Sustainability, Technology, and Finance Herman Bril,Georg Kell,Andreas Rasche,2022-12-12 This book explores the swiftly emerging nexus between sustainability, finance, and technology. Leading practitioners and academic thought leaders reflect on the ways in which technology and digitalization shape how sustainable finance professionals address environmental, social, and governance (ESG) issues. Together, the contributors identify three spheres in which technology shapes how investors make sense of such issues: ESG and technology: finance professionals need to know about how technological innovations, such as chemical recycling for plastics, in the real economy shape firms' ESG performance; ESG through technology: technological developments, such as AI and blockchain, can enable finance professionals to offer more fine-grained ESG analyses; and ESG as technology: the ESG agenda itself is influenced by technological developments that are not well understood by practitioners (e.g., data mining for Bitcoin creating significant emissions). Using practically relevant examples and recent insights from people working in the field, the book explores the linkages between sustainability, technology, and finance in different contexts and shows how practitioners can accelerate needed change processes. This book primarily addresses practitioners in companies and investment firms as well as students enrolled in executive education and MBA programs.

Street Animation For Social Change Andreea-Loredana Tudorache,Monica Constantinescu,2010-01-01 You have now in your hands by chance or not a document that brings a new value in what concerns social street campaigning or street arts. Why is it so? Mainly because it aims at combining these two perspectives and enriching what street animation means by "using" its social change potential properly. This manual is based on the last 3 years of experience of A.R.T. Fusion Association in what concerns street social campaigning and offers every reader the chance to go through a variety of street animation methods, to open their curiosity and appetite towards them, and more than that to offer an alternative that maybe was not in your mind: to practice street animation in order to make a social change in your community!

Home Care for Older Adults Using Interprofessional Teams Danita H. Stapleton,Sekeria Bossie,2023-10-16 This textbook fosters a deeper understanding of how home healthcare goals for older adults can be achieved through interprofessional collaboration. The contributors create a context where allied health and healthcare professionals can acquire and exchange knowledge about their diverse disciplines and practices for the betterment of the home care population. The book also reinforces what the COVID-19 pandemic made quite apparent to health institutions and providers: patients can receive adequate and acceptable care within the home setting. The pandemic also highlighted the important role that interprofessionalism can play in attaining desired patient outcomes. Statistics reveal that the population of persons over the age of 65 years is the largest that it has ever been. This volume focuses on older adult patients because caring for these individuals from an interprofessional perspective is now more important than ever. Through the ten chapters of this edited book, the contributors including home care providers offer their perspectives on interprofessional collaboration and the provision of quality home care services. They use the Interprofessional Education Collaborative's (IPEC) four core competencies as a framework for improving the collaborative practice of home health care for older adult patients with complex medical issues. Among the topics covered: Medical Social Work and Case Management Skilled Nursing Physical Therapy Occupational Therapy Behavioral Health Care Other Relevant Home Care Services: Prosthetics and Orthotics, Pharmacy Services, Durable Medical Equipment and Nutritional Services Home Care for Older Adults Using Interprofessional Teams is intended for advanced undergraduate and graduate students in health or allied health programs and can be used as a primary text for interprofessional education courses. The text benefits students, instructors, and faculty who have stakes in obtaining positive health outcomes for older adult patients. Today, more and more programs are requiring the development of interprofessional competencies. This book provides a forum where students can obtain in-depth knowledge of teaming, as well as the roles and functions of various care providers.

Choose Life John Goodrich,Jeanette Hagen Pifer,2022-05-03 You're pro-life. But can you explain why? You already believe in choosing life. But when the counterarguments are coming at you from every angle—legal, biological, medical, ethical, moral, philosophical, and biblical—how do you defend the pro-life view? And as you defend it . . . how do you speak with wisdom, humility, and compassion? Now more than ever, the times call for a balance of truth and mercy. There are good, wise, and thoughtful rebuttals of every claim made by pro-abortion advocates. Collected here in one place, Choose Life offers you reasonable responses from leading experts in their respective fields. The authors are accomplished women and men from all walks of life. They'll help you know what to say—and why to say it—when you're faced with claims like: "The courts have already settled the issue." "The fetus is not a person." "My body, my choice." "I shouldn't have to raise an unwanted child." "My circumstances justify ending my pregnancy." "Abortions are helpful to women and society." "The pro-life movement doesn't care about social justice." It's time to set aside the strident fist-shaking and hurled insults. Learn to make the pro-life case with intelligent arguments and compassionate love—just the way a Christian should.

Bletchley Park and D-Day David Kenyon,2019-07-16 "Demonstrates that the intelligence division . . . had a more significant role in WWII . . . making indispensable contributions to the invasion at Normandy." (Publishers Weekly) The untold story of Bletchley Park's key role in the success of the Normandy campaign Since the secret of Bletchley Park was revealed in the 1970s, the work of its codebreakers has become one of the most famous stories of the Second World War. But cracking the Nazis' codes was only the start of the process. Thousands of secret intelligence workers were then involved in making crucial information available to the Allied leaders and commanders who desperately needed it. Using previously classified documents, David Kenyon casts the work of Bletchley Park in a new light, as not just a codebreaking establishment, but as a fully developed intelligence agency. He shows how preparations for the war's turning point—the Normandy Landings in 1944—had started at Bletchley years earlier, in 1942, with the careful collation of information extracted from enemy signals traffic. This account reveals the true character of Bletchley's vital contribution to success in Normandy, and ultimately, Allied victory.

Digital Competition Law in Europe Marc Wiggers,Robin Struijlaart,Joost Dibbits,2023-07-14 'Digital competition', a term and concept that has risen to the forefront of competition law, may be viewed as both promising and cautionary: on the one hand, it brings the promises of increased speed, efficiency and objectivity, and, on the other, it entails potential pitfalls such as hard-to-identify pathways to unfair pricing, dominant positions and their potential abuse, restriction of choice and abuse of personal data. Accordingly, jurisdictions around the world are taking measures to deal with the phenomenon. In this concise but thoroughly researched book – both informative and practical – lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe,

most of these forerunners in the field of digital competition policy and enforcement. The competition authorities surveyed are those of the European Union, the United Kingdom, France, Germany, the Netherlands and Belgium. For each, an overview, spanning the period from 2012 to mid-2022 but including as many landmark cases as possible up to and including December 2022, includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches, policy statements, industry surveys and research reports. Activities and enforcement practices of the various authorities include the following and more: degree of activity; focus of the activity; enforcement styles; enforcement instruments; visible effectiveness of enforcement; and important insights and outlooks. Each overview contains separate chapters on cartel prohibition, the prohibition of abuse of a dominant position and merger control. Additional chapters – partially written by guest authors (who are all without a doubt true thought leaders: Tristan Byrne, Giuseppe Colangelo, Ai Deng, Teodora Groza, Daniel Mândrescu, Wolf Sauter, Thibault Schrépel, and Gareth Shier) – evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated, the economic context, the most important game changers, and a concluding chapter offers recommendations. An indispensable guide to quickly and accessibly acquiring in-depth knowledge of competition law in the digital sector, this matchless volume is a must-read for any practitioner or academic who encounters competition law related to digital markets. The dilemmas and challenges of the new competition law reality – which is here already, like it or not – are clearly explained here for the benefit of regulators, academics, policymakers, judges, in-house counsel and lawyers specialising in competition law and intellectual property law.
