Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Fire in the Valley Michael Swaine, Paul Freiberger, 2014-10-20 In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they launched from their garages a hobbyist movement that grew into an industry, and ultimately a social and technological revolution. What they did was invent the personal computer: not just a new device, but a watershed in the relationship between man and machine. This is their story. Fire in the Valley is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early

1980s, Swaine and Freiburger daily rubbed elbows with people like Steve Jobs and Bill Gates when they were creating the personal computer revolution. A rich story of colorful individuals, *Fire in the Valley* profiles these unlikely revolutionaries and entrepreneurs, such as Ed Roberts of MITS, Lee Felsenstein at Processor Technology, and Jack Tramiel of Commodore, as well as Jobs and Gates in all the innocence of their formative years. This completely revised and expanded third edition brings the story to its completion, chronicling the end of the personal computer revolution and the beginning of the post-PC era. It covers the departure from the stage of major players with the deaths of Steve Jobs and Douglas Engelbart and the retirements of Bill Gates and Steve Ballmer; the shift away from the PC to the cloud and portable devices; and what the end of the PC era means for issues such as personal freedom and power, and open source vs. proprietary software.

Troublemakers Leslie Berlin, 2017-11-07 Acclaimed historian Leslie Berlin's "deeply researched and dramatic narrative of Silicon Valley's early years...is a meticulously told...compelling history" (The New York Times) of the men and women who chased innovation, and ended up changing the world. *Troublemakers* is the gripping tale of seven exceptional men and women, pioneers of Silicon Valley in the 1970s and early 1980s. Together, they worked across generations, industries, and companies to bring technology from Pentagon offices and university laboratories to the rest of us. In doing so, they changed the world. "In this vigorous account...a sturdy, skillfully constructed work" (Kirkus Reviews), historian Leslie Berlin introduces the people and stories behind the birth of the Internet and the microprocessor, as well as Apple, Atari, Genentech, Xerox PARC, ROLM, ASK, and the iconic venture capital firms Sequoia Capital and Kleiner Perkins Caufield & Byers. In the space of only seven years, five major industries—personal computing, video games, biotechnology, modern venture capital, and advanced semiconductor logic—were born. "There is much to learn from Berlin's account, particularly that Silicon Valley has long provided the backdrop where technology, elite education, institutional capital, and entrepreneurship collide with incredible force" (The Christian Science Monitor). Featured among well-known Silicon Valley innovators are Mike Markkula, the underappreciated chairman of Apple who owned one-third of the company; Bob Taylor, who masterminded the personal computer; software entrepreneur Sandra Kurtzig, the first woman to take a technology company public; Bob Swanson, the cofounder of Genentech; Al Alcorn, the Atari engineer behind the first successful video game; Fawn Alvarez, who rose from the factory line to the executive suite; and Niels Reimers, the Stanford administrator who changed how university innovations reach the public. Together, these troublemakers rewrote the rules and invented the future.

Valley of Genius Adam Fisher, 2018-07-10 This is the most important book on Silicon Valley I've read in two decades. It will take us all back to our roots in the counterculture, and will remind us of the true nature of the innovation process, before we tried to tame it with slogans and buzzwords. -- Po Bronson, #1 New York Times bestselling author of *The Nudist on the Late Shift* and *Nurtureshock* A candid, colorful, and comprehensive oral history that reveals the secrets of Silicon Valley -- from the origins of Apple and Atari to the present day clashes of Google and Facebook, and all the start-ups and disruptions that happened along the way. Rarely has one economy asserted itself as swiftly--and as aggressively--as the entity we now know as Silicon Valley. Built with a seemingly permanent culture of reinvention, Silicon Valley does not fight change; it embraces it, and now powers the American economy and global innovation. So how did this omnipotent and ever-morphing place come to be? It was not by planning. It was, like many an empire before it, part luck, part timing, and part ambition. And part pure, unbridled genius... Drawing on over two hundred in-depth interviews, *Valley of Genius* takes readers from the dawn of the personal computer and the internet, through the heyday of the web, up to the very moment when our current technological reality was invented. It interweaves accounts of invention and betrayal, overnight success and underground exploits, to tell the story of Silicon Valley like it has never been told before. Read it to discover the stories that Valley insiders tell each other: the tall tales that are all, improbably, true.

Dogfight Fred Vogelstein,2013-11-12 This is the story of how Apple and Google have reshaped our world and redefined the meaning of content and how it is distributed. It begins with the iPhone, which has transformed the concept of what a smart phone can be. Now everyone wants one, or else a smart phone like it. Apple and Google are fighting to find a way to control the software that runs these phones so they can manage the content that runs on top of it. The battle has become vicious, although Google makes more than half the apps that run on Apple devices. There may be room for both, but the history of technology suggests that only one player will be dominant in the long term. Author Fred Vogelstein recounts that struggle and describes the impact it is having on the rest of the media and on technology. Filled with in-depth interviews of key players and behind-the-scenes accounts of corporate strategy, Dogfight is a must-read for anyone interested in the biggest societal and technological shift since the Industrial Revolution.
