The Bauhaus Magdalena Droste,2015 In a fleeting fourteen year period, sandwiched between two world wars, Germany's Bauhaus school of art and design changed the face of modernity. With utopian ideals for the future, the school developed a pioneering fusion of fine art, craftsmanship, and technology to be applied across painting, sculpture, design, architecture, film, photography, textiles, ceramics, theatre, and installation. As much an intense personal community as a publicly minded collective, the Bauhaus was first founded by Walter Gropius (1883-1969), and counted Josef and Anni Albers, Wassily Kandinsky, Paul Klee, Oskar Schlemmer, Gunta St lzl, Marianne Brandt and Ludwig Mies van der Rohe among its members. Between its three successive locations in Weimar, Dessau and Berlin, the school fostered charismatic and creative exchange between teachers and students, all varied in their artistic styles and preferences, but united in their idealism and their interest in a total work of art across different practices and media. This book celebrates the adventurous innovation of the Bauhaus movement, both as a trailblazer in the development of modernism, and as a paradigm of art education, where an all-encompassing freedom of creative expression and cutting-edge ideas led to functional and beautiful creations.

My Mother's Branch:The Lineage and Life of Carrie Viola Reeves and Her Family Doyle W. Williams,2014-03-11 Doyle Williams has written a family history focusing on his mother, Carrie Viola Reeves, her siblings, Emma, Annie, and Charlie, and her parents, James Morgan Reeves and Sarah Frances Spencer. In this story he describes the turmoil that enveloped James Morgan as a small child in Arkansas during the Civil War and how it took his father's life and the lives of five of his siblings. He follows James Morgan as he moves to Texas with his mother, leaving home at age ten to find his own way, and returning to Arkansas to grow up and marry. When his wife, Elizabeth Wolf, dies leaving him with a large family to rear, he returns to Texas, where he finds a new wife in Sarah Frances Spencer. James Morgan and Sarah move to Oklahoma Territory in the early 1890s, make their lives there and rear their own family. The author follows the children of James Morgan and Sarah as they grow up, marry, and eventually care for their aging parents. This is the story of an American pioneering family.

The H.264 Advanced Video Compression Standard Iain E. Richardson,2011-08-24 H.264 Advanced Video Coding or MPEG-4 Part 10 is fundamental to a growing range of markets such as high definition broadcasting, internet video sharing, mobile video and digital surveillance. This book reflects the growing importance and implementation of H.264 video technology. Offering a detailed overview of the system, it explains the syntax, tools and features of H.264 and equips readers with practical advice on how to get the most out of the standard. Packed with clear examples and illustrations to explain H.264 technology in an accessible and practical way. Covers basic video coding concepts, video formats and visual quality. Explains how to measure and optimise the performance of H.264 and how to balance bitrate, computation and video quality. Analyses recent work on scalable and multi-view versions of H.264, case studies of H.264 codecs and new technological developments such as the popular High Profile extensions. An invaluable companion for developers, broadcasters, system integrators, academics and students who want to master this burgeoning state-of-the-art technology. [This book] unravels the mysteries behind the latest H.264 standard and delves deeper into each of the operations in the codec. The reader can implement (simulate, design, evaluate, optimize) the codec with all profiles and levels. The book ends with extensions and directions (such as SVC and MVC) for further research. In Our Hands Charles Murray,2016-06-02 Imagine that the United States were to scrap all its income transfer programs—including Social Security, Medicare, and all forms of welfare—and give every American age twenty-one and older \$10,000 a year for life.This is the Plan, a radical new approach to social policy that defies any partisan label. First laid out by Charles Murray a decade ago, the updated edition reflects economic developments since that time. Murray, who previous books include *Losing Ground* and *The Bell Curve*, demonstrates that the Plan is financially feasible and the uses detailed analysis to argue that many goals of the welfare state—elimination of poverty, comfortable retirement for everyone, universal access to healthcare—would be better served under the Plan than under the current system. Murray’s goal, shared by Left and Right, is a society in which everyone, including the unluckiest among us, has the opportunity and means to construct a satisfying life. In *Our Hands* offers a rich and startling new way to think about how that goal might be achieved.

IoT Fundamentals David Hanes,Gonzalo Salgueiro,Patrick Grossetete,Robert Barton,Jerome Henry,2017-05-30 Today, billions of devices are Internet-connected, IoT standards and protocols are stabilizing, and technical professionals must increasingly solve real problems with IoT technologies. Now, five leading Cisco IoT experts present the first comprehensive, practical reference for making IoT work. IoT Fundamentals brings together knowledge previously available only in white papers, standards documents, and other hard-to-find sources—or nowhere at all. The authors begin with a high-level overview of IoT and introduce key concepts needed to successfully design IoT solutions. Next, they walk through each key technology, protocol, and technical building block that combine into complete IoT solutions. Building on these essentials, they present several detailed use cases, including manufacturing, energy, utilities, smart+connected cities, transportation, mining, and public safety. Whatever your role or existing infrastructure, you’ll gain deep insight what IoT applications can do, and what it takes to deliver them. Fully covers the principles and components of next-generation wireless networks built with Cisco IOT solutions such as IEEE 802.11 (Wi-Fi), IEEE 802.15.4-2015 (Mesh), and LoRaWAN Brings together real-world tips, insights, and best practices for designing and implementing next-generation wireless networks Presents start-to-finish configuration examples for common deployment scenarios Reflects the extensive first-hand experience of Cisco experts

Biodiversity: Finance and the Economic and Business Case for Action OECD,2019-12-06 This report sets the economic and business case for urgent and ambitious action on biodiversity. It presents a preliminary assessment of current biodiversity-related finance flows, and discusses the key data and indicator gaps that need to be addressed to underpin effective monitoring of both the pressures on biodiversity and the actions (i.e. responses) being implemented. The report concludes with ten priority areas where G7 and other countries can prioritise their efforts.

Population Dynamics in Muslim Countries Hans Groth,Alfonso Sousa-Poza,2012-03-26 The book discusses the demographic changes in Muslim countries. It thereby focuses on topics such as the demographic dividend and the demographic transition, labour market challenges, health care, universal education and gender issues. These challenges are addressed at a country level and include policy implications for the large majority of the Muslim countries covered in this book. Moreover, political consequences for Europe with respect to the integration of Muslims are presented to the reader.

Task Design In Mathematics Education Anne Watson,Minoru Ohtani,2015-10-26 *THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK* This open access book is the product of ICMI Study 22 Task Design in Mathematics Education. The study offers a state-of-the-art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design. The authors represent a wide range of countries and cultures and are leading researchers, teachers and designers. In particular, the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching, researching and designing roles - recognising that these might be undertaken by the same person or by completely separate teams. Tasks generate the activity through which learners meet mathematical concepts, ideas, strategies and learn to use and develop mathematical thinking and modes of enquiry. Teaching includes the selection, modification,

design, sequencing, installation, observation and evaluation of tasks. The book illustrates how task design is core to effective teaching, whether the task is a complex, extended, investigation or a small part of a lesson; whether it is part of a curriculum system, such as a textbook, or promotes free standing activity; whether the task comes from published source or is devised by the teacher or the student.

The Nature of the Atonement James K. Beilby, Paul R. Eddy, 2009-08-20 A long history of biblical exegesis and theological reflection has shaped our understanding of the atonement today. The more prominent highlights of this history have acquired familiar names for the household of faith: Christus Victor, penal substitutionary, subjective, and governmental. Recently the penal substitutionary view, and particularly its misappropriations, has been critiqued, and a lively debate has taken hold within evangelicalism. This Spectrum Multiview volume offers a panel discussion of four views of atonement maintained by four evangelical scholars. The proponents and their views are: Gregory A. Boyd: Christus Victor view Joel B. Green: Kaleidoscopic view Bruce R. Reichenbach: Healing view Thomas R. Schreiner: Penal Substitutionary view Following an introduction written by the editors, each participant first puts forth the case for their view. Each view is followed by responses from the other three participants, noting points of agreement as well as disagreement. This is a book that will help Christians understand the issues, grasp the differences and proceed toward a clearer articulation of their understanding of the atonement. Spectrum Multiview Books offer a range of viewpoints on contested topics within Christianity, giving contributors the opportunity to present their position and also respond to others in this dynamic publishing format.

Heritage Regimes and the State Bendix, Regina, Eggert, Aditya, Peselmann, Arnika, 2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

Interactive Data Visualization Matthew O. Ward, Georges Grinstein, Daniel Keim, 2015-06-11 An Updated Guide to the Visualization of Data for Designers, Users, and Researchers Interactive Data Visualization: Foundations, Techniques, and Applications, Second Edition provides all the theory, details, and tools necessary to build visualizations and systems involving the visualization of data. In color throughout, it explains basic terminology and concepts, algorithmic and software engineering issues, and commonly used techniques and high-level algorithms. Full source code is provided for completing implementations. New to the Second Edition New related readings, exercises, and programming projects Better quality figures and numerous new figures New chapter on techniques for time-oriented data This popular book continues to explore the fundamental components of the visualization process, from the data to the human viewer. For developers, the book offers guidance on designing effective visualizations using methods derived from human perception, graphical design, art, and usability analysis. For practitioners, it shows how various public and commercial visualization systems are used to solve specific problems in diverse domains. For researchers, the text describes emerging technology and hot topics in development at academic and industrial centers today. Each chapter presents several types of exercises, including review questions and problems that motivate readers to build on the material covered and design alternate approaches to solving a problem. In addition, programming projects encourage readers to perform a range of tasks, from the simple implementation of algorithms to the extension of algorithms and programming techniques. Web Resource A supplementary website includes downloadable software tools and example data sets, enabling hands-on experience with the techniques covered in the text. The site also offers links to useful data repositories and data file formats, an up-to-date listing of software packages and vendors, and instructional tools, such as reading lists, lecture slides, and demonstration programs.

The Chemistry of the Actinide and Transactinide Elements (3rd ed., Volumes 1-5) L.R. Morss, Norman M. Edelstein, Jean Fuger, 2007-12-31 The Chemistry of the Actinide and Transactinide Elements is a contemporary and definitive compilation of chemical properties of all of the actinide elements, especially of the technologically important elements uranium and plutonium, as well as the transactinide elements. In addition to the comprehensive treatment of the chemical properties of each element, ion, and compound from atomic number 89 (actinium) through to 109 (meitnerium), this multi-volume work has specialized and definitive chapters on electronic theory, optical and laser fluorescence spectroscopy, X-ray absorption spectroscopy, organoactinide chemistry, thermodynamics, magnetic properties, the metals, coordination chemistry, separations, and trace analysis. Several chapters deal with environmental science, safe handling, and biological interactions of the actinide elements. The Editors invited teams of authors, who are active practitioners and recognized experts in their specialty, to write each chapter and have endeavoured to provide a balanced and insightful treatment of these fascinating elements at the frontier of the periodic table. Because the field has expanded with new spectroscopic techniques and environmental focus, the work encompasses five volumes, each of which groups chapters on related topics. All chapters represent the current state of research in the chemistry of these elements and related fields.

Ethics for the Built Environment Peter Fewings, 2008-09-16 Praise for Construction Project Management by Peter Fewings: The complexity of the subject matter has at least been reinforced in an informative document with a large helping of common sense ... written in a comprehensive and well structured manner. Building Engineer Magazine Ethics are not an optional extra for the professional in the built environment sector. Whether you're a civil engineer, an architect or a construction project manager, an understanding of the ethical context of your work is an institutional requirement and a commercial demand, not to mention a matter of personal pride. Sometimes, as a construction professional you will be faced with complicated dilemmas, as commercial responsibilities clash with health and safety, environmental or competition concerns. Peter Fewings brings together practical construction project management experience with ethical theory to establish how best to deal with difficult issues.

Construction Health and Safety in Developing Countries Patrick Manu, Fidelis Emuze, Tarcisio Abreu Saurin, Bonaventura H. W. Hadikusumo, 2019-08-22 The global construction sector is infamous for high levels of injuries, accidents and fatalities, and poor health and well-being of its workforce. While this record appears in both developed and developing countries, the situation is worse in developing countries, where major spending on infrastructure development is expected. There is an urgent need to improve construction health and safety (H&S) in developing countries. The improvement calls for the development of context-specific solutions underpinned by research into challenges and related solutions. This edited volume advances the current understanding of construction H&S in developing countries by revealing context-specific issues and challenges that have hitherto not been well explored in the literature, and applying emergent H&S management approaches and practices in developing countries. Coverage includes countries from the regions of sub-Saharan Africa, Latin America, Asia and Europe. This book, which is the first compendium of research into construction H&S issues in developing countries, adds considerable insight into the field and presents innovative solutions to help address poor H&S in construction in developing nations. It is a must read for all construction professionals, researchers and practitioners interested in construction and occupational H&S, safety management, engineering management and development studies.
