative destinations.

**OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Canada** OECD,2015-08-03 The Canadian food and agriculture sector is for the most part competitive and export-oriented: although challenges and opportunities vary significantly between regions, primary agriculture benefits from an abundance of natural resources and faces limited environmental constraints.

**Pentecostal Churches in Transition** Shane Clifton,2009 The global growth of Pentecostal movements during the course of the twentieth century has been widely documented although, to date, there has been little written on their developing ecclesiology. After making the case for a concrete rather than idealised approach to ecclesiology, this book describes and analyses the transitions that have framed the ways in which Australian Pentecostals have understood church life and mission. From a loosely knit faith missions movement, to congregational free church structures, to the so-called apostolic models of mega-churches, Australian pentecostalism stands as a microcosmos of ecclesial developments that have occurred throughout the world. This book, therefore, provides a means of reflecting upon what has been gained and lost in the process of ecclesiological change.

**Why Canada Needs Postal Banking** John Anderson, In almost half the communities in small town and rural Canada that have a post office, there are no bank or credit union branches; Only about fifty-four bank and credit union branches exist in the over 615 First Nations communities in Canada; A growing number of urban areas in Canada have no accessible banks or credit unions *Why Canada Needs Postal Banking* offers a plethora of information about the banking industry that will shock ordinary Canadians. In explaining the banking system that many of us take for granted, the author reveals a deep, and largely unrecognized, gap between the services offered in densely populated, urban spaces and those available in small towns, rural and remote regions, and Indigenous communities. As a solution to this dearth in services, John Anderson proposes a logical alternative to big, private-sector banks: the post office. Basing his argument on historical fact, international experience, and the exorbitant cost of traditional banking services, the author builds a logical and compelling case for reestablishing banking services at Canada Post. Composed of a collection of research papers, interviews, and opinion pieces, *Why Canada Needs Postal Banking* provides convincing and well-organized data to support the reintroduction of postal service banking in Canada. Readers can absorb survey results that document citizen, municipality, and union support for this strategy. Tables and graphics provide easy access for those who want to assess the statistical facts and figures at a glance. Written in clear, succinct, and transparent language, *Why Canada Needs Postal Banking* engages the reader while delivering surprising information. In a landscape where challenges seem overwhelming much of the time, this book proposes a solution that, while not without its difficulties, is implementable. It delivers answers and alternatives that support business and individuals' needs in different parts of the economy that have been, for too long and too often, overlooked.

**Indian River Lagoon** Osborn, Nathaniel, 2016-03-01 Florida Historical Society Stetson Kennedy Book Award Stretching along 156 miles of Florida's East Coast, the Indian River Lagoon contains the St. Lucie estuary, the Mosquito Lagoon, Banana River Lagoon, and the Indian River. It is a delicate ecosystem of shifting barrier islands and varying salinity levels due to its many inlets that open and close onto the ocean. The long, ribbon-like lagoon spans both temperate and subtropical climates, resulting in the most biologically diverse estuarine system in the United States. Nineteen canals and five man-made inlets have dramatically reshaped the region in the past two centuries, intensifying its natural instability and challenging its diversity. Indian River Lagoon traces the winding story of the waterway, showing how humans have altered the area to fit their needs and also how the lagoon has influenced the cultures along its shores. Now stuck in transition between a place of labor and a place of recreation, the lagoon has become a chief focus of public concern. This book provides a much-needed bigger picture as debates continue over how best to restore this natural resource.

**The Brussels Effect** Anu Bradford, 2020-01-27 For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book *The Brussels Effect*: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012 - absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.

**The Hymn Writers of Early Pennsylvania** Lucy E. Carroll, 2008-10 William Penn's promise of religious freedom brought many diverse religious groups to Pennsylvania in the 17th and 18th centuries. Each brought pre-existing hymns and hymn tunes, but many also wrote original texts and music. This book examines the hymns of the 1694 Wissahickon settlement under Johannes Kelpius, the 18th century Ephrata Cloister of Conrad Beissel, and the hymn life of the Bethlehem Moravian Unitas Fratrum. Among the later writers of hymn text or music selected for this study are William Kirkpatrick, John Wyeth, William Gustavus Fischer, Francis Hopkinson, Eleanor C. Donnelly, and many more. Sample texts are included for many hymns, and six musical scores are reproduced. Of special interest are the earliest texts and music from the Wissahickon and Ephrata communities. Pennsylvania's hymn background is unique and compelling. The stories of the writers and their hymns should appeal to anyone interested in hymns, theology, music, or American history. Dr. Lucy E. Carroll is currently organist and choir director at the Carmelite Monastery in Philadelphia, and Adjunct Associate Professor at Westminster Choir College in Princeton NJ. She was appointed Scholar in Residence by the PHMC for the Ephrata Cloister site, and she has served as a PHC Commonwealth Speaker. She is Research Chair for the Kelpius Society of Philadelphia. Her articles on music have appeared in many journals and periodicals, and her Churchmouse Squeaks cartoons appear monthly in the *Adoremus* Bulletin. The recipient of numerous awards and honors, Dr. Carroll has served as organist, conductor, theatre director, educator, music coordinator, clinician and guest speaker. She chaired the music segment of the 1992 International Conference on Arts and Communication at St. John's College, Cambridge, England and was awarded the International Order of Merit.

**Digital Competition Law in Europe** Marc Wiggers, Robin Struijlaart, Joost Dibbits, 2023-07-14 'Digital competition', a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book - both informative and practical - lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe, most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2022 but including as many landmark cases as possible up to and including December 2022, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on cartel prohibition, the prohibition of abuse of a dominant position and merger control. Additional chapters - partially written by guest authors (who are all without a doubt true thought leaders: Tristan Byrne, Giuseppe Colangelo, Ai Deng, Teodora Groza, Daniel Mândrescu, Wolf Sauter, Thibault Schrépel, and Gareth Shier) - evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, the economic context, the most important game changers, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge of competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality - which is here already, like it or not - are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.

**The Human Imperative** Paul Nemitz, 2023-07-31 This important new book is about power in the age of Artificial Intelligence. It looks at what the new technical powers that have accrued over the last decades mean for the freedom of people and for our democracies. AI must not be considered in isolation, but rather in a very specific context; the concentration of economic and digital-technological power that we see today. Analysis of the effects of AI requires that we take a holistic view of the business models of digital technologies, and of the power they exercise. Technology, economic power, and political power are entering into ever closer symbiosis. Digital technologies and their corporate masters now know more than people know about themselves, or governments know about the world. These technologies accumulate more and more decision-making powers. Taken together this leads to a massive asymmetry of knowledge and power in the relationship between man and machine. The classical models of action and decision-making in democratic societies are being gradually undermined by such developments. In a new way, the question of the control of technical power arises. This is the first book to look in detail in a holistic way at the challenges of digital power and Artificial Intelligence to Democracy and Liberties, and to set out what can and needs to be done about these challenges in terms of engineering ethics, and democratic action of policy making and legislation. Key audiences are scholars in media sciences, political sciences, computer sciences and engineering, law and philosophy as well as policy makers, corporate and civil society leaders and the educated public. Adapted and updated from the original German language book "Prinzip Mensch - Macht, Freiheit und Demokratie im Zeitalter der Künstlichen Intelligenz", published 2020 by Verlag J.H.W. Dietz Nachf. GmbH.

**An Introductory Guide to Artificial Intelligence for Legal Professionals** Juan Pavón, María Jesús González-Espejo, 2020-05-14 The availability of very large data sets and the increase in computing power to process them has led to a renewed intensity in corporate and governmental use of Artificial Intelligence (AI) technologies. This groundbreaking book, the first devoted entirely to the growing presence of AI in the legal profession, responds to the necessity of building up a discipline that due to its novelty requires the pooling of knowledge and experiences of well-respected experts in the AI field, taking into account the impact of AI on the law and legal practice. Essays by internationally known expert authors introduce the essentials of AI in a straightforward and intelligible style, offering jurists as many practical examples and business cases as possible so that they are able to understand the real application of this technology and its impact on their jobs and lives. Elements of the analysis include the following:

crucial terms: natural language processing, machine learning and deep learning; regulations in force in major jurisdictions; ethical and social issues; labour and employment issues, including the impact that robots have on employment; prediction of outcome in the legal field (judicial proceedings, patent granting, etc.); massive analysis of documents and identification of patterns from which to derive conclusions; AI and taxation; issues of competition and intellectual property; liability and responsibility of intelligent systems; AI and cybersecurity; AI and data protection; impact on state tax revenues; use of autonomous killer robots in the military; challenges related to privacy; the need to embrace transparency and sustainability; pressure brought by clients on prices; minority languages and AI; danger that the existing gap between large and small businesses will further increase; how to avoid algorithmic biases when AI decides; AI application to due diligence; AI and non-disclosure agreements; and the role of chatbots. Interviews with pioneers in the field are included, so readers get insights into the issues that people are dealing with in day-to-day actualities. Whether conceiving AI as a transformative technology of the labour market and training or an economic and business sector in need of legal advice, this introduction to AI will help practitioners in tax law, labour law, competition law and intellectual property law understand what AI is, what it serves, what is the state of the art and the potential of this technology, how they can benefit from its advantages and what are the risks it presents. As the global economy continues to suffer the repercussions of a framework that was previously fundamentally self-regulatory, policymakers will recognize the urgent need to formulate rules to properly manage the future of AI.

*Priests of the Law* Thomas J. McSweeney,2019-11-14 *Priests of the Law* tells the story of the first people in the history of the common law to think of themselves as legal professionals. In the middle decades of the thirteenth century, a group of justices working in the English royal courts spent a great deal of time thinking and writing about what it meant to be a person who worked in the law courts. This book examines the justices who wrote the treatise known as Bracton. Written and re-written between the 1220s and the 1260s, Bracton is considered one of the great treatises of the early common law and is still occasionally cited by judges and lawyers when they want to make the case that a particular rule goes back to the beginning of the common law. This book looks to Bracton less for what it can tell us about the law of the thirteenth century, however, than for what it can tell us about the judges who wrote it. The judges who wrote Bracton - Martin of Pattishall, William of Raleigh, and Henry of Bratton - were some of the first people to work full-time in England's royal courts, at a time when there was no recourse to an obvious model for the legal professional. They found one in an unexpected place: they sought to clothe themselves in the authority and prestige of the scholarly Roman-law tradition that was sweeping across Europe in the thirteenth century, modelling themselves on the jurists of Roman law who were teaching in European universities. In Bracton and other texts they produced, the justices of the royal courts worked hard to ensure that the nascent common-law tradition grew from Roman Law. Through their writing, this small group of people, working in the courts of an island realm, imagined themselves to be part of a broader European legal culture. They made the case that they were not merely servants of the king: they were priests of the law.

*Digital Empires* Anu Bradford,2023 In *Digital Empires*, Anu Bradford examines the ideological origins, societal implications, and the relative global influence of three contrasting regulatory approaches towards the digital economy. Throughout, she compares the EU's approach with both the US-based techno-libertarian model and China's authoritarian approach. At a moment of time when digital societies are at an inflection point, this book lays bare the choices we face as societies and individuals, explains the forces that shape those choices, and spells out the stakes involved in making those choices.
