The Political Economy of the Chinese Coal Industry Tim Wright,2012-03-12 Coal mining is one of China’s largest industries, and provides an excellent case study through which to consider the broader issues of China’s transition from socialism to capitalism, focussing on the shift to a market economy, the rise of rural industry and the situation of China’s working class. Coal was one of the pillars of the planned economy but, the author argues, its shift to market-based operations has been protracted and difficult, particularly in moving from the artificially low prices of the planned economy to market prescribed prices - a change that had a major impact on the industry’s financial performance. The book goes on to considers the growth of small rural coal mines as part of the Township and Village Enterprises (TVEs) programme; these small mines have brought prosperity to areas where small manufacturing enterprises are not competitive, but at the same time have been the cause of many social and environmental problems. It also examines the situation of coal miners - arguably one the most vulnerable segments of the Chinese working class - under socialism and under capitalism, paying particular attention to the issue of work safety and coal mine disasters. The book provides a comprehensive and coherent treatment of these issues from the establishment of the People’s Republic up to 2010.

Green Infrastructure in Chinese Cities Ali Cheshmehzangi,2022-03-19 Since 2014, and the start of the New-type Urbanization Plan (NUP), we see a turning point in the sustainability agenda of China. One of the main indicators is greening cities and the built environments, which will be covered holistically in this edited book. From the perspective of green infrastructure, in particular, the book approaches key areas of ‘forest city development’, ‘sponge city program’, ‘green roofing’, ‘nature-based solutions’, ‘urban farming’, ‘eco-city development’, etc. This is the first time that such important areas of research come together under the perspective of green Infrastructure. The results would be beneficial to policymakers, practitioners, and researchers in China and across the globe. The comprehensive set of findings from this book will benefit other countries, as we aim to highlight some of the best practices of the current age. The main aim of the book is to put together an excellent group of scholars and practitioners from the field, focusing on the topic of ‘Green Infrastructure in Chinese Cities’. In doing so, we aim to cover some of the key ‘best practices’ for sustainable urbanism. Divided into four parts, the book covers four key areas of (1) Policy Interventions, (2) Planning Innovation, (3) Design Solutions, and (4) Technical Integration. In doing so, we cover an array of best practices related to green infrastructures of various types and their impacts on cities and communities in China. We expect the book to be a valuable resource for researchers in the areas of sustainability, urbanism, urban planning, urban geography, urban design, geographical sciences, environmental sciences, landscape architecture, and urban ecology. The book covers essential factors such as policy, regulations, and programs (in Part 1), planning paradigms and their impacts on urban development (in Part 2), integrated design solutions that suggest sustainable urbanization progression (in Part 3), and technical knowledge that would be utilized for the future development of green infrastructure practices in China and beyond. Lastly, this edited book aims to provide a collaborative opportunity for experts and researchers of the field, who could contribute to the future pathways of sustainable urbanization of China. Lessons extracted from these contributions could be utilized for other contexts, which will benefit a wider group of stakeholders.

A Rural Revolution David R Roberts,2016-01-28 Take one family, a Staffordshire village and a society going through changes of world-shaking proportions. Add a nasty road traffic accident, a family of seventeen children, a notorious canal murder, a prevailing aristocratic connection, a riot of cross-dressing men, a narcoleptic delivery driver and a cycling regiment sent to the most dangerous place on earth. What you get is a fresh perspective on the history of Britain from the mid-1700s to the First World War and beyond, a period of rapid and momentous change that overturned British society. Seen through the lives and work of the ordinary people involved, it is also the true story of several generations of a single family and their adoptive village. From itinerant boat people to respected locals, Nel’s family is transformed by the world’s first

industrial revolution and its aftermath. It's all change for her rural community, too. Tracing a crucial historical journey, David R Roberts shows it wasn't only the people trapped in Britain's dark mills and smoky towns who faced the upheavals and challenges of the times. The physical and social contours of Nel's village, and of the entire nation, were redrawn by the booms in road and canal construction and the coming of the railways. The author's entertaining accounts of these revolutionary developments in transport and communications show how they impacted on everything from where and how we live to fish and chips and football. Also revealed are stories of child mortality and rural depopulation, of wealthy merchants and the slave trade, of 19th century bankers bailed out with public funds, and of enduring tragedies of the Great War. Along the way there are brief histories of inns and alehouses, land enclosures, early mass education, the suffragettes, the significance of salt, and more.

Orientalism and Conspiracy Arndt Graf,Schirin Fathi,Ludwig Paul,2010-11-30 The relationship between Islam and the West has frequently been subject to misunderstanding and mistrust and recent events in the international arena have only deepened this perceived divide, culturally and politically. The West often views the Islamic world - and the Islamic world the West - through a prism of mutual suspicion. In such conditions conspiracy, theories can flourish on both sides of the cultural fence, but these highly complex and important global phenomena have been the subject of surprisingly little investigation. *Orientalism and Conspiracy* explores fully for the first time the relationship between the sometimes controversial concept of Orientalism, as developed by Edward Said, and contemporary conspiracy theories, and includes Robert Irwin's fascinating survey of the role of secret societies in orientalist mythology. The authors offer a comprehensive and ground-breaking study of the conspiracy theory and Islam. It is essential reading for those seeking to understand historical and contemporary relationships between the East and West as well as the enduring and controversial legacy of the concept of Orientalism.

Be Light Samuel Rodriguez,2017-02-21 The Blueprint for Overcoming Darkness and Living in God's Light... Our world unravels more each day. It feels as if we're drowning in a sea churning with greed, violence, and lust. As darkness advances, hope dims. Yet within that reality, God gives us a profound mandate... *Be Light* Light has always defined God and His followers. At creation, God spoke light into existence. Jesus is the light of the world. And we are born to absorb and then reflect God's light. In *Be Light* Samuel Rodriguez—described by Fox News and CNN as “America's most influential Latino Evangelical leader”—provides a blueprint for confronting darkness in every realm of our lives. He issues a clarion call for individual believers and the church to rise up and once again be that bright city on a hill that doesn't simply expose the invading darkness, but overcomes it with God's blazing light. “When we share the message of Jesus, the candles of others are lit and more and more darkness is driven out of our world. Our prayer is that this excellent book will inspire millions—including you—to *Be Light*.” —Roma Downey, producer and actress
