Revelations of Divine Love Julian of Norwich,2019-11-13 The fourteenth-century anchorite known as Julian of Norwich offered fervent prayers for a deeper understanding of Christ's passion. The holy woman's petitions were answered with a series of divine revelations that she called shewings. Her mystic visions revealed Christ's sufferings with extreme intensity, but they also confirmed God's constant love for humanity and infinite capacity for forgiveness. Julian of Norwich's Revelations of Divine Love have had a lasting influence on Christian thought. Written in immediate, compelling terms, her experiences remain among the most original and accessible expressions of medieval mysticism. This edition contains both the short text, which is mainly an account of the shewings and Julian's initial analysis of their meaning, and the long text, completed some 20 years later and offering daringly speculative interpretations.

**Insights on Education Reform in China** Zhiying Nian,Qinhua Zheng,2018-03-20 In recent years, as indicated by the fact that Shanghai earned the top-ranking PISA results in the world, China's education system has attracted more and more attention. China's education system has attracted the interest of researchers is that, since the late 1970s, China has initiated landmark reforms in education. Recent years have seen an increase in the number of English-

language books on educational reform in China. Unlike those books, which examine macroscopic policies, this book examines the universalization of pre-school education, school selection in elementary education, attractiveness of vocational education, the operational mode of university charters, the development of open universities, the credit bank system in building the learning society, and other aspects of education, and only analyzes one specific problem in each of these contexts for the purpose of comparing China's educational reforms to their overseas counterparts through microscopic study. Insights on Education Reform in China is not intended to provide a complete picture of China's educational reform. Rather, it addresses the types of complicated circumstances under which China has made achievements in educational reform, and the conflicts arising in the context of that reform. In this way, this book intends to express the thoughts of some young education researchers.

**PTSD Compensation and Military Service** National Research Council, Institute of Medicine, Board on Behavioral, Cognitive, and Sensory Sciences, Board on Military and Veterans Health, Committee on Veterans' Compensation for Posttraumatic Stress Disorder, 2007-08-25 The scars of war take many forms: the limb lost, the illness brought on by a battlefield exposure, and, for some, the psychological toll of encountering an extremely traumatic event. PTSD Compensation and Military Service presents a thorough assessment of how the U.S. Department of Veterans Affairs evaluates veterans with possible posttraumatic stress disorder and determines the level of disability support to which they are entitled. The book presents a history of mental health disability compensation of military personnel and reviews the current compensation and pension examination procedure and disability determination methodology. It offers a number of recommendations for changes that would improve the fairness, consistency, and scientific foundation of this vital program. This book will be of interest and importance to policy makers, veterans affairs groups, the armed forces, health care organizations, and veterans themselves.

**Immunoepidemiology** Peter J. Krause,Paula B. Kavathas,Nancy H. Ruddle,2019-10-24 This textbook focuses on the nascent field of Immunoepidemiology that addresses how differences in immune responses among individuals affect the epidemiology of infectious diseases, cancer, hypersensitivity, and autoimmunity. The idea for the book originated from a course entitled "Immunology for Epidemiologists" at the Yale School of Public Health. While many fine textbooks are available that address the immunological responses of individuals to pathogens, these provided very little information regarding how immunological variation among populations affects the epidemiology of disease. And yet, it has long been recognized that there is great immunologic diversity among people, which can have a profound effect on the epidemiology of disease. Careful review of the immunologic and epidemiologic literature revealed that there have been relatively few publications concerning immunoepidemiology and that no textbook is available on the subject. This textbook therefore aims to fill this void by providing a much-needed tool to comprehensively and efficiently teach immunoepidemiology. The book includes a section on the basic principles of immunology, and then applies them to particular examples of disease in human populations. The target audience for this text book are Masters of Public Health students. Others who should also find it of interest include PhD students in epidemiology, immunology, medical students, generalists, and specialists in immunology, infectious diseases, cancer, and rheumatology.

**The Political Road to War with Iraq** Nick Ritchie,Paul Rogers,2006-09-27 This volume explores in close detail the events and factors leading up to the second Gulf War in 2003 and considers whether war with Iraq was inevitable. Nick Ritchie and Paul Rogers argue that after the election of George W. Bush, conflict between Iraq and the United States was probable, and that after 9/11 it became virtually inevitable. They begin by setting the story of Iraq, Bush and 9/11 within the broader context of the importance of the Persian Gulf to enduring US national security interests and go on to examine the intense politicking that surrounded the conflict and still reverberates today. The authors examine US policy towards Iraq at the end of the Clinton administration, the opposition in Congress and Washington's conservative think tanks to Clinton's strategy of containment, and the evolution of Iraq policy during the first eight months of the Bush presidency and the growing pressure for regime change. They also explore the immediate focus on Iraq after the attacks of September 11 that marked a watershed in US national security policy and chart the construction of the case against Iraq through 2002 and the administration's determination to end Saddam Hussein's regime at all costs. The Political Road to War with Iraq will be of great interest to all students and scholars of US foreign policy, war and peace studies and international relations.

It then goes on to present the most recent available data on changes in the global environment, including new indicators on air quality, marine protected areas and ozone protection. The report also includes a feature focusing on the cross-cutting issues of gender, poverty and the environment; as well giving an overview of the Indian Ocean tsunami and its initial impact.
