Church, State, and Democracy in Expanding Europe

Lavinia Stan, Lucian Turcescu, 2011-08-29 Lavinia Stan and Lucian Turcescu examine the relationship between religion and politics in ten former communist Eastern European countries. Contrary to widespread theories of increasing secularization, Stan and Turcescu argue that in most of these countries, the populations have shown themselves to remain religious even as they embrace modernization and democratization. Church-state relations in the new EU member states can be seen in political representation for church leaders, governmental subsidies, registration of religions by the state, and religious instruction in public schools. Stan and Turcescu outline three major models: the Czech church-state separation model, in which religion is private and the government secular; the pluralist model of Hungary, Bulgaria and Latvia, which views society as a group of complementary but autonomous spheres - for example, education, the family, and religion - each of which is worthy of recognition and support from the state; and the dominant religion model that exists in Poland, Romania, Estonia, and Lithuania, in which the government maintains informal ties to the religious majority. Church, State, and Democracy in Expanding Europe offers critical tools for understanding church-state relations in an increasingly modern and democratic Eastern Europe.

Libraries in the early 21st century, volume 2

Ravindra N. Sharma, IFLA Headquarters, 2012-07-30 Following the pattern of the first volume, the second volume of Libraries in the early 21st century: An international perspective extends the range of countries covered. Each chapter covers a different country and describes the modern history, development of libraries and library technology. The careful selection of countries

achieves good representation of professional library work on all continents. This two-volume work represents an excellent contribution to international librarianship and allows comparative studies both at graduate and professional level.

Brazil-India Renewable Energy Cooperation Maria Cândida Arrais de Miranda Mousinho, 2021-10-09 The book is a study of the cooperation of Brazil and India on renewable energy. It is based on a research project on the energy sector of both the countries. It discusses the agreements in the energy sector between the two countries and the renewable energy policies developed in four decades. A scientific and technological mapping, a brief study of competitiveness and a primary research were carried out in order to find out the weaknesses and the opportunities for cooperation in renewable energies. This Publication will undoubtedly provoke the reader to reflect on the importance of cooperation given the growing protectionism not only in terms of energy security, but also in terms of investments in new technologies considering energy transition scenario. For Brazil and India, intensifying the dialogue is more than a strategy of visibility and the search for greater space in worldwide geopolitics.

Realising REDD+ Arild Angelsen, 2009-01-01 REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as

agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

Gestão de recursos hídricos e energéticos

Maurício de Alcântara Marinho, 2020-04-03 A Série Universitária foi desenvolvida pelo Senac São Paulo com o intuito de preparar profissionais para o mercado de trabalho. Os títulos abrangem diversas áreas, abordando desde conhecimentos teóricos e práticos adequados às exigências profissionais até a formação ética e sólida. Gestão de recursos hídricos e energéticos apresenta um panorama das principais fontes e matrizes energéticas do Brasil, incluindo instrumentos legais e normativos e políticas públicas de incentivo à geração das energias alternativas e sustentáveis que vêm se consolidando nas últimas décadas. Este livro traz

noções sobre o uso racional e a conservação da energia e a importância do setor no tocante às medidas para minimizar os impactos resultantes das mudanças climáticas. Seu objetivo é proporcionar ao leitor uma visão geral sobre a abrangência e diversidade do setor energético, que se apresenta como um grande campo de atuação dos profissionais de gestão ambiental.

Canadian Warplanes Harold A. Skaarup, 2009-11
This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to Canadian service aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canada's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canada's Warplane survivors.

Handbook of Research on Changing Dynamics in Responsible and Sustainable Business in the Post-COVID-19 Era Popescu, Cristina Raluca

Gh., 2022-01-07 The COVID-19 pandemic has shocked every part of society. The rise of businesses to the important task of improving sustainability and responsibility has been interrupted by the stress of the pandemic. In its wake, organizational leaders must reassess the best strategies considering the changes made by the “new normal.” The Handbook of Research on Changing Dynamics in Responsible and Sustainable Business in the Post-COVID-19 Era provides valuable insight of the significant changes caused by the COVID-19 pandemic in terms of defining, characterizing, presenting, and understanding the meaning, challenges, and implications of responsible and sustainable business. Covering topics such as consumerism, supply chain management, and sustainable organizational performance, this major reference work is an excellent resource for academicians, scientists, researchers, students, business specialists, business leaders, consultants, government institutions, and policymakers.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times* Book Review • *Time* • NPR • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies,

climate wars and economic devastation. An “epoch-defining book” (The Guardian) and “this generation’s Silent Spring” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. The *Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s.

LONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD “*The Uninhabitable Earth* is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, *The New York Times* “The book has potential to be this generation’s *Silent Spring*.”—*The Washington Post* “*The Uninhabitable Earth*, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, *The New York Review of Books*

Three Barons James Lateer, 2017-11-16 *The Three Barons* proves that it is possible (with enough

research), to reconstruct the organizational chart of the JFK plot. This book provides the first useful, in-depth analysis of the 120 phone calls by LBJ in the week following the assassination regarding such items as the Civil Rights Act, demands made by the military and similar political power plays. The Three Barons presents the first use of statistical factor analysis to identify the plotters, using a database of 30 books and 1500 names and examines the military officers allegedly close to the plot, such as NATO Commander Gen. Lyman Lemnitzer, General Lauris Norstad, and JFK's advisor, Gen. Maxwell Taylor. For the first time, the National Security Council, its structure and its members, are scrutinized for their obvious role in the JFK plot. More specifically, The Three Barons explains the role of Treasury Secretary C. Douglas Dillon and his father, investment banker Clarence Dillon, who likely had fascist sympathies. This book identifies, for the first time, why there were three actual barons involved in the plot and why at least three members of the Warren Commission had powerful Nazi connections, beginning in WWII and continuing through November 22, 1963.

Corruption and the Lava Jato Scandal in Latin

America Paul F Lagunes, Jan Svejnar, 2020-05-28

Corruption and the Lava Jato Scandal in Latin America brings together key international and interdisciplinary perspectives to shine new light on Lava Jato, or Operation Car Wash, Latin America's largest corruption scandal to date. Since 2014, this scandal has unfolded in surprising ways to expose collusion between construction companies and state officials in Brazil and 11 other countries. The corruption uncovered amounts in the order of hundreds of millions of dollars in bribes and billions of dollars in stolen state funds. The volume features evidence that the main construction company at the center of the scandal was—apparently—deliberate about seeking business in corrupt markets. It also evaluates the ambiguous role played by the media, whose members often relied uncritically on classified information released by the authorities. The volume further contributes to our understanding with studies on a number of other relevant topics, including: the overlap between corruption and the planning of the Rio Olympics; Mexico and Peru's contrasting responses to Lava Jato; the policy reforms needed to avoid a similar scandal in the future; and the roadmap for how Lava Jato should end. Across 15 chapters by leading and emerging scholars and practitioners, this book engages with these issues from a balanced and unbiased perspective, including interviews with key stakeholders on both sides of the case. As one of the first book-length studies to deal with Lava Jato in the English language, this ground-breaking volume is a compelling reading for advanced students and researchers in areas including Corruption Studies, Public Ethics, Political Science, and Latin American Studies, as well as for practitioners working to make

governments more accountable.
