**The U.S. Army War College Guide to National Security Issues** ,2010 This edition of the U. S. Army War College Guide to National Security Policy and Strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College. The fourth edition is published in two volumes that correspond roughly to the Department of National Security and Strategy's core courses: Theory of War and Strategy and National Security Policy and Strategy. Like previous editions, this one is largely an expansion of its predecessor rather than a major rewriting. About a quarter of the chapters are new, and several others have undergone significant rewrites or updates. However, approximately half of the book remains unchanged. Although this is not primarily a textbook, it does reflect both the method and manner we use to teach strategy formulation to America's future senior leaders. The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process. Both volumes are organized to proceed from the general to the specific. Thus the first volume opens with general thoughts on the nature and theory of war and strategy, proceeds to look at the complex aspect of power, and concludes with specific theoretical issues. Similarly, the second volume begins by examining the policy/strategy process, moves to a look at the strategic environment, and concludes with some specific issues. This edition adds several short case studies that can be used to illustrate the primary material in the volume.

*Intellectual Property and Genetically Modified Organisms* Charles Lawson,Berris Charnley,2016-03-09 Taking a global viewpoint, this volume addresses issues arising from recent developments in the enduring and topical debates over Genetically Modified Organisms (GMOs) and their relationship to Intellectual Property (IP). The work examines changing responses to the growing acceptance and prevalence of GMOs. Drawing together perspectives from several of the leading international scholars in this area, the contributions seek to break away from analysis of safety and regulation and examine the diversity of ways the law and GMOs have become entangled. This collection presents the start of a much broader engagement with GMOs and law. As GMO technology becomes increasingly more complex and embedded in our lives, this volume will be a useful resource in leading further discussion and debate about GMOs in academia, in government and among those working on future policy.

A History of African-American Leadership John White,Bruce J. Dierenfield,2014-06-11 The story of black emancipation is one of the most dramatic themes of American history, covering racism, murder, poverty and extreme heroism. Figures such as Malcolm X and Martin Luther King are the demigods of the freedom movements, both film and household figures. This major text explores the African-American experience of the twentieth century with particular reference to six outstanding race leaders. Their philosophies and strategies for racial advancement are compared and set against the historical framework and constraints within which they functioned. The book also examines the 'grass roots' of black protest movements in America, paying particular attention to the major civil rights organizations as well as black separatist groups such as the Nation of Islam.

Facilitating Interdisciplinary Research Institute of Medicine,National Academy of Engineering,National Academy of Sciences,Committee on Science, Engineering, and Public Policy,Committee on Facilitating Interdisciplinary Research,2005-04-04 Facilitating Interdisciplinary Research examines current interdisciplinary research efforts and recommends ways to stimulate and support such research. Advances in science and engineering increasingly require the collaboration of scholars from various fields. This shift is driven by the need to address complex problems that cut across traditional disciplines, and the capacity of new technologies to both transform existing disciplines and generate new ones. At the same time, however, interdisciplinary research can be impeded by policies on hiring, promotion, tenure, proposal review, and resource allocation that favor traditional disciplines. This report identifies steps that researchers, teachers, students, institutions, funding organizations, and disciplinary societies can take to more effectively conduct, facilitate, and evaluate interdisciplinary research programs and projects. Throughout the report key concepts are illustrated with case studies and results of the committee's surveys of individual researchers and university provosts.

*Realities and Fantasies of German Female Leadership* Elisabeth Krimmer,2019 The Western tradition of excluding women from leadership and disparaging their ability to lead has persisted for centuries, not least in Germany. Even today, resistance to women holding power is embedded in literary, cultural, and historical values that presume a fundamental opposition between the adjective female and the substantive leader. Women who do achieve positions of leadership are faced with a panoply of prejudicial misconceptions: either considered incapable of leadership (conceived of as alpha-male behavior), or pigeonholed as suited only to particular forms of leadership (nurturing, cooperative, egalitarian, communicative, etc.). Focusing on the German-speaking countries, this volume works to dismantle the prevailing disassociation of women and leadership across a range of disciplines. Contributions discuss literary works involving women's political authority and cultivation of community from Maria Antonia of Saxony to Elfriede Jelinek; women's social activism, as embodied by figures from Hedwig Dohm to Rosa Luxemburg; women in political film, environmentalism, neoliberalism, and the media from Leni Riefenstahl to Petra Kelly to Maren Ade; and political leaders Hillary Clinton and Angela Merkel. The essays achieve a deeper understanding of the historical roots and theoretical assumptions that inform ideas and realities of German female leadership. Contributors: Dorothee Beck, Seth Berk, Friederike Brühöfener, Margaretmary Daley, Aude Defurne, Helga Druxes, Sarah Vandegrift Eldridge, Anke Gilleir, Rachel J. Halverson, Peter Hudis, Elisabeth Krimmer, Stephen Milder, Joyce Marie Mushaben, Lauren Nossett, Patricia Anne Simpson, Almut Spalding, Inge Stephan, Lisa Fetheringill Zwicker. Elisabeth Krimmer is Professor of German at the University of California, Davis. Patricia Anne Simpson is Professor of German and Chairperson of the Department of Modern Languages and Literatures at the University of Nebraska-Lincoln.

**Artificial Neural Networks and Machine Learning - ICANN 2011** Timo Honkela,Włodzisław Duch,Mark Girolami,Samuel Kaski,2011-06-13 This two volume set LNCS 6791 and LNCS 6792 constitutes the refereed proceedings of the 21th International Conference on Artificial Neural Networks, ICANN 2011, held in Espoo, Finland, in June 2011. The 106 revised full or poster papers presented were carefully reviewed and selected from numerous submissions. ICANN 2011 had two basic tracks: brain-inspired computing and machine learning research, with strong cross-disciplinary interactions and applications.
