Essentials of Business Analytics Bhimasankaram Pochiraju,Sridhar Seshadri,2019-07-10 This comprehensive edited volume is the first of its kind, designed to serve as a textbook for long-duration business analytics programs. It can also be used as a guide to the field by practitioners. The book has contributions from experts in top universities and industry. The editors have taken extreme care to ensure continuity across the chapters. The material is organized into three parts: A) Tools, B) Models and C) Applications. In Part A, the tools used by business analysts are described in detail. In Part B, these tools are applied to construct models used to solve business problems. Part C contains detailed applications in various functional areas of business and several case studies. Supporting material can be found in the appendices that develop the pre-requisites for the main text. Every chapter has a business orientation. Typically, each chapter begins with the description of business problems that are transformed into data questions; and methodology is developed to solve these questions. Data analysis is conducted using widely used software, the output and results are clearly explained at each stage of development. These are finally transformed into a business solution. The companion website provides examples, data sets and sample code for each chapter.

Team Geek Brian W. Fitzpatrick,Ben Collins-Sussman,2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you've spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

Essential Guide to Educational Supervision in Postgraduate Medical Education Nicola Cooper,Kirsty Forrest,2009-04-01 The world of postgraduate medical education is changing, and educational supervisors need the knowledge and skills to be able to do their job effectively. Many of those who want to do this job well feel unprepared for the task. Essential Guide to Educational Supervision is a handbook for educational supervisors everywhere. The topics covered are generic to medical education, whatever the specialty. Although the focus is on postgraduate medical education, many of the topics in this book are also applicable to undergraduates. Essential Guide to Educational Supervision is written for: Consultants and General Practitioners who work with trainees Educational supervisors People who organise postgraduate training programmes Written by experts in their field, each chapter gives an overview of key topics in educational supervision with references and further resources. The book provides evidence and theory when applicable, but is deliberately practical, with case studies and tips for good practice as well.

Manual for the Production of Statistics on the Digital Economy United Nations Publications,2021 The United Nations Conference on Trade and Development (UNCTAD) is a founding member of the Partnership on Measuring ICT for Development, which is an international, multi-stakeholder initiative to improve the availability and quality of ICT data and indicators. One of its key achievements is the development of a core list of ICT indicators for the production of internationally comparable statistics. This list was first endorsed by the United Nations Statistical Commission at its 38th session in March 2007 and has since been updated regularly. The Commission encouraged countries to use that list in their data collection programmes; a first version of the Manual for the Production of Statistics on the Information Economy was published at the end of 2007. An updated version was published in 2009. The current edition, entitled Manual for the Production of Statistics on the Digital Economy, was prepared to reflect the many changes that have taken place in the past decade in terms of access and use of ICTs. Compared to earlier versions, it expands the coverage of the measurement of e-commerce, trade in ICT services and trade in ICT-enabled (or digitally delivered) services. It contains more model questionnaires and reflects the most recent revisions of the Partnership's list of core ICT indicators. The Manual is intended to guide statisticians from developing countries through all the steps involved in the production and dissemination of statistics related to e-commerce and the digital economy.

Industry 4.0 and Regional Transformations Lisa De Propris,David Bailey,2020-04-07 This edited volume brings together a group of expert contributors to explorebthe opportunities and the challenges that Industry 4.0 (smart manufacturing) is likely to pose for regions, fi rms and jobs in Europe. Drawing on theory and empirical cases, it considers emerging issues like servitization, new innovation models for local production systems and the increase in reshoring. Industry 4.0 and Regional Transformations captures the complexity of this new manufacturing model in an accessible way and considers its implications for the future. It will be essential reading for advanced students and researchers and policy makers in regional studies, industrial policy, economic geography, innovation studies, operations management and engineering.

Embedded Linux Primer Christopher Hallinan,2010-10-26 Up-to-the-Minute, Complete Guidance for Developing Embedded Solutions with Linux Linux has emerged as today's #1 operating system for embedded products. Christopher Hallinan's Embedded Linux Primer has proven itself as the definitive real-world guide to building efficient, high-value, embedded systems with Linux. Now, Hallinan has thoroughly updated this highly praised book for the newest Linux kernels, capabilities, tools, and hardware support, including advanced multicore processors. Drawing on more than a decade of embedded Linux experience, Hallinan helps you rapidly climb the learning curve,

whether you're moving from legacy environments or you're new to embedded programming. Hallinan addresses today's most important development challenges and demonstrates how to solve the problems you're most likely to encounter. You'll learn how to build a modern, efficient embedded Linux development environment, and then utilize it as productively as possible. Hallinan offers up-to-date guidance on everything from kernel configuration and initialization to bootloaders, device drivers to file systems, and BusyBox utilities to real-time configuration and system analysis. This edition adds entirely new chapters on UDEV, USB, and open source build systems. Tour the typical embedded system and development environment and understand its concepts and components. Understand the Linux kernel and userspace initialization processes. Preview bootloaders, with specific emphasis on U-Boot. Configure the Memory Technology Devices (MTD) subsystem to interface with flash (and other) memory devices. Make the most of BusyBox and latest open source development tools. Learn from expanded and updated coverage of kernel debugging. Build and analyze real-time systems with Linux. Learn to configure device files and driver loading with UDEV. Walk through detailed coverage of the USB subsystem. Introduces the latest open source embedded Linux build systems. Reference appendices include U-Boot and BusyBox commands.

Everyday Aesthetics Katya Mandoki,2016-04-22 Katya Mandoki advances in this book the thesis that it is not only possible but crucial to open up the field of aesthetics (traditionally confined to the study of art and beauty) toward the richness and complexity of everyday life. She argues that in every process of communication, whether face to face or through the media, fashion, and political propaganda, there is always an excess beyond the informative and functional value of a message. This excess is the aesthetic. Following Huizinga's view of play as an ingredient of any social environment, Mandoki explores how various cultural practices are in fact forms of playing since, for the author, aesthetics and play are Siamese twins. One of the unique contributions of this book is the elaboration and application of a semiotic model for the simultaneous analysis of social interactions in the four registers, namely visual, auditory, verbal and body language, to detect the aesthetic strategies deployed in specific situations. She argues that since the presentation of the self is targeted towards participants' sensibilities, aesthetics plays a key role in these modes of exchange. Consequently, the author updates important debates in this field to clear the way for a socio-aesthetic inquiry through contexts such as the family, school, medical, artistic or religious traditions from which social identities emerge.

The Multiplex in India Adrian Athique,Douglas Hill,2009-12-17 During the decade of its existence in India, the multiplex cinema has been very much a sign of the times – both a symptom and a symbol of new social values. Indicative of a consistent push to create a 'globalised' consuming middle class and a new urban environment, multiplex theatres have thus become key sites in the long-running struggle over cultural legitimacy and the right to public space in Indian cities. This book provides the reader with a comprehensive account of the new leisure infrastructure arising at the intersection between contemporary trends in cultural practice and the spatial politics that are reshaping the cities of India. Exploring the significance, and convergence, of economic liberalisation, urban redevelopment and the media explosion in India, the book demonstrates an innovative approach towards the cultural and political economy of leisure in a complex and rapidly-changing society. Key arguments are supported by up-to-date and substantive field research in several major metros and second tier cities across India. Accordingly, this book employs analytical frameworks from Media and Cultural Studies, and from Urban Geography and Development Studies in a wide-ranging examination of the multiplex phenomenon.

Distributed Denial of Service Attacks İlker Özçelik,Richard Brooks,2020-08-03 Distributed Denial of Service (DDoS) attacks have become more destructive, wide-spread and harder to control over time. This book allows students to understand how these attacks are constructed, the security flaws they leverage, why they are effective, how they can be detected, and how they can be mitigated. Students use software defined networking (SDN) technology to created and execute controlled DDoS experiments. They learn how to deploy networks, analyze network performance, and create resilient systems. This book is used for graduate level computer engineering instruction at Clemson University. It augments the traditional graduate computing curricula by integrating: Internet deployment, network security, ethics, contemporary social issues, and engineering principles into a laboratory based course of instruction. Unique features of this book include: A history of DDoS attacks that includes attacker motivations Discussion of cyber-war, censorship, and Internet black-outs SDN based DDoS laboratory assignments Up-to-date review of current DDoS attack techniques and tools Review of the current laws that globally relate to DDoS Abuse of DNS, NTP, BGP and other parts of the global Internet infrastructure to attack networks Mathematics of Internet traffic measurement Game theory for DDoS resilience Construction of content distribution systems that absorb DDoS attacks This book assumes familiarity with computing, Internet design, appropriate background in mathematics, and some programming skills. It provides analysis and reference material for networking engineers and researchers. By increasing student knowledge in security, and networking; it adds breadth and depth to advanced computing curricula.

Advances in Commercial Geography Carlos Garrocho,2020-03-02 Por primera vez se reúnen, en una publicación, los principales exponentes de la geografía contemporánea, como Brian J. L. Berry, Neil Wrigley, Richard Shearmur, Luc Anselin y Jim Simmons con el objetivo de analizar el pasado, presente y futuro de la geografía aplicada a las actividades comerciales y de servicios. Participan también destacados estudiosos mexicanos como Carlos Garrocho, José Antonio Álvarez Lobato, Tania Chávez y Zochitl Flores quienes abordan el contexto de las estructuras urbanas, vinculados a los avances en el análisis espacial, orientados a las actividades terciarias en el espacio intra-urbano, particularmente en ciudades mexicanas. Los autores analizan casos de estudio con el objetivo de explorar el futuro de la geografía comercial dentro de las ciudades, centrando su atención en las actividades terciarias. Además, el trabajo

muestra que en realidad no parece haber un consenso hacia el significado de la geografía comercial. Los autores señalan que los usos del término clúster se refieren a empresas aglomeradas terciarias y destacan que un clúster es la colocación de las entidades económicas independientes relacionadas de alguna manera, pero no están obligados por un solo propietario o administración específica, junto con la proximidad a los mercados de trabajo, el acceso a los clientes y los proveedores, reducir los costos de búsqueda de los consumidores, el seguimiento de los competidores, la disponibilidad de infraestructura y tierras a utilizar, la planificación, etcétera.
