Alan Hecht, Shannon Manning

Lawless Kimberley Motley,2019-09-05 In the summer of 2008 Kimberley Motley quit her job as a public defender in Milwaukee to join a program that helped train lawyers in war-torn Afghanistan. She was thirty-two at the time, a mother of three who had never travelled outside the United States. What she brought to Afghanistan was a toughness and resilience which came from growing up in one of the most dangerous cities in the US, a fundamental belief in everyone's right to justice and an unconventional legal mind that has made her a legend in an archaic, misogynistic and deeply conservative environment. Through sheer force of personality, ingenuity and perseverance, Kimberley became the first foreign lawyer to practise in Afghanistan and her work swiftly morphed into a mission - to bring 'justness' to the defenceless and voiceless. She has established herself as an expert on its fledgling criminal justice system, able to pivot between the country's complex legislation and its religious laws in defence of her clients. Her radical approach has seen her successfully represent both Afghans and Westerners, overturning sentences for men and women who've been subject to often appalling miscarriages of justice. Inspiring and fascinating in equal measure, Lawless tells the story of a remarkable woman operating in one of the most dangerous countries in the world.

Escherichia coli Infections, Third Edition Alan Hecht,Shannon Manning,2020-12-01 Escherichia coli bacteria cause many illnesses of the gastrointestinal tract. Often, people come down with these diseases when they eat contaminated foods, especially ground beef or raw produce. Though E. coli infections are most common in less developed parts of the world, they are also a problem in the United States—contamination occurred in prepackaged cookie dough in 2009 and in spinach in 2006. But all E. coli are not harmful, as strains found in the human intestinal system can help with vitamin K production or in fighting harmful bacteria. This third edition of Escherichia coli Infections contains up-to-date information on the different strains of E. coli, including the latest outbreaks, statistics, diagnostic breakthroughs, and vaccine development. Chapters include: E. coli Outbreaks What Is E. coli? E. coli Diseases E. coli Colonization and Transmission Epidemiology of E. coli Infections Disease Pathogenesis Clinical Diagnosis and Treatment Disease Prevention Future Possibilities and Concerns.

How to Feel Great at Work Every Day Deborah Brown-Volkman,2007-02-13 You are reading this book for a reason. Something in your career is not working-you are unhappy, tired, or stressed out. It's time to try something different. -Judith A. Rose, certified hypnotherapist, licensed clinical social worker, and registered nurse If you are tired, your body is asking for help, and a few small changes can go a long way. -Holly Anne Shelowitz, board certified nutrition counselor, whole foods chef, and corporate health educator When you feel great, anything is possible. You benefit from high-energy, focus, and the ability to make better, stronger decisions about your job and career. -Bob Mittleman, owner, Fitness Together Personal Training Studios, and eight-time marathon runner What is your energy level like at work? Do you find yourself dragging during the day and craving sugar, caffeine, and other highly processed carbohydrates for energy? Let author Deborah Brown-Volkman show you how you can have high-energy even with a

hectic schedule and busy life. *How To Feel Great At Work Every Day* guides you through creating a practical plan to finding more energy to fuel your career. Instead of complicated suggestions and ideas, this book offers easy-to-understand steps you can implement in your career today.

A Tale of Two Cultures Mark Walia,2012-09-09 Mark Walia's *A Tale of Two Cultures: Islam and the West* lays out the contrasts between the Western and Islamic worlds with remarkable clarity and documentation, and concludes there are nearly irreconcilable differences between these worlds. keywords: Islam, Muslim, Religion, Christianity, War, Culture, Travel, Sharia, Hate, Mohammed

Contemporary Encounters in Gender and Religion Lena Gemzöe,Marja-Liisa Keinänen,Avril Maddrell,2016-11-16 The fields of gender and religious studies have often been criticized for neglecting to engage with one another, and this volume responds to this dearth of interaction by placing the fields in an intimate dialogue. Taking a multi-disciplinary approach and drawing on feminist scholarship, the book undertakes theoretical and empirical explorations of relational and co-constitutive encounters of gender and religion. Through varied perspectives, the chapters address three interrelated themes: religion as practice, the relationship between religious practice and religion as prescribed by formal religious institutions, and the feminization of religion in Europe.

Hedonizing Technologies Rachel P. Maines,2009-08-01 The book addresses basic issues in the history of labor and industry and makes an original contribution to the discussion of how technology and people interact.

The EU and the European Security Strategy Sven Biscop,Jan Joel Andersson,2007-09-12 The European Security Strategy (ESS) has become an important reference framework for the EU since its inception in 2003. Without strategy an actor can only really be a 'reactor' to events and developments. In the ESS the EU now has a strategy, with which it has the potential of shifting boundaries and shaping the World. This volume explores this statement and examines the underlying concepts and implementation of the ESS as a judging tool of all the European Union's external actions. Contributors, closely involved in the early debate leading up to the ESS, assess questions such as how the strategy has shaped EU policy, how it relates to existing policies but also how it has added value to these policies and whether the strategy's objectives are sufficient to safeguard EU interests or whether they should be reviewed and added too. The outline of the strategy itself is followed; addressing its historical and conceptual context, the threat assessment, the multilateral and regional policies of the EU, its military capabilities and its strategic partnerships. This book offers a comprehensive vision of how the EU can achieve the ambitious objectives of the European Security Strategy and become an effective global actor as the strategy helps to forge a global Europe. The EU and the European Security Strategy will be of great interest to students and researchers of European politics and security studies.

Peak Oil, Economic Growth, and Wildlife Conservation J. Edward Gates,David L. Trauger,Brian Czech,2014-11-20 The proposed book focuses on one of the most important issues affecting humankind in this century - Peak Oil or the declining availability of abundant, cheap energy—and its effects on our industrialized economy and wildlife conservation. Energy will be one of the defining issues of the 21st Century directly affecting wildlife conservation wherever energy extraction is a primary economic activity and indirectly through deepening economic recessions. Since cheap, abundant energy has been at the core of our industrial society, and has resulted in the technological advancements we enjoy today, the peak in world oil extraction would potentially have major impacts on civilization unless we prepare well in advance. One potential economic solution covered in the book would be a Steady State Economy with a stable population and per capita consumption, particularly in such industrialized countries as the United

States. Furthermore, the lack of cheap, abundant energy directly and indirectly affects conservation efforts by professional societies and federal and state agencies, and NGOs concerned with wildlife issues. We need to recognize these potential problems and prepare, as much as possible, for the consequences stemming from them.

Introduction to Permanent Plug and Abandonment of Wells Mahmoud Khalifeh, Arild

Saasen, 2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Tactical Rape in War and Conflict Brenda Fitzpatrick, 2016-05-25 The use of rape as a deliberate tactic of war is a serious human rights issue that needs to be addressed as a threat to human and international security. This ground-breaking book is the first to analyse its use as an act of war against civilians and international progress away from tacit acceptance toward active rejection of this violation of international law. Exploring international responses to sexual violence in war, it introduces the main historical facts, theoretical terms and legal developments behind UNSC resolutions on women, peace and security and the emerging practice of international law in this area. It identifies best practice in moving beyond accepting rape in war as inevitable to the recognition of tactical rape as a security concern for women, men, states and the international community. Powerful testimonies of victims are included to bring the issue alive, making this a much-needed volume for academic and professional communities.

Work in a Warming World Carla Lipsig-Mummé, Stephen McBride, 2016-04-15 Global warming is

perhaps the greatest challenge facing the twenty-first century. Environmental policies on the one hand, and economic and labour market policies on the other, often exist in separate silos creating a dilemma that *Work in a Warming World* confronts. The world of work - goods, services, and resources - produces most of the greenhouse gases created by human activity. In engaging essays, contributors demonstrate how the world of work and the labour movement need to become involved in the struggle to slow global warming, and the ways in which environmental and economic policies need to be linked dynamically in order to effect positive change. Addressing the dichotomy of competing public policies in a Canadian context, *Work in a Warming World* presents ways of creating an effective response to global warming and key building blocks toward a national climate strategy.

Legume Breeding in Transition: Innovation and Outlook Rafiul Amin Laskar, Aamir Raina, Samiullah Khan, Nasya Borisova Tomlekova, Waltram Ravelombola, Mahendar Thudi, 2023-09-06 Legumes (family Fabaceae) comprise a diverse range of crops grown worldwide, which are important constituents of sustainable agriculture and harbour a role in improving human and livestock health. Legumes serve as a rich source of plant-based proteins, rank second in nutrition value after cereals, and are ideal to supplement a protein-deficient cereal-based human diet. Legumes also provide other essential services to agriculture through their ability to fix atmospheric nitrogen, recycle nutrients, enhance soil carbon content, and diversify cropping systems. Legume production and seed quality are affected by a range of biotic (pests, insect diseases, and weeds) and abiotic stresses (drought, heat, frost, and salinity). In addition to this, rapidly changing climate, shrinking arable land, erratic rainfalls, and depleting water and other natural resources impact legume production and threaten food and nutrition security worldwide. Persistent demand for legume crops is existing to fulfil the food requirements of an ever-growing human population. Therefore, legume breeders and geneticists have employed different conventional and modern breeding strategies to improve yield, resistance to biotic and abiotic stresses, grain quality, and nutritional and nutraceutical properties. Conventional breeding strategies are laborious, time consuming, expensive, and inefficient to achieve the desired goals. However, advanced breeding techniques such as alien gene introgression, genomics-assisted breeding, transgenic technology, speed breeding, association and mapping studies, genome editing, and omics will contribute to sustainable agriculture and food security.

Women, War, and Violence [2 volumes] Mariam M. Kurtz, Lester R. Kurtz, 2015-08-28 This set of original articles probes the breadth of vital issues surrounding the impact of war and violence on women globally—and examines what is being done to mitigate their effects. The story of men's roles in war and violence fills headlines and history books, but the women's narrative too often goes unnoticed. This two-volume work brings women's voices to the fore, highlighting new scholarship and journalism to offer a realistic understanding of this timely topic. Including both historical context and contemporary issues, the volumes explore types of violence affecting women and girls—as victims of war and as combatants in and perpetrators of war. Equally important, it provides an in-depth look at resistance movements and peacemaking efforts, examining how these issues can—and should—be addressed. The two volumes bring together a wide range of articles by experts from various fields and backgrounds to provide the first all-inclusive overview of women, war, and violence. Other works on the subject tend to be focused on Western nations, offering a narrow view of a global issue. This compendium, in contrast, takes a truly international approach. It provides general readers, policymakers, students and scholars with a compelling collection of insights from around the world, exposing the varied experiences women have had—and continue to have—with violence and war.
