**The Enigma of Good and Evil: The Moral Sentiment in Literature** Anna-Teresa Tymieniecka,2005-12-13 Striking toward peace and harmony the human being is ceaselessly torn apart in personal, social, national life by wars feuds, inequities and intimate personal conflicts for which there seems to be no respite. Does the human condition in interaction with others imply a constant adversity? Or, is this conflict owing to an interior or external factor of evil governing our attitudes and conduct toward the other person? To what criteria should I refer for appreciation, judgment, direction concerning my attitudes and my actions as they bear on the well-being of others? At the roots of these questions lies human experience which ought to be appropriately clarified before entering into speculative abstractions of the ethical theories and precepts. Literature, which in its very gist, dwells upon disentangling in multiple perspective the peripeteia of our life-experience offers us a unique field of source-material for moral and ethical investigations. Literature brings preeminently to light the Moral Sentiment which pervades our life with others -- our existence tout court. Being modulated through the course of our experiences the Moral Sentiment sustains the very sense of literature and of personal human life (Tymieniecka). Papers by: Tony E. **Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

**Handbook of Research on Digital Media and Creative Technologies** Harrison, Dew,2015-03-31 Emerging technologies enable a wide variety of creative expression, from music and video to innovations in visual art. These aesthetics, when properly explored, can enable enhanced communication between all kinds of people and cultures. The Handbook of Research on Digital Media and Creative Technologies considers the latest research in education, communication, and creative social expression using digital technologies. By exploring advances in art and culture across national and sociological borders, this handbook serves to provide artists, theorists, information communication specialists, and researchers with the tools they need to effectively disseminate their ideas across the digital plane.

*Digital Competition Law in Europe* Marc Wiggers,Robin Struijlaart,Joost Dibbitts,2023-07-14 ‘Digital competition’, a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book – both informative and practical – lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe, most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2022 but including as many landmark cases as possible up to and including December 2022, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on cartel prohibition, the prohibition of abuse of a dominant position and merger control. Additional chapters – partially written by guest authors (who are all without a doubt true thought leaders: Tristan Byrne, Giuseppe Colangelo, Ai Deng, Teodora Groza, Daniel Mândrescu, Wolf Sauter, Thibault Schrépel, and Gareth Shier) – evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, the economic context, the most important game changers, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge of competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality – which is here already, like it or not – are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.
