Public Health, Disease and Development in Africa Ezekiel Kalipeni,Juliet Iwelunmor,Diana S. Grigsby-Toussaint,Imelda K. Moise,2018-06-14 The closure of the Millennium Development Goals (MDGs) in 2015 prompted the need for a book of this kind. An interdisciplinary group of global health scholars contribute to the understanding of the emerging and fast-growing problem of the dual burden of communicable and non-communicable diseases (NCDs) in Africa. This book is timely, as the international community has moved from the MDGs to adopt the Sustainable Development Goals (SDGs) as the blueprint for a new human development agenda. Contributions and case studies are situated in the revised Epidemiologic and Nutrition Transition Model to capture the current situation, referencing communicable and NCDs on the African continent. The case studies encapsulated aim to help minimize negative health outcomes and improve population health, well-being, and equity in the future. This book will be significant in policy circles to assist international organizations, governments, and United Nations agencies. It aims to chart the future for health in Africa in light of recently adopted SDGs. This book is also a useful complementary reader for global public health related courses.

In resonance with cosmic energies: terrorism and marketing Николай Конюхов,2018-12-20 This book is about the facts of fundamental dependency between the mankind development and cosmic energies: both electromagnetic and non-electromagnetic ones. The facts are systematized in graphs.

Shall We Wake the President? Tevi Troy,2016-09-01 The history of presidential dealings with disasters shows that whatever their ideology, presidents need to be prepared to deal with unexpected crises. In recent years, the expectations have grown as the disasters seem to appear to be coming more frequently. Since 2001, numerous unpredictable crises, including terror attacks, massive storms, and an economic collapse, have shaken Americans to their core. It seems as if technology, for all of its beneficences, also provides mankind with increasingly powerful ways to wreak destruction, including nuclear explosions, bioterror attacks, and cyber-attacks. In addition, instantaneous and incessant communications technologies send us word of disasters taking place anywhere in the nation far more rapidly, giving disasters an immediacy that some may have lacked in the past. In 21st century America, the eyes of the American people look to the president to lead the response to whatever disasters happen to strike. President Obama and his team learned this and were taken aback by the sheer number of crises that a president needed to deal with, including swine flu, BP's Macondo oil spill, and the Somali pirates who attacked an American ship. Many of these did not quite reach disaster status, but Obama's reaction to the constant stream of crises was both revealing and unnerving: "Who thought we were going to have to deal with pirates?" In *Shall We Wake the President?*, Tevi Troy, a presidential historian and former senior White House aide and deputy secretary of the Department of Health & Human Services, looks at the evolving role of the president in dealing with disasters, and looks at how our presidents have handled disasters throughout our history. He also looks at the likelihood of similar disasters befalling modern America, and details how smart policies today can help us avoid future crises, or can best react to them should they occur. In addition, he provides information on what individuals can do to prepare for disasters. This book includes sections on how American presidents have dealt with a variety of disasters, including health crises, terror attacks, economic upheaval, bioterror and cyber-attacks, natural disasters, and civil breakdown. In doing so, *Shall We Wake the President?* will provide lessons from presidents of the past that will inform policy strategies for presidents of the future.

Concepts and Methods in Infectious Disease Surveillance Nkuchia M.

M'ikanatha, John Iskander, 2014-11-17 Infectious disease surveillance has evolved at an extraordinary pace during the past several decades, and continues to do so. It is increasingly used to inform public health practice in addition to its use as a tool for early detection of epidemics. It is therefore crucial that students of public health and epidemiology have a sound understanding of the concepts and principles that underpin modern surveillance of infectious disease. Written by leaders in the field, who have vast hands-on experience in conducting surveillance and teaching applied public health, *Concepts and Methods in Infectious Disease Surveillance* is comprised of four sections. The first section provides an overview, a description of systems used by public health jurisdictions in the United States and legal considerations for surveillance. The second section presents chapters on major program-area or disease-specific surveillance systems, including those that monitor bacterial infections, foodborne diseases, healthcare-associated infections, and HIV/AIDS. The following section is devoted to methods for conducting surveillance and also approaches for data analysis. A concluding section summarizes communication of surveillance findings, including the use of traditional and social media, in addition to showcasing lessons learned from the New York City Department of Health's experience in surveillance and epidemiology training. This comprehensive new book covers major topics at an introductory to intermediate level, and will be an excellent resource for instructors. Suitable for use in graduate level courses in public health, human and veterinary medicine, and in undergraduate programs in public-health-oriented disciplines, *Concepts and Methods in Infectious Disease Surveillance* is also a useful primer for frontline public health practitioners, hospital epidemiologists, infection control practitioners, laboratorians in public health settings, infectious disease researchers, and medical and public health informaticians interested in a concise overview of infectious disease surveillance.

Sustainable Health and Long-Term Care Solutions for an Aging Population

Fong, Ben, Ng, Artie, Yuen, Peter, 2017-06-30 Lasting healthcare for the entire population, specifically the elderly, has become a main priority in society. It is imperative to find ways to boost the longevity of healthcare services for all users. *Sustainable Health and Long-Term Care Solutions for an Aging Population* is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly. Including coverage on a number of topics such as provider accreditation, corporate social responsibility, and data management, this book is ideally designed for policy makers, academicians, researchers, and advanced-level students seeking current research on the innovative planning and development of healthcare.

Ebola's Message Nicholas G. Evans,Tara C. Smith,Maimuna S. Majumder,2016-10-07 Interdisciplinary perspectives on the science, politics, and ethics of the 2013–2015 Ebola virus disease outbreak. The 2013–2015 outbreak of the Ebola virus disease (EVD) was a public health disaster: 28,575 infections and 11,313 deaths (as of October 2015), devastating the countries of Guinea, Liberia, and Sierra Leone; a slow and mismanaged international response; and sensationalistic media coverage, seized upon by politicians to justify wrongheaded policy. And yet there were also promising developments that may improve future responses to infectious disease epidemics: the UN Security Council's first involvement in a public health event; a series of promising clinical treatments and vaccines for EVD; and recognition of the need for a global public health system to deal with epidemics that cross national borders. This volume offers a range of perspectives on these and other lessons learned, with essays on the science, politics, and ethics of the Ebola outbreak. The contributors discuss topics including the virology and management of EVD in both rich and poor nations; the spread of the disease (with an essay by a leader of Médecins Sans Frontières); racist perceptions of West Africa; mainstream and social media responses to Ebola; and the ethical issue of whether to run clinical trials of experimental treatments during an outbreak. Contributors Christian L. Althaus, Daniel G. Bausch, Adia Benton, Michael J. Connor, Jr., Kim Yi Dionne, Nicholas G. Evans, Morenike Oluwatoyin Folayan, Stephen Goldstein, Bridget Haire, Patricia C.
