The Political Road to War with Iraq Nick Ritchie, Paul Rogers, 2006-09-27 This volume explores in close detail the events and factors leading up to the second Gulf War in 2003 and considers whether war with Iraq was inevitable. Nick Ritchie and Paul Rogers argue that after the election of George W. Bush, conflict between Iraq and the United States was probable, and that after 9/11 it became virtually inevitable. They begin by setting the story of Iraq, Bush and 9/11 within the broader context of the importance of the Persian Gulf to enduring US national security interests and go on to examine the intense politicking that surrounded the conflict and still reverberates today. The authors examine US policy towards Iraq at the end of the Clinton administration, the opposition in Congress and Washington's conservative think tanks to Clinton's strategy of containment, and the evolution of Iraq policy during the first eight months of the Bush presidency and the growing pressure for regime change. They also explore the immediate focus on Iraq after the attacks of September 11 that marked a watershed in US national security policy and chart the construction of the case against Iraq through 2002 and the administration's determination to end Saddam Hussein's regime at all costs. *The Political Road to War with Iraq* will be of great interest to all students and scholars of US foreign policy, war and peace studies and international relations.

Africa Tony Binns, Etienne Nel, Alan Dixon, 2012-01-11 For many, Africa is regarded as a place of mystery and negative images, where reports of natural disasters and civil strife dominate media attention, with relatively little publicity given to any of the continent's more positive attributes. Africa has at last begun to receive the depth of interest it has long deserved, in the shape of debates about trade, aid and debt, the 'Make Poverty History' campaign, and the UK's 'Commission on Africa'. But, behind the superficial media façade, Africa is a diverse, complex and dynamic place, with a rich history and a colonial engagement that, although short-lived, was fundamental in determining the long-term future of the continent. At the start of the second decade of the twenty-first century, when the world is engulfed in a major financial crisis, Africa has the dubious distinction of being the world's poorest continent. This book introduces and de-mystifies Africa's diversity and dynamism, and considers how its peoples and environments have interacted through time and space. The background and diversity of Africa's social, cultural, economic, political and environmental systems is examined, as well as key development issues which have affected Africa in the past and are likely to be significant in shaping the future of the continent. These include: the impact of HIV/AIDS; sources of conflict and post-conflict reconstruction; the state and governance; the nature of African economies in a global context and future development trajectories. *Africa: Diversity and Development* is a refreshing interdisciplinary text which enhances understanding of the background to Africa's current position and clarifies possible future scenarios. It is richly illustrated throughout with diagrams and plates, and contains a wealth of detailed case studies and current data.

TERI Energy Data Directory & Yearbook (TEDDY) 2011/12 Teri, 2012-01-01 TERI Energy Data Directory Yearbook, or TEDDY, is an annual publication brought out by TERI since 1986. TEDDY is often used as a reference in other peer-reviewed books and journals for energy and environment-

related data. It gives an annual overview of the developments in the energy supplying and consuming sectors as well as the environment sector. It also provides a review of the government policies that have implications for these sectors of the Indian economy. The book provides extensive data collated from the various government ministries, on the energy supply sectors including coal and lignite, oil and gas, power, and renewable energy sources and technologies; energy demand sectors, namely, agriculture, industry, transport and domestic sectors; along with information related to environment and climate change. Graphs and maps have been used extensively to explain facts, that makes the book an interesting read. Besides, detailed tables have been provided at the end of each chapter, making TEDDY a comprehensive data book. Each edition of TEDDY contains India's commercial energy balances for the past four years that provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready reckoner for anybody working on energy and related sectors. This is the 25th anniversary edition of the book and a number of refinements have been made in the content and presentation to reflect the changing needs of the readers. At the same time, care has been taken to ensure that continuity of information is preserved so that researchers can study the trends over time in the energy sector.

Insights on Education Reform in China Zhiying Nian, Qinhua Zheng, 2018-03-20 In recent years, as indicated by the fact that Shanghai earned the top-ranking PISA results in the world, China's education system has attracted more and more attention. China's education system has attracted the interest of researchers is that, since the late 1970s, China has initiated landmark reforms in education. Recent years have seen an increase in the number of English-language books on educational reform in China. Unlike those books, which examine macroscopic policies, this book examines the universalization of pre-school education, school selection in elementary education, attractiveness of vocational education, the operational mode of university charters, the development of open universities, the credit bank system in building the learning society, and other aspects of education, and only analyzes one specific problem in each of these contexts for the purpose of comparing China's educational reforms to their overseas counterparts through microscopic study. Insights on Education Reform in China is not intended to provide a complete picture of China's educational reform. Rather, it addresses the types of complicated circumstances under which China has made achievements in educational reform, and the conflicts arising in the context of that reform. In this way, this book intends to express the thoughts of some young education researchers.

The Restoration of Engravings, Drawings, Books, and Other Works on Paper Max Schweidler, 2006 Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw* has been recognized as a seminal modern text on the conservation and restoration of works on paper. To address what he saw as a woeful dearth of relevant literature and in order to assist those who have 'set themselves the goal of preserving cultural treasures, ' the noted German restorer composed a thorough technical manual covering a wide range of specific techniques, including detailed instructions on how to execute

structural repairs and alterations that, if skilfully done, can be virtually undetectable. By the mid-twentieth century, curators and conservators of graphic arts, discovering a nearly invisible repair in an old master print or drawing, might comment that the object had been 'Schweidlerized.' This volume, based on the authoritative revised German edition of 1949, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated critical edition. The editor's introduction places the work in its historical context and probes the philosophical issues the book raises, while some two hundred annotati

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Patent Settlements in the Pharmaceutical Industry under US Antitrust and EU

Competition Law Amalia Athanasiadou, 2018-08-14 Reverse payment settlements or “pay-for-delay agreements” between originators and generic drug manufacturers create heated debates regarding the balance between competition and intellectual property law. These settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life-saving pharmaceuticals. This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States (US) and European courts and enforcement authorities, and to discuss the applicable legal tests and the main criteria used for their assessment. The book’s ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements, strategies and conduct which may be problematic from US antitrust and European Union (EU) competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant. To this end, an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided, including: – the lengthy split among US Circuit Courts on the issue of pay-for-delay settlements, its resolution by the US Supreme Court in *FTC v. Actavis* and subsequent jurisprudence; – the decision of *Lundbeck v. Commission* by the European General Court and the *Servier* decision of the European Commission; – the *Roche/Novartis* decision of the European Court of Justice and the most important decisions by National Competition Authorities on pharma patent settlements in the EU; – an overview of other types of strategies such as product-hopping and product reformulations, no-authorised generic commitments, problematic side-deals, mechanisms affecting generic substitution; – the rejection of the “scope of the patent” test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests; – the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law. The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies, emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective. This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law. It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw, with the ultimate goal to

increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry.

Revelations of Divine Love Julian of Norwich, 2019-11-13 The fourteenth-century anchorite known as Julian of Norwich offered fervent prayers for a deeper understanding of Christ's passion. The holy woman's petitions were answered with a series of divine revelations that she called shewings. Her mystic visions revealed Christ's sufferings with extreme intensity, but they also confirmed God's constant love for humanity and infinite capacity for forgiveness. Julian of Norwich's Revelations of Divine Love have had a lasting influence on Christian thought. Written in immediate, compelling terms, her experiences remain among the most original and accessible expressions of medieval mysticism. This edition contains both the short text, which is mainly an account of the shewings and Julian's initial analysis of their meaning, and the long text, completed some 20 years later and offering daringly speculative interpretations.
