Citizen Publications in China Before the Internet S. Jiang,2015-06-16 This book presents the first panoramic study of minkan (citizen publications) in China before the Internet. This recent history of citizen publications contributes to the reclamation of a lost past of resistance. It is an exercise in remembering a past that has been marginalized by official history and recovering ideas obliterated by state power.

Confinement and Ethnicity Jeffery F. Burton,Mary M. Farrell,Lord,Richard W. Lord,2011-07-01 Confinement and Ethnicity documents in unprecedented detail the various facilities in which persons of Japanese descent living in the western United States were confined during World War II: the fifteen "assembly centers" run by the U.S. Army's Wartime Civil Control Administration, the ten "relocation centers" created by the War Relocation Authority, and the internment camps, penitentiaries, and other sites under the jurisdiction of the Justice and War Departments. Originally published as a report of the Western Archeological and Conservation Center of the National Park Service, it is now reissued in a corrected edition, with a new Foreword by Tetsuden Kashima, associate professor of American ethnic studies at the University of Washington. Based on archival research, field visits, and interviews with former residents, Confinement and Ethnicity provides an overview of the architectural remnants, archeological features, and artifacts remaining at the various sites. Included are numerous maps, diagrams, charts, and photographs. Historic images of the sites and their inhabitants -- including several by Dorothea Lange and Ansel Adams -- are combined with photographs of present-day settings, showing concrete foundations, fence posts, inmate-constructed drainage ditches, and foundations and parts of buildings, as well as inscriptions in Japanese and English written or scratched on walls and rocks. The result is a unique and poignant treasure house of information for former residents and their descendants, for Asian American and World War II historians, and for anyone interested in the facts about what the authors call these "sites of shame."

Shaping Sustainable Fashion Alison Gwilt,Timo Rissanen,2012-06-25 The production, use and eventual disposal of most clothing is environmentally damaging, and many fashion and textile designers are becoming keen to employ more sustainable strategies in their work. This book provides a practical guide to the ways in which designers are creating fashion with less waste and greater durability. Based on the results of extensive research into lifecycle approaches to sustainable fashion, the book is divided into four sections: source: explores the motivations for the selection of materials for fashion garments and suggests that garments can be made from materials that also assist in the management of textile waste make: discusses the differing approaches to the design and manufacture of sustainable fashion garments that can also provide the opportunity for waste control and minimization use: explores schemes that encourage the consumer to engage in slow fashion consumption last: examines alternative solutions to the predictable fate of most garments – landfill. Illustrated throughout with case studies of best practice from international designers and fashion labels and written in a practical, accessible style, this is a must-have guide for fashion and textile designers and students in their areas.

Recent Research inPolymerization Nevin Çankaya,2018-01-17 The purpose of this book is to help you concentrate on recent developments in polymerization. The chapters collected in the book are contributions by invited researchers with a long-standing experience in different research areas. I hope that the material presented here is understandable to a broad audience, not only chemists but also scientists from various disciplines. The book contains nine chapters in three sections: (1) General Information about Polymerization, (2) Biomaterial Content Polymer Composites, and (3) Mechanical Properties of Polymerization. The book provides detailed and current reviews in these different areas written by experts in their respective fields. This book is expected to be useful for polymer workers and other scientists alike and contribute to the training of current and future researchers, academics, PhD degree students, as well as other scientists.

The Horrors of Trauma in Cinema Michael Elm,Kobi Kabalek,Julia B. Köhne,2014-10-02 This volume explores the multifaceted depiction and staging of historical and social traumata as the result of extreme violence within national contexts. It focuses on Israeli-Palestinian, German and (US) American film, and reaches out to cinematic traditions from other countries like France, Great Britain and the former USSR. International and interdisciplinary scholars analyze both mainstream and avant-garde movies and documentaries premiering from the 1960s to the present. From transnational and cross-genre perspectives, they query the modes of representation – regarding narration, dramaturgy, aesthetics, mise-en-scène, iconology, lighting, cinematography, editing and sound – held by film as a medium to visualize shattering experiences of violence and their traumatic encoding in individuals, collectives, bodies and psyches. This anthology uniquely traces horror aesthetics and trajectories as a way to reenact, echo and question the perpetual loops of trauma in film cultures. The contributors examine the discursive transfer between historical traumata necessarily transmitted in a medialized and conceptualized form, the changing landscape of (clinical) trauma theory, the filmic depiction and language of trauma, and the official memory politics and hegemonic national-identity constructions.

The Architecture of Fundamental Rights in the European Union Šejla Imamovic,2022-02-10 This book analyses the new architecture for the protection of fundamental rights in Europe after the entry into force of the Lisbon Treaty. As a starting point, it identifies how the EU has gained a prominent role in promoting and protecting fundamental rights at European level despite the absence of an unlimited mandate to address fundamental rights violations. This new setting affects the traditional relationship between the EU, the ECHR system and the Member States and, in the absence of EU accession to the ECHR, enhances the risk of tensions and conflicts between the case law of the two European Courts. Examples of these tensions and conflicts are explored in the Area of Freedom Security and Justice, which is one of the most fundamental rights-sensitive areas of EU law and one of the busiest areas of activity for the CJEU. The book offers new insights into existing rules on the resolution of conflicts between EU and ECHR law before mapping out techniques actually used by domestic courts to avoid or address such conflicts.

The New Behaviorism John Staddon,2014-03-05 This groundbreaking book presents a brief history of behaviorism, the dominant movement in American psychology in the first half of the 20th Century. It then analyzes and criticizes radical behaviorism, as pioneered by B.F. Skinner, and its philosophy and applications to social issues. This second edition is a completely rewritten and much expanded version of the first edition, published nearly 15 years earlier. It surveys what changes have occurred within behaviorism and whether it has maintained its influence on experimental cognitive psychology or other fields. The mission of the book is to help steer experimental psychology away from its current undisciplined indulgence in mental life toward the core of science, which is an economical description of nature. The author argues that parsimony -- the elementary philosophical distinction between private and public events, even biology, evolution and animal psychology -- all are ignored by much contemporary cognitive psychology. The failings of radical behaviorism as well as a philosophically defective cognitive psychology point to the need for a new theoretical behaviorism, which can deal with problems such as consciousness that have been either ignored, evaded or muddled by existing approaches. This new behaviorism provides a unified framework for the science of behavior that can be applied both to the laboratory and to broader practical issues such as law and punishment, the health-care system, and teaching.

Humanitarian Military Intervention Taylor B. Seybolt, 2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that are the defining cases of the 1990s—northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor—shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order about the need to use military force because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances.

The Maryland Colony: Lord Baltimore Jim Whiting, 2010-12-23 English nobleman George Calvert wanted to establish a colony in the New World—not one like his first colony, Newfoundland, which he found to be too cold. Instead he wanted land in the temperate Chesapeake Bay area, where his colonists could grow tobacco. King Charles I granted his wish. Named for Henrietta Mary, Charles's wife, the new colony of Maryland was established in 1634. Also known as Lord Baltimore, Calvert was a Catholic at a time when Protestants controlled the English government. He wanted Maryland to be a place where Catholics—and anyone else—could worship in freedom. As the British crown was passed through its heirs, favoring Protestants, then Catholics, then Protestants again, Maryland felt the ripples of unrest on its side of the Atlantic. Follow the story of how Maryland came to be a colony and how it fought for its borders with Virginia and Pennsylvania. Find out how in the end, it pulled together with those and the other colonies first to repel the encroaching French, and then to shrug off the tyranny of England.
