*Defining Sustainable Development for Our Common Future* Iris Borowy, 2013-12-04 The UN World Commission on Environment and Development, chaired by former Norwegian Prime Minister Gro Harlem Brundtland, alerted the world to the urgency of making progress toward economic development that could be sustained without depleting natural resources or harming the environment. Written by an international group of politicians, civil servants and experts on the environment and development, the Brundtland Report changed sustainable development from a physical notion to one based on social, economic and environmental issues. This book positions the Brundtland Commission as a key event within a longer series of international reactions to pressing problems of global poverty and environmental degradation. It shows that its report, *Our Common Future*, published in 1987, covered much more than its definition of sustainable development as development that meets the needs of the present without compromising the ability of future generations to meet their own needs for which it became best known. It also addressed a long list of issues which remain unresolved today. The book explores how the work of the Commission juggled contradictory expectations and world views, which existed within the Commission and beyond, and drew on the concept of sustainable development as a way to reconcile profound differences. The result was both an immense success and disappointment. Coining an irresistibly simple definition enabled the Brundtland Commission to place sustainability firmly on the international agenda. This definition gained acceptability for a potentially divisive concept, but it also diverted attention from underlying demands for fundamental political and social changes. Meanwhile, the central message of the Commission – the need to make inconvenient sustainability considerations a part of global politics as much as of everyday life – has been side-lined. The book thus assesses to what extent the

Brundtland Commission represented an immense step forward or a missed opportunity.

*The Struggle over Human Rights* Courtney Hercus, 2019-01-17 *The Struggle over Human Rights* uses empirical evidence to prove that pressures placed by the NIEO on the international system shaped the human rights doctrine of the Carter administration. Carter's strategy relegated economic rights to a "basic needs" approach and sharpened the definition of international human rights to serve the US world order.

*Research Handbook on International Solidarity and the Law* Cecilia M. Bailliet, 2024-04-12 This comprehensive and insightful Research Handbook addresses the interpretation of international solidarity within topical legal regimes and regional systems, as well as in relation to decolonization and the concepts of Ummah and Ubuntu. It examines the way in which international solidarity enables the global community to respond to intercontinental challenges, including climate change, forced migration, health emergencies, and inequality.

*Environmental History in the Making* Estelita Vaz, Cristina Joanaz de Melo, Lígia M. Costa Pinto, 2016-10-13 This book is the product of the 2nd World Conference on Environmental History, held in Guimarães, Portugal, in 2014. It gathers works by authors from the five continents, addressing concerns raised by past events so as to provide information to help manage the present and the future. It reveals how our cultural background and examples of past territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions. Considering that political ideologies such as socialism and capitalism, as well as religion, fail to offer global paradigms for common ground, an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors, real or invented, and avoid repeating ecological loss.

Therefore, agency, environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political, cultural and economic interests in the public arena. This book intertwines reflections on our bonds with landscapes, processes of natural and scientific transfer across the globe, the changing of ecosystems, the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it, in today's world, can offer alternatives that avoid harming those same vital natural resources: water, soil and air. In addition, it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities, which cannot be detached from technical intervention in the world. In short, the book firstly studies the past, approaching it as a data set of how the environment has shaped culture, secondly seeks to understand the present, and thirdly assesses future perspectives: what to keep, what to change, and what to dream anew, considering that conventional solutions have not sufficed to protect life on our planet.

**The Arctic in China's National Strategy** Martin Kossa, 2024-02-02 This book locates the Arctic within the context of the People's Republic of China's (PRC) national strategy of the Great Rejuvenation of the Chinese Nation. Drawing on a range of sources published in Chinese and English, the author analyses Beijing's Arctic scientific activities and technological capabilities, including the research infrastructure, long-term goals, and the significance for China's understanding of the region, its Arctic identity, and international perceptions. Examining the region from the perspective of the Comprehensive National Security Outlook developed during the Xi Jinping era, the book focuses on military, economic, technological, and political components and considers the PRC's official and academic discourses and the views of the region within bilateral relations with Arctic states, outlining

a science, security, and governance nexus in China's Arctic engagement. This volume will be of interest to scholars and students of Arctic geopolitics, Chinese studies, security studies, and foreign policy analysis. It will also appeal to policymakers and defence analysts in Arctic states and other regional stakeholders.

Biblical Studies on the Internet Roland H. Worth, 2002-01-01 With this handbook of currently available internet resources (for use online or to be downloaded to one's personal computer), the users can locate the exact spot on the internet to find the materials they want. And they will save countless hours of frustration and work. Over 3,300 websites provide information on a range of topics: English language Bible translations that can be used online or downloaded, sites to listen to hymns on the Internet, Bible translations into 57 non-English languages, non-English commentaries, dictionaries, and other resource materials, Hebrew, Greek, and other ancient language texts and resource materials, numerous commentaries on any one single biblical book or on the entire scriptural canon, supplemental materials dealing with everything from devotional studies to issues of fundamental biblical interpretation, and pseudo-authoritative writings related to the two testaments. Multiple sites are given for each resource cited whenever possible.

*Gender-Responsive Governance in Sierra Leone* John Idriss Lahai, 2023-07-28 This book investigates gender equality and women's empowerment in Sierra Leone, focusing especially on women's interactions with the state and its development partners. In particular, it highlights women's increasing agency in acquiring knowledge, diffusing power, engaging in grassroots politics, and compelling the government to adopt more gender-responsive policies. Exploiting extensive fieldwork and original multidisciplinary research methods (including econometric and statistical models), the

book first sets out the history and impact of inequality in Sierra Leone, and then goes on to shed light on the constructive and collaborative engagement of women and the state on a variety of local and external strategies for promoting gender equality. Drawing throughout on insights from across gender studies, sociology, anthropology, economics, and political science, the book highlights how women are succeeding in transforming marginality into agency in order to build a platform for influencing change. By qualifying and quantifying the challenges of gender inequality in Sierra Leone, and the progress that is being made, this book provides important insights that will be relevant to other fragile, post-conflict states within Africa. The book will be of interest to students and researchers studying women and gender studies, African studies, economics, international development, sociology, and political science and international relations. It will also deepen policymakers' and practitioners' understanding of women's diverse trajectories and experiences, and how the typology of government affects the patterns of inequality and equality.

Legal Protection and Sustainability of Chinese Investments in Africa Xiuli Han, 2022-08-26 This book attempts to illustrate the whole picture of international investment rule of law between China and African countries and find the way forward through combining theory and practice. It is a book by a Chinese professor based on her long-term research experience in the international investment law field and her African field work in person. Its main feature is its well-balanced thinking on the structure of investment international rule of law. It should be the most comprehensive research on the international investment rule of law between China and African countries. With the increase of Chinese investment in Africa, various discussions and viewpoints on Chinese investment in Africa have become striking. The purpose of this book is to explore systematically the protection and sustainability of Chinese investment under the concept and framework of the international investment

rule of law, so as to serve the sustainable development of Africa and China. For the purpose of this book, great importance is attached to the idea of the international rule of law, and the international investment law with the function of rule of law is adhered to. The conclusion of this book is that China should take proactive steps to protect Chinese investment in Africa and regulate Chinese overseas investors and their investments in addition to complying with the laws in the host states and thus make them conducive to African and Chinese sustainable development; however, the most significant issue is that China-Africa investment relations should be regulated by the evolving and specific international investment rule of law, and the China-Africa international investment rule of law should conform to normative in form, support common sustainable development in value, and reflect the social reality of China and Africa. For both researchers and students, it is an approach to understand international investment rule of law from a perspective of China and Africa. For those who are interested in China and Africa, it is a useful reference book.

**Incorporating Children in Worship** Michelle A. Clifton-Soderstrom, David Bjorlin, 2014-06-18  
Incorporating children in worship is a powerful and overlooked mark of God's kingdom. This book argues that children's full participation in worship signifies not only a vibrant, faithful communion but also offers a critical window into the Spirit's work of linking the church to Christ. Children have a vocation in worship. They embody the theological virtues in distinct ways that enrich the worship of the whole church. Moreover, incorporating children reflects the difference in unity that is God's triune life. Receiving children in their difference moves the worshipping body toward the telos of worship--glorification of God and sanctification of humanity--and habituates the worshipping body to incorporate other, often more threatening, kinds of difference.

*TRIPS Agreement of the WTO* Mohammad Towhidul Islam, 2014-07-24 This book examines the

application of the World Trade Organization's (WTO) Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) in the fields of agriculture, public health and economic development in a Least Developed Country (LDC) such as Bangladesh. In particular, it evaluates the question whether the TRIPS' one-size-fits-all approach compulsorily applicable for all countries, irrespective of their development standing, fulfils the developmental needs of Bangladesh and other such LDCs in the fields of agriculture, public health and economic development. The book shows that the TRIPS' introduction of IPRs in the name of Plant Varieties Protection (PVP) and patents not only secures private sector investment in agriculture but also brings traditional agricultural practices within the spectrum of private monopoly, increases the price of agricultural products and forces people into dependency on engineered seeds and other agricultural inputs. To guard against such trade rules, this book recommends that Bangladesh should incorporate the TRIPS flexibilities in the form of redefining patentable invention, choosing between patents and PVP and providing for compulsory licensing. This book also reveals that the TRIPS patenting in pharmaceuticals encourages innovations by ensuring royalty collections and protects public health by raising standards of living. However, patenting offers exclusivity to pharmaceutical companies, extending the duration of the patent term and establishing their control over production, supply and distribution. Such control results in exclusivity over drug pricing. The flexibilities of the compliance deadline, compulsory licensing, and parallel importation built into the TRIPS are set to tackle untenable situations arising from patenting exclusivity. However, patent laws in most LDCs are out-dated in terms of dealing with such flexibilities. Given this, the research recommends that Bangladesh should invoke the TRIPS flexibilities. The author of this book further establishes that the TRIPS' standard-setting in agriculture and pharmaceuticals does not help the country to fulfil subsistence needs or promote economic

development through innovation. However, the appropriation of agricultural and pharmaceutical goods during the use of the TRIPS flexibilities has the potential to feed the people, protect public health interests and increase economic development with the supply of food and drugs at home and abroad. To this end, the research asks Bangladesh to reform its existing IPRs provisions by redefining patentable inventions and simplifying compulsory licensing and other differential treatments to appropriate foreign technologies.

**A War on Global Poverty** Joanne Meyerowitz, 2023-06-13 A history of US involvement in late twentieth-century campaigns against global poverty and how they came to focus on women A War on Global Poverty provides a fresh account of US involvement in campaigns to end global poverty in the 1970s and 1980s. From the decline of modernization programs to the rise of microcredit, Joanne Meyerowitz looks beyond familiar histories of development and explains why antipoverty programs increasingly focused on women as the deserving poor. When the United States joined the war on global poverty, economists, policymakers, and activists asked how to change a world in which millions lived in need. Moved to the left by socialists, social democrats, and religious humanists, they rejected the notion that economic growth would trickle down to the poor, and they proposed programs to redress inequities between and within nations. In an emerging “women in development” movement, they positioned women as economic actors who could help lift families and nations out of destitution. In the more conservative 1980s, the war on global poverty turned decisively toward market-based projects in the private sector. Development experts and antipoverty advocates recast women as entrepreneurs and imagined microcredit—with its tiny loans—as a grassroots solution. Meyerowitz shows that at the very moment when the overextension of credit left poorer nations bankrupt, loans to impoverished women came to replace more ambitious proposals that aimed at redistribution.

Based on a wealth of sources, *A War on Global Poverty* looks at a critical transformation in antipoverty efforts in the late twentieth century and points to its legacies today.

**Corporate Human Rights Violations** Stefanie Khoury, David Whyte, 2016-12-08 This book develops an analysis of the historical, political and legal contexts behind current demands by NGOs and the United Nations Human Rights Council to hold corporations accountable for their human rights violations. Based on an analysis of the range of mechanisms of accountability that currently exist, it argues that those demands are a response to the failure of neo-liberal policies that have dominated the practice of politics and law since the emergence of this debate in its current form in the 1970s. Offering a new approach to understanding how struggles for hegemony are refracted through a range of legal challenges to corporate human rights violations, the book offers a fresh perspective for understanding how those struggles are played out in the global sphere. In order to analyse the prospects for using human rights law to challenge the right of corporations to author human rights violations, the book explores the development of a range of political initiatives in the UN, the uses of tort law in domestic courts, and the uses of human rights law at the European Court of Human Rights and at the Inter-American Court of Human Rights. This book will be essential reading for all those interested in how international institutions and NGOs are both shaping and being shaped by global struggles against corporate power.

**Cosmic Prayer and Guided Transformation** Robert Govaerts, 2012-08-29 This book presents a realistic and thoroughly spiritual outlook upon the entire created reality. It lets us envisage that various created entities are participant in a relationship with God that becomes increasingly one of an intimate personal quality; that is, a relationship of love. It thus invites discernment that the universal reality is valuable in its own right and not only as a good for the use of humanity. Drawing mainly

upon Scripture, ancient writers (especially Maximus the Confessor), as well as contemporary natural sciences, this book encourages the reader to perceive human salvation not as a lifting of humanity out of creation, but as a transformation into God's presence in the midst of the wider created order. It shows that Christian faith at its best does not exclude the wider creation but provides us with insight and hope for a harmonious being-in-God that is inclusive of creation. It shows that Christian faith can be a resource that helps overcome the ecological crisis.

**The Palgrave Handbook of African Political Economy** Samuel Ojo Oloruntoba, Toyin Falola, 2020-06-23 This handbook constitutes a specialist single compendium that analyses African political economy in its theoretical, historical and policy dimensions. It emphasizes the uniqueness of African political economy within a global capitalist system that is ever changing and complex. Chapters in the book discuss how domestic and international political economic forces have shaped and continue to shape development outcomes on the continent. Contributors also provoke new thinking on theories and policies to better position the continent's economy to be a critical global force. The uniqueness of the handbook lies in linking theory and praxis with the past, future, and various dimensions of the political economy of Africa.

**Governing Europe in a Globalizing World** Laurent Warlouzet, 2017-08-16 The complex relationship between globalization and European integration was largely shaped in the 1970s. During this decade, globalization began, for the first time, to threaten Western European prosperity. Using an innovative approach, the book shows how western Europeans coped with the challenges of globalization during a time of deep economic crisis during the period 1973-1986. It examines the evolution of economic and social policies at the national, European and global level and expands beyond the European Economic Community (EEC) by analysing the various solutions envisaged by European decision-makers towards regulating globalization, including the creation of the Single Market. Based on extensively examined archives of transnational actors, international organizations and focusing on the governments of France, Germany and the UK, as well as the European Commission, the book uncovers deep, previously unknown, economic divisions among these actors and the roles they played in the success of the EEC. This book will be of key interest to students, scholars and practitioners of political science, European studies, history, comparative politics, public

policy and economic history.
