Creating the European Area of Higher Education Voldemar Tomusk, 2007-11-07 Since 1999 European higher education has been engaged in the most radical reform of its 900 years of history. This volume brings together a group of higher education researchers across Europe and looks into the implementation of the Bologna Process in the countries often attributed a peripheral status. In addition to cultural and political issues, the volume pays particular attention to the role of students as well as the changing position of the intellectuals under its impact.

Compendium of Terminology and Nomenclature of Properties in Clinical Laboratory Sciences Georges Férard, René Dybkaer, Xavier Fuentes-Arderiu, 2016-11-18 There has been significant expansion and development in clinical laboratory sciences and, in particular, metrological concepts, definitions and terms since the previous edition of this book was published in 1995. It is of prime importance to standardize laboratory reports for reliable exchange of patient examination data without loss of meaning or accuracy. New disciplines have appeared and the interrelationships between different disciplines within clinical laboratory sciences demand a common structure and language for data exchange, in the laboratory and with the clinicians, necessitating additional coverage in this book. These new sections will be based upon recommendations published by various national, regional, and international bodies especially IUPAC and IFCC. This book groups and updates the recommendations and will be appropriate for laboratory scientists, medical professionals and students in this area.

**Seeking Asylum in Israel** Gilad Ben-Nun, 2016-12-18 Since 2005, approximately 70,000 asylum-seeking refugees from Sudan and Eritrea have entered Israel. This, along with the highly publicised anti-African immigrant riots in Israel in 2012 and 2014 and the current global refugee crisis, has meant that the issue of African migration has become increasingly controversial. Here Gilad Ben-Nun looks at this phenomenon in its historical and contemporary contexts, and compares it to the wider debates surrounding the Palestinian refugees in the region and the concept of their right of return. He argues that this newer, African migration issue has forced Israel to move from conceiving of itself as an 'exceptional' state and now has to view itself as a more 'normal' and 'universal' entity. Ranging as far back as Israel's important role in the the ratification drafting of the 1951 Refugee Convention and drawing on a variety of methodologies and sources, Ben-Nun offers a wide-ranging legal, social and historical examination of asylum in Israel, that sheds timely light onto themes of migration and identity across the Middle East. This is essential reading for legal historians and lawyers, as well as scholars working on migration studies and the history and politics of the Middle East.

**US-China Relations in the Twenty-First Century** Michael Tai, 2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as

a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas – climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

*Algal Adaptation to Environmental Stresses* L.C. Rai,J.P.

Gaur,2012-12-06 Algae, generally held as the principal primary producers of aquatic systems, inhabit all conceivable habitats. They have great ability to cope with a harsh environment, e.g. extremely high and low temperatures, suboptimal and supraoptimal light intensities, low availability of essential nutrients and other resources, and high concentrations of toxic chemicals, etc. A multitude of physiological, biochemical, and molecular strategies enable them to survive and grow in stressful habitats. This book presents a critical account of various mechanisms of stress tolerance in algae, many of which may occur in microbes and plants as well.

### *Quality Assurance and Accreditation in Distance Education*

Insung Jung, Colin Latchem, 2012-04-05 Drawing on the knowledge and experience of leading managers, practitioners and researchers, research and case studies, this book provides a unique and comprehensive analysis of Quality Assurance (QA) concepts, approaches, models, issues, practices and research in ODL and ICT worldwide. The book is global in scope and covers both the developed and developing world. It considers the theory, research and practice of policy-making and implementation in QA and accreditation, and also the institutional and cultural acceptability of QA as well as the areas regarded as problematic. With the growth of cross-border education, institutions must provide evidence of the quality of their courses, teaching, learning and management systems for national and international accreditation. This exposes them to rigorous external review and requires their conformity with national and international regulatory environments and benchmarks. It also increases their awareness of, and responsiveness to, national and global quality standards. This edited collection provides policy-makers, ODL researchers, and Higher Education administrators with an invaluable resource on QA and accreditation models and policies from around the World--Provided by publisher

### **IMF-Supported Programs** Mr.Ashoka Mody, Mr.Alessandro

Rebucci, 2006-04-03 Research work by the IMF's staff on the effectiveness of the country programs the organization supports, which has long been carried out, has intensified in recent years. IMF analysts have sought to "open up the black box" by more closely examining program design and implementation, as well as how these influence programs' effectiveness. Their efforts have also focused on identifying the lending, signaling, and monitoring features of the IMF that may affect member countries' economic performance. This book reports on a large portion of both the new and the continuing research. It concludes that IMF programs work best where domestic politics and institutions permit the timely

implementation of the necessary measures and when a country is vulnerable to, but not yet in, a crisis. It points to the need for a wider recognition of the substantial diversity among IMF member countries and for programs to be tailored accordingly while broadly maintaining the IMF's general principle of uniformity of treatment.

### **Research, Quality, Competitiveness** Attilio

Stajano,2008-09-22 The European Union (EU) was launched as a response to the economic dominance of the United States and – to a lesser degree – the Soviet Union. The nations of Western Europe were too small to compete against large scale and diversified economies on their own. Six countries, eventually expanding to 27 (and counting), took a series of steps toward progressively deeper integration: the removal of internal tariffs, the construction of a common external tariff, the elimination of many (but not all) non-tariff barriers leading to a single market, and the adoption of a common currency by 15 of the member states. The EU today equals and even exceeds the U. S. on many key indicators of performance. In the process, two similar but nonetheless divergent models of social and economic life stand in contrast with each other. The U. S. is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the crueler aspects of the free-market. Until recently, the economic dynamism of the U. S. called into question whether the so-called European social model was sustainable in an era of globalization. The EU was slipping in competitiveness and was being challenged by new global powers like China and India. Although the U. S. economy has slowed, there is little indication that European countries are capable of leveraging the situation to their advantage.

### **Gendering the Knowledge Economy** S. Walby,H.

Gottfried,K. Gottschall,M. Osawa,2006-12-06 Comparing the UK, US, Germany and Japan, this book draws on innovative concepts of

varieties of gender regime as well as varieties of capitalism. The volume re-thinks the processes of de-gendering and re-gendering of working practices in the context of both de-regulation and re-regulation of employment.

Literature, Pedagogy, and Curriculum in Secondary Education

M. Martin Guiney, 2017-05-31 This book argues for the importance of literature studies using the historical debate between the disinterested disciplines ("art for art's sake") and utilitarian or productive disciplines. Forgoing the traditional argument that literature is a unique spiritual resource, as well as the utilitarian thought that literary pedagogy promotes skills that are relevant to a post-industrial economy, Guiney suggests that literary pedagogy must enable mutual access between the classroom and the outside world. It must recognize the need for every human being to become a conscious producer of culture rather than a consumer, through an active process of literary reading and writing. Using the history of French curricular reforms as a case study for his analysis, Guiney provides a contextualized redefinition of literature's social value.
