Reliability and Life-Cycle Analysis of Deteriorating Systems Mauricio Sánchez-Silva,Georgia-Ann Klutke,2015-11-27 This book compiles and critically discusses modern engineering system degradation models and their impact on engineering decisions. In particular, the authors focus on modeling the uncertain nature of degradation considering both conceptual discussions and formal mathematical formulations. It also describes the basics concepts and the various modeling aspects of life-cycle analysis (LCA). It highlights the role of degradation in LCA and defines optimum design and operation parameters. Given the relationship between operational decisions and the

performance of the system's condition over time, maintenance models are also discussed. The concepts and models presented have applications in a large variety of engineering fields such as Civil, Environmental, Industrial, Electrical and Mechanical engineering. However, special emphasis is given to problems related to large infrastructure systems. The book is intended to be used both as a reference resource for researchers and practitioners and as an academic text for courses related to risk and reliability, infrastructure performance modeling and life-cycle assessment.

Agriculture and Climate Beyond 2015 Floor Brouwer, Bruce A.

McCarl, 2006-07-16 Interactions between agriculture, climate and patterns of land use are complex. Major changes in agriculture, and land use patterns are foreseen in the next couple of decades in response to shifts in climate, greenhouse gas management initiatives, population growth and other forces. The book explores key interactions between changes in agriculture, patterns of land use and efforts to reduce greenhouse emissions from agriculture. The volume is based on inter-disciplinary science and policy interactions, exploring the way land use may aid in addressing or be affected by the onset of climate change and alterations in food demand. Future forces shaping land use decisions are examined, and its sensitivity to climate change is highlighted. Patterns of land use and the agricultural role in climate change mitigation are explored. Also, policy and social responses to the new perspectives on future land use patterns are identified. The perspective of

the book is beyond the year 2015.

Museums in a Digital Age Ross Parry, 2013-01-11 The influence of digital media on the cultural heritage sector has been pervasive and profound. Today museums are reliant on new technology to manage their collections. They collect digital as well as material things. New media is embedded within their exhibition spaces. And their activity online is as important as their physical presence on site. However, 'digital heritage' (as an area of practice and as a subject of study) does not exist in one single place. Its evidence base is complex, diverse and distributed, and its content is available through multiple channels, on varied media, in myriad locations, and different genres of writing. It is this diaspora of material and practice that this Reader is intended to address. With over forty chapters (by some fifty authors and co-authors), from around the world, spanning over twenty years of museum practice and research, this volume acts as an aggregator drawing selectively from a notoriously distributed network of content. Divided into seven parts (on information, space, access, interpretation, objects, production and futures), the book presents a series of cross-sections through the body of digital heritage literature, each revealing how a different aspect of curatorship and museum provision has been informed, shaped or challenged by computing. *Museums in a Digital Age* is a provocative and inspiring guide for any student or practitioner of digital heritage.

Russia's Border Wars and Frozen Conflicts James J. Coyle, 2017-07-03 This book examines the origins and execution of Russian military and political activities in Moldova, Georgia, Ukraine, and Azerbaijan. Using a realist perspective, the author concludes that there are substantial similarities in the four case studies: Russian support for minority separatist movements, conflict, Russian intervention as peacekeepers, Russian control over the diplomatic process to prevent resolution of the conflict, and a perpetuation of Russian presence in the area. The author places the conflicts in the

context of international law and nationalism theory.
