It reflects the progress of E-learning, with discussion about tools, techniques, improvements and potentials for long-distance learning. The book is dedicated to methodologies and tools employed for E-learning, keeping in mind collaborative methodologies and specific environments. It also provides an analysis on E-learning, highlighting researches about E-learning features and assessment of different methodologies. Lastly, it discusses recent advancements in E-learning, stressing on topics like knowledge enhancement in virtual environments, novel schemes for architectures in tutorial systems and presenting various case studies.

**Moving to Linux** Marcel Gagné,2004 This is not a book for techies! It's a book for people like you: people who write documents, create spreadsheets, surf the Web, send emails, listen to CDs, play games, and want to do it simply in Linux, without becoming technical experts! Convert your Windows PC to a Linux system that does more for less money, one step at a time.

**Linux in a Nutshell** Ellen Siever,Aaron Weber,Stephen Figgins,Robert Love,Arnold Robbins,2005 Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick

access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in Linux in a Nutshell are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, Linux in a Nutshell brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is

referenced here, and they will turn to this book again and again.

*Alan Bennett* Alan Bennett,2005-10-01 Features the stories - The Lady in the Van, The Clothes They Stood Up In, The Laying On of Hands, and Father! Father! Burning Bright.

**The Internet Book** Douglas E. Comer,2018-09-03 The Internet Book, Fifth Edition explains how computers communicate, what the Internet is, how the Internet works, and what services the Internet offers. It is designed for readers who do not have a strong technical background – early chapters clearly explain the terminology and concepts needed to understand all the services. It helps the reader to understand the technology behind the Internet, appreciate how the Internet can be used, and discover why people find it so exciting. In addition, it explains the origins of the Internet and shows the reader how rapidly it has grown. It also provides information on how to avoid scams and exaggerated marketing claims. The first section of the book introduces communication system concepts and terminology. The second section reviews the history of the Internet and its incredible growth. It

documents the rate at which the digital revolution occurred, and provides background that will help readers appreciate the significance of the underlying design. The third section describes basic Internet technology and capabilities. It examines how Internet hardware is organized and how software provides communication. This section provides the foundation for later chapters, and will help readers ask good questions and make better decisions when salespeople offer Internet products and services. The final section describes application services currently available on the Internet. For each service, the book explains both what the service offers and how the service works.

About the Author Dr. Douglas Comer is a Distinguished Professor at Purdue University in the departments of Computer Science and Electrical and Computer Engineering. He has created and enjoys teaching undergraduate and graduate courses on computer networks and Internets, operating systems, computer architecture, and computer software. One of the researchers who contributed to the Internet as it was being formed in the late 1970s and 1980s, he has served as a member of the Internet Architecture Board, the group responsible for guiding the Internet's development. Prof. Comer is an internationally recognized expert

on computer networking, the TCP/IP protocols, and the Internet, who presents lectures to a wide range of audiences. In addition to research articles, he has written a series of textbooks that describe the technical details of the Internet. Prof. Comer's books have been translated into many languages, and are used in industry as well as computer science, engineering, and business departments around the world. Prof. Comer joined the Internet project in the late 1970s, and has had a high-speed Internet connection to his home since 1981. He wrote this book as a response to everyone who has asked him for an explanation of the Internet that is both technically correct and easily understood by anyone. An Internet enthusiast, Comer displays INTRNET on the license plate of his car.

Sailing to Byzantium Robert Silverberg, 2013-05-14 Six science fiction novellas by the author hailed as “a master” by Robert Jordan—including two Nebula Award winners and two finalists. Robert Silverberg’s novellas open the door to new worlds: In “Born with the Dead,” a woman wills her body to be “rekindled” after death, allowing her to walk among the living, while her husband is left in the impossible position of accepting her death when he can still see her. In the Nebula Award-nominated story “Homefaring,” the time-traveling narrator finds himself trapped in the consciousness of a lobsterlike creature of the far future, leading him to reflect on what it means to be human. And in the collection’s Nebula Award-winning title story, the Earth of the fiftieth century is a place where time is elusive and fluid, and young citizens live as tourists in ancient cities. “When Silverberg is at the top of his form, no one is better,” says George R. R. Martin. Also including Nebula Award finalist “The Secret Sharer,” as well as “Thomas the Proclaimer” and “We Are for the Dark, this collection offers an engrossing exploration of the work of this Grand Master, hailed by the New York Times Book Review as “the John Updike of science fiction.” This ebook features an illustrated biography of Robert

Silverberg including rare images and never-before-seen documents from the author's personal collection.
