Danny and the Dinosaur Syd Hoff, 2014-05-27 Syd Hoff's comical, charming illustrations will delight readers young and old alike in this beloved classic I Can Read about a boy and his best friend, a dinosaur. Danny loves dinosaurs! When he sees one at the museum and says, It would be nice to play with a dinosaur, a voice answers, And I think it would be nice to play with you. So begins Danny and the Dinosaur's wonderful adventures together. For Danny and his prehistoric playmate, even the most everyday activities become extraordinary, like finding a big-enough place to hide a dinosaur in a game of hide-and-seek. But Danny can teach an old dinosaur new tricks. It's the most fun this dinosaur has had in a hundred million years! Originally published over 50 years ago, this beloved classic is a Level 1 I Can Read that is perfect for the beginning reader learning to sound out words and sentences. Whether shared at home or in a classroom, the short sentences, familiar words, and simple concepts of Level One books support success for children eager to start reading on their own.

Applied Corporate Finance Aswath Damodaran, 2014-10-27 Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied

Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Social Work with Substance Users Anna

Nelson, 2011-10-18 This book offers a new approach to help students to understand problematic substance use across a range of social work practice settings. Written from both an anti-discriminatory and evidence-based perspective, the book highlights successful responses to the issues. Each chapter includes reflective exercises and examples of further reading, challenging students to critically reflect on their practice. The book provides a detailed understanding of: Historical and current policy relating to prohibition and drug use A range of substances and their potential effects on service users Models of best practice including screening and assessment, brief intervention, motivation approaches and relapse prevention Particular issues and needs of a diverse range of service user groups This will be an essential text for social work students taking courses in substance use and addiction. It will also be valuable reading for qualified social workers and students taking related courses across the health and social care field.

Managing the Telecommuting Employee Michael

Amigoni, Sandra Gurvis, 2009-10-18 A bigger and bigger part of the workforce is telecommuting. And managers need new skills to get the most out of this increasingly far-flung staff. This

indispensable guide includes case studies, checklists, and sample forms and charts. It shows managers how to use teleconferencing technology to communicate with distanced workers, make the best use of scheduling software to monitor productivity, and even end the arrangement if it's not working. One of the best ways for companies to save money in lean times is to send their employees home to work. But that requires a different kind of workforce and a different kind of management. This book shows how to make the long-distance relationship work for everyone!

Agrarian change in tropical landscapes Liz Deakin, Mrigesh Kshatriya, Terry Sunderland, 2016-01-25 Agricultural expansion has transformed and fragmented forest habitats at alarming rates across the globe, but particularly so in tropical landscapes. The resulting land-use configurations encompass varying mosaics of tree cover, human settlements and agricultural land units. Meanwhile, global demand for agricultural commodities is at unprecedented levels. The need to feed nine billion people by 2050 in a world of changing food demands is causing increasing agricultural intensification. As such, market-orientated production systems are now increasingly replacing traditional farming practices, but at what cost? The Agrarian Change project, coordinated by the Center for International Forestry Research, explores the conservation, livelihood and food security implications of land-use and agrarian change processes at the landscape scale. This book provides detailed background information on seven multi-functional landscapes

in Ethiopia, Cameroon, Indonesia, Nicaragua, Bangladesh, Zambia and Burkina Faso. The focal landscapes were selected as they exhibit various scenarios of changing forest cover, agricultural modification and integration with local and global commodity markets. A standardized research protocol will allow for future comparative analyses between these sites. Each case study chapter provides a comprehensive description of the physical and socioeconomic context of each focal landscape and a structured account of the historical and political drivers of land-use change occurring in the area. Each case study also draws on contemporary information obtained from key informant interviews, focus group discussions and preliminary data collection regarding key topics of interest including: changes in forest cover and dependency on forest products, farming practices, tenure institutions, the role and presence of conservation initiatives, and major economic activities. The follow-on empirical study is already underway in the landscapes described in this book. It examines responses to agrarian change processes at household, farm, village and landscape levels with a focus on poverty levels, food security, dietary diversity and nutrition, agricultural yields, biodiversity, migration and land tenure. This research intends to provide much needed insights into how landscape-scale land-use trajectories manifest in local communities and advance understanding of multi-functional landscapes as socioecological systems.

Applied Pedagogies for Higher Education Dawn A. Morley, Md Golam Jamil, 2020-11-05 This open access

book critiques real world learning across both the curriculum and extracurricular activities. Drawing on disciplines as diverse as business, health, fashion, sociology and geography, the editors and authors employ a cross-disciplinary approach to examine how this concept is being applied in higher education. Divided into three parts, the authors and contributors analyse broader applications of real world learning, student experience of practicing in a real world setting, and how learning strategies can be employed to engage students in real world learning. The editors and contributors provide up-to-date, cross-disciplinary and international insights into how real world learning could be integrated into the higher education curriculum to support effective, relevant and life-long learning for 21st century students.

Winning the War on War Joshua S.

Goldstein, 2012-07-31 “The most important political book of the year.”—Gregg Easterbrook, author of The Progress Paradox Everyone knows: wars are getting worse, more civilians are dying, and peacemaking achieves nothing, right? Wrong. Despite all the bad-news headlines, peacekeeping is working. Fewer wars are starting, more are ending, and those that remain are smaller and more localized. But peace doesn’t just happen; it needs to be put into effect. Moreover, understanding the global decline in armed conflict is crucial as America shifts to an era of lower military budgets and operations. Preeminent scholar of international relations, Joshua Goldstein,

definitively illustrates how decades of effort by humanitarian aid agencies, popular movements—and especially the United Nations—have made a measureable difference in reducing violence in our times. Goldstein shows how we can continue building on these inspiring achievements to keep winning the war on war. This updated and revised edition includes more information on a post-9-11 world, and is a perfect compendium for those wishing to learn more about the United States' armed conflicts in Iraq and Afghanistan.

Perovskite Photovoltaics Aparna Thankappan, Sabu Thomas, 2018-06-29 *Perovskite Photovoltaics: Basic to Advanced Concepts and Implementation* examines the emergence of perovskite photovoltaics, associated challenges and opportunities, and how to achieve broader development. Consolidating developments in perovskite photovoltaics, including recent progress solar cells, this text also highlights advances and the research necessary for sustaining energy. Addressing different photovoltaics fields with tailored

content for what makes perovskite solar cells suitable, and including commercialization examples of large-scale perovskite solar technology. The book also contains a detailed analysis of the implementation and economic viability of perovskite solar cells, highlighting what photovoltaic devices need to be generated by low cost, non-toxic, earth abundant materials using environmentally scalable processes. This book is a valuable resource engineers, scientists and researchers, and all those who wish to broaden their knowledge on flexible perovskite solar cells. Includes contributions by leading solar cell academics, industrialists, researchers and institutions across the globe Addresses different photovoltaics fields with tailored content for what makes perovskite solar cells different Provides commercialization examples of large-scale perovskite solar technology, giving users detailed analysis on the implementation, technical challenges and economic viability of perovskite solar cells

User Interface Design for Virtual Environments: Challenges and Advances Khan, Badrul, 2011-12-31
The design of various virtual environments should be based on the needs of a diverse population of users around the globe. Interface design should be user centric and should strive for making the user's interaction as simple, meaningful, and efficient as possible. *User Interface Design for Virtual Environments: Challenges and Advances* focuses on challenges that designers face in creating interfaces for users of various virtual environments. Chapters included in this book

address various critical issues that have implications for user interface design from a number of different viewpoints. This book is written for professionals who want to improve their understanding of challenges associated with user interface design issues for globally-dispersed users in various virtual environments.

Stereotactic Body Radiation Therapy Simon S. Lo, Bin S. Teh, Jiade J. Lu, Tracey E. Schefter, 2012-08-28 Stereotactic body radiation therapy (SBRT) has emerged as an important innovative treatment for various primary and metastatic cancers. This book provides a comprehensive and up-to-date account of the

physical/technological, biological, and clinical aspects of SBRT. It will serve as a detailed resource for this rapidly developing treatment modality. The organ sites covered include lung, liver, spine, pancreas, prostate, adrenal, head and neck, and female reproductive tract. Retrospective studies and prospective clinical trials on SBRT for various organ sites from around the world are examined, and toxicities and normal tissue constraints are discussed. This book features unique insights from world-renowned experts in SBRT from North America, Asia, and Europe. It will be necessary reading for radiation oncologists, radiation oncology residents and fellows, medical physicists, medical physics residents, medical oncologists, surgical oncologists, and cancer scientists.

The Everyday Life of Global Finance Paul Langley, 2008-05-08 In the US and UK, saving and borrowing routines have changed radically and become closely bound-up with the capital markets of global finance. As mutual funds have increased in popularity and pension provision has been transformed, many more individuals and households have come to invest in stocks and shares. As consumer borrowing has risen dramatically and mortgage finance has been extended to those deemed sub-prime, so the repayments of credit card holders and mortgagors have provided the basis for the issue and trading of bonds and other market instruments. *The Everyday Life of Global Finance* explores the unprecedented relationships that now bind society and the markets, challenging the dominant tendency to simply position recent

developments in Wall Street and the City of London at the centre of contemporary finance. Grounded in literature from the sociology of finance and international political economy, drawing on the social theory of Callon, Foucault, and Latour, and informed by extensive empirical research, the book shows how global finance has become mundane and ordinary in Anglo-America. Finance is not 'out there somewhere', but is embedded in the calculative technologies and performances of reconfigured saving and borrowing networks, and is embodied through the assembly of everyday financial identities and self-disciplines. Society's new-found relationships with the financial markets are also shown, however, to be marked by stark inequalities, manifest contradictions, and political dissent. The Everyday Life of Global Finance is thus an ambitious and innovative contribution to our understanding of the contemporary financial world.

Shattered Hopes Josh Ruebner, 2014-10-07

President Barack Obama's first trip abroad in his second term took him to Israel and the Palestinian West Bank, where he despondently admitted to those waiting for words of encouragement, "It is a hard slog to work through all of these issues."

Contrast this gloomy assessment with Obama's optimism on the second day of his first term, when he appointed former Senate Majority Leader George Mitchell as his special envoy for Middle East peace, boldly asserting that his administration would "actively and aggressively seek a lasting peace between Israel and the Palestinians." How is it that Obama's active and aggressive search for

progress has become mired in the status quo? Writer and political analyst Josh Ruebner charts Obama's journey from optimism to frustration in the first hard-hitting investigation into why the president failed to make any progress on this critical issue, and how his unwillingness to challenge the Israel lobby has shattered hopes for peace. Written in a clear and accessible style by the advocacy director of a national peace organization and former Middle East analyst for the Congressional Research Service, *Shattered Hopes* offers an informed history of the Obama administration's policies and maps out a true path forward for the United States to help achieve Israeli-Palestinian peace.

Hamas Rule in Gaza: Human Rights under Constraint T. Mukhimer, 2016-04-14 Developing a normative framework for evaluating non-state actors in the absence of formally binding obligations, this study is the first detailed human rights analysis of Hamas conduct and governance in the Gaza Strip.

It Takes a Pillage Nomi Prins, 2009-10-02 A former Wall Street manager turned muckraking journalist gets inside how the banks looted the Treasury, stole the bailout, and continued with business as usual We all watched as packs of former Big Financiers commandeered posts in Washington and lavished trillions in bailouts to save big Wall Street firms that used that money for anything and everything except to fill in Main Street's potholes. We all watched as Wall Street heavyweights fought tooth and nail to declaw financial reform and won. Former Wall Streeter

Nomi Prins has been watching, too, and she is not going to let them get away with it. More than just an angry populist, commentator stuck on the sidelines, Prins understand Big Finance and big money and big schemes-and in this book she exposes the fundamental follies of our economic system and the schemes of the bigwigs who have no intention of letting it change. Remarkably combines detail, clarity, and narrative momentum, revealing all the ways in banks gamed the system to get the most money with the least oversight. Exposes the power-bankers who bagged more than \$5 billion in compensation before and after their companies grabbed more than a trillion dollars in federal bailout subsidies-and how the government's indignation at this didn't lead to change. Shows how the most egregious pillagers work at the Fed and Treasury department, detailing how Hank Paulson, Ben Bernanke, and Tim Geithner siphoned off \$10.7 trillion from the public's future for Big Finance's present, all the while telling us it was for our own good. Slams a financial system that will not change, if our government doesn't force it to change, no matter what happens in the so-called free market and why the 'sweeping' financial reform bill passed after Wall Street reconsolidated its power, is anything but sweeping or reformative. Written by a former managing director at Goldman Sachs, now a senior fellow at Demos, who writes regularly on corruption in Washington and Wall Street for news outlets ranging from Fortune to Mother Jones. If you're still enraged and frustrated with how the bank bailout went bust for the American people, or how

Wall Street continues to operate as if the rest of the world doesn't matter, or how the banks are once again rolling in outsized profits and obscene bonuses while average Americans continue to struggle through a bleak landscape of foreclosures and job loss, *It Takes a Pillage* gives voice to your outrage, and provides a deeper insight into what we really have to be angry about and how we can fight for some real change.
