Women's Drug and Substance Abuse Ann Marie Pagliaro, Louis A. Pagliaro, 2017-09-13 This newly revised and expanded edition of Women's Drug and Substance Abuse: A Comprehensive Analysis and Reflective Synthesis offers a unique analysis and synthesis of theory, empirical research, and clinical guidance for treating substance abuse among young, middle-aged, and older women of various racial and sociocultural backgrounds in the United States, 2000 to 2018. This text uses the most current research findings to examine the actions and effects of drugs, women's patterns of medical and personal use and abuse, and common mental disorders associated with drug use. The authors also present their own empirically-based assessment model as well as prevention and treatment approaches specifically designed for women. Also included in the text is a comprehensive, cross-referenced subject index. Clear, comprehensive, accessible, and fully referenced, this book will be an invaluable resource for students and for professionals in all health and social care disciplines. Women's Drug and Substance Abuse is the 18th clinical pharmacology text that the Pagliaros have written over the past 40 years and is the 6th that deals exclusively with drug and substance abuse.

The Cure for Catastrophe Robert Muir-Wood,2016-09-06 We can't stop natural disasters but we can stop them being disastrous. One of the world's foremost risk experts tells us how. Year after year, floods wreck people's homes and livelihoods, earthquakes tear communities apart, and tornadoes uproot whole towns. Natural disasters cause destruction and despair. But does it have to be this way? In The Cure for Catastrophe, global risk expert Robert Muir-Wood argues that our natural disasters are in fact human ones: We build in the wrong places and in the wrong way, putting brick buildings in earthquake country, timber ones in fire zones, and coastal cities in the paths of hurricanes. We then

blindly trust our flood walls and disaster preparations, and when they fail, catastrophes become even more deadly. No society is immune to the twin dangers of complacency and heedless development. Recognizing how disasters are manufactured gives us the power to act. From the Great Lisbon Earthquake of 1755 to Hurricane Katrina, The Cure for Catastrophe recounts the ingenious ways in which people have fought back against disaster. Muir-Wood shows the power and promise of new predictive technologies, and envisions a future where information and action come together to end the pain and destruction wrought by natural catastrophes. The decisions we make now can save millions of lives in the future. Buzzing with political plots, newfound technologies, and stories of surprising resilience, The Cure for Catastrophe will revolutionize the way we conceive of catastrophes: though natural disasters are inevitable, the death and destruction are optional. As we brace ourselves for deadlier cataclysms, the cure for catastrophe is in our hands.

Globalization, Development And Security In Asia (In 4 Volumes) ,2014-04-28 Asian countries are undergoing rapid political, economic and social transformations; meanwhile, there is a growing demand for knowing more about Asia. This Major Reference Set is designed to help general readers as well as specialists to have a good grasp of the latest developments in Asia in the key areas of economic growth, trade, energy, environment, foreign policy and security. With 4 volumes, this set covers all major dimensions of Asia's political economy. Contributors include both scholars and practitioners who provide first-hand description and analysis of fundamental issues in Asia.Peace and political stability are of ultimate importance, with Asia at the forefront of wealth creation in the global economy. Volume 1 unpacks and examines the foreign policy strategies of key states and the role of regional institutions in responding to the security demands of an Asian century.Volume 2 studies the strong economic integration through trade and cross-border investment that has been essential to Asia. The region's future prosperity depends on it being able to remain open and outward-looking. As Asia grows larger and richer, more concerted efforts are required to surmount regional rivalry and to further strengthen the regional architecture of economic cooperation. Volume 3 looks at the emerging economies' thirst for energy that creates huge competition, around which domestic, regional, and international political economy unfolds. Climate change and aspiration for sustainable development further complicate the challenge.Volume 4 offers a comprehensive coverage of subjects on environment and sustainable development in Asia with case studies of selected and representative countries that are at different stages of economic development and facing different environment-related problems and challenges in the twenty-first century. This interdisciplinary set is a fine example of international cooperation, with contributors hailing from different parts of Asia as well as North America and Europe. It is a must-have for anyone keen on understanding Asia's dynamic and changing scene.

Authoritative Parenting Robert E. Larzelere, Amanda Sheffield Morris, Amanda W. Harrist, 2013 Psychologist Diana Baumrind's revolutionary prototype of parenting, called authoritative parenting, combines the best of various parenting styles. In contrast to previously advocated styles involving high responsiveness and low demandingness (i.e., permissive parenting) or low responsiveness and high demandingness (i.e., authoritarian parenting), authoritative parenting involves high levels of both responsiveness and demandingness. The result is an appropriate mix of warm nurturance and firm discipline. Decades of research have supported the prototype, and we now know that authoritative parenting fosters high achievement, emotional adjustment, self-reliance, and social confidence in children and adolescents. In this book, leading scholars update our thinking about authoritative parenting and address three unresolved issues: mechanisms of the style's effectiveness, variations of effectiveness across cultures, and untangling how parents influence children from how children influence them. By integrating perspectives from developmental and clinical psychology, the book will inform prevention and intervention efforts to help parents maximise their children's potential.

Structural Integrity and Failure, SIF2011 W. George Ferguson, Ashvin Thambyah, M.A. Hodgson, Kelly Wade, 2011-07-04 Volume is indexed by Thomson Reuters CPCI-S (WoS). Well-Behaved Women Seldom Make History Laurel Thatcher Ulrich,2008-09-23 From admired historian—and coiner of one of feminism's most popular slogans—Laurel Thatcher Ulrich comes an exploration of what it means for women to make history. In 1976, in an obscure scholarly article, Ulrich wrote, Well behaved women seldom make history. Today these words appear on t-shirts, mugs, bumper stickers, greeting cards, and all sorts of Web sites and blogs. Ulrich explains how that happened and what it means by looking back at women of the past who challenged the way history was written. She ranges from the fifteenth-century writer Christine de Pizan, who wrote The Book of the City of Ladies, to the twentieth century's Virginia Woolf, author of A Room of One's Own. Ulrich updates their attempts to reimagine female possibilities and looks at the women who didn't try to make history but did. And she concludes by showing how the 1970s activists who created second-wave feminism also created a renaissance in the study of history.

Mass-Action Law Dynamics Theory and Algorithm for Translational and Precision Medicine Informatics Ting-Chao Chou, 2024-04-09 "Mass-Action Law Dynamics Theory and Algorithm for Translational and Precision Medicine Informatics provides a comprehensive overview and update of the mass-action law-based unified dose-effect biodynamics, pharmacodynamics, bioinformatics, and the combination index theorem for synergy definition (MAL-BD/PD/BI/CI). Contents advocate the fundamental MAL-PD/BI/CI/BI principle for biomedical R&D, clinical trials protocol design computerized data analysis, illustrates the MAL-dynamics theory with sample analysis, and includes data entry and automated computer report print-outs. In 11 sections "Mass-Action Law Dynamics Theory and Algorithm for Translational and Precision Medicine Informatics leads the reader from an introduction and overview, to trial protocols and MAL-PD/CI approach for biomedical R&D in vitro and in animals. It describes the current Landscape of International FDA Drug Evaluation, Clinical Pharmacology, and Clinical Trials Guidance. This is a valuable resource for biomedical researchers, healthcare professionals, and students seeking to harness the power of data informatics in precision medicine. • gives insight into that index equation (DRIE) that digitally determines how many folds of dosereduction is needed for each drug in synergistic combinations • provides a comprehensive overview and update of mass-action law-based unified bioinformatics, dose effect biodynamics, pharmacodynamics, and the combination index theorem for

synergy definition (MAL-BD/PD/BI/CI) • describes how the MAL theory/algorithm-based "Top-Down digital approach is the opposite and yet is a complementary alternative to the observation/statistics-based "Bottom-Up traditional approach in R&D

In Our Hands Charles Murray,2016-06-02 Imagine that the United States were to scrap all its income transfer programs—including Social Security, Medicare, and all forms of welfare—and give every American age twenty-one and older \$10,000 a year for life.This is the Plan, a radical new approach to social policy that defies any partisan label. First laid out by Charles Murray a decade ago, the updated edition reflects economic developments since that time. Murray, who previous books include

Losing Ground and The Bell Curve, demonstrates that the Plan is financially feasible and the uses detailed analysis to argue that many goals of the welfare state—elimination of poverty, comfortable retirement for everyone, universal access to healthcare—would be better served under the Plan than under the current system. Murray's goal, shared by Left and Right, is a society in which everyone, including the unluckiest among us, has the opportunity and means to construct a satisfying life. In Our Hands offers a rich and startling new way to think about how that goal might be achieved.

Novel Approaches and Strategies for Biologics, Vaccines and Cancer Therapies Manmohan Singh, Maya Salnikova, 2014-12-30 Novel Approaches and Strategies for Biologics, Vaccines and Cancer Therapies takes a look at the current strategies, successes and challenges involved with the development of novel formulations of biologics, vaccines and cancer therapy. This book is a thorough and useful resource on the development of novel biologics, vaccines and cancer therapies. Provides strategies for the development of safe and efficacious novel formulations for various modalities of biologics, vaccines and for cancer therapy Highlights novel cases from current clinical trials as well as marketed products Reviews overall successes and challenges in the development of novel formulations, including new molecular targets for the treatment of diseases, design of target-specific therapies, regulatory considerations, individualized therapies

Civil Liberties, National Security and Prospects for Consensus Esther D. Reed, Michael Dumper, 2012-03-01 The idea of security has recently seen a surge of interest from political philosophers. After the atrocities of 11 September 2001 and 7 July 2005, many leading politicians justified encroachments on international legal standards and civil liberties in the name of security and with a view to protecting the rights of the people. Suggestions were made on both sides of the Atlantic to the effect that the extremism of terrorism required the security of the many to be weighed against the liberties of other citizens. In this collection of essays, Jeremy Waldron, Conor Gearty, Tarig Modood, David Novak, Abdelwahab El-Affendi and others debate how to move beyond the false dichotomy whereby fundamental human rights and international standards are conceived as something to be balanced against security. They also examine the claim that this aim might better be advanced by the inclusion in public debate of explicitly religious voices.

Universal Design 2016: Learning from the Past, Designing for the Future H. Petrie,J. Darzentas,T. Walsh,2016-09-15 Universal Design is the term used to describe the design of products and environments which can be used by all people, to the greatest extent possible, without the need for adaptation or specialized design. It is not a euphemism for 'designs for people with a disability', but really is about designing to include all people, regardless of their age, ability, cultural

background or status in life. However it remains the case that many designers and developers fail to understand the need for universal design and lack the skills needed to implement it. This book presents papers from the 3rd International Conference on Universal Design (UD 2016), held in York, UK, in August 2016. The theme of the conference was: learning from the past, designing for the future, and it aimed to bring together policymakers, practitioners and researchers interested in the different strands of universal design to exchange ideas and best practice, review some of the developments in universal design from the last 20 years, and formulate strategies for taking the concept of universal design forward into the future. The book is divided into two sections. Section 1: About Universal Design, and Section 2: Universal Design In Practice. The book will be of interest to all those whose work involves design, from the built environment and tangible products to communication, services and systems.
