Women, War, and Violence Mariam M. Kurtz, Lester R. Kurtz, 2015-08-28 This set of original articles probes the breadth of vital issues surrounding the impact of war and violence on women globally—and examines what is being done to mitigate their effects. The story of men's roles in war and violence fills headlines and history books, but the women's narrative too often goes unnoticed. This two-volume work brings women's voices to the fore, highlighting new scholarship and journalism to offer a realistic understanding of this timely topic. Including both historical context and contemporary issues, the volumes explore types of violence affecting women and girls—as victims of war and as combatants in and perpetrators of war. Equally important, it provides an in-depth look at resistance movements and peacemaking efforts, examining how these issues can—and should—be addressed. The two volumes bring together a wide range of articles by experts from various fields and backgrounds to provide the first all-inclusive overview of women, war, and violence. Other works on the subject tend to be focused on Western nations, offering a narrow view of a global issue. This compendium, in contrast, takes a truly international approach. It provides general readers, policymakers, students and scholars with a compelling collection of insights from around the world, exposing the varied experiences women have had—and continue to have—with violence and war.

Developing Inclusive Environments in Education: Global Practices and Curricula Koreeda, Kiyoji, Tsuge, Masayoshi, Ikuta, Shigeru, Dalton, Elizabeth Minchin, Ewe, Linda Plantin, 2023-06-29 Inclusive education remains a significant challenge in today's educational landscape, as K-12 classrooms and higher education institutions struggle to meet the diverse needs of all students. To address this pressing issue, *Developing Inclusive Environments in Education: Global Practices and Curricula*, led by Kiyoji Koreeda, offers practical strategies and insights. The book explores the Universal Design for Learning (UDL) framework, providing a comprehensive guide to making learning inclusive and transformative. It showcases global examples of universal design curricula and highlights the use of educational technologies to facilitate inclusive learning experiences. By focusing on practical activities and support systems, the book empowers educators to build inclusive classrooms and higher education settings, offering detailed descriptions of useful tools and software for personalized teaching materials and reasonable accommodations. *Developing Inclusive Environments in Education* is an essential resource for researchers and educators committed to fostering inclusive practices and creating transformative educational environments. Embracing the strategies and insights presented in this book allows researchers and educators to revolutionize their approach to education. They can create inclusive environments that support the success and well-being of every student, ensuring that no one is left behind. By adopting the practical guidance and leveraging the examples provided, educators can implement inclusive practices and transform their classrooms and educational settings to meet the diverse needs of learners worldwide. This transformative approach empowers educators to utilize advanced curricula, leverage educational technologies, and implement personalized teaching materials and accommodations, ultimately creating an environment where all students can thrive. *Developing Inclusive Environments in Education* serves as a valuable resource, equipping educators with the necessary knowledge and tools to build inclusive and transformative educational environments.

Partners in Time Pamela Simpson, Pamela Wallace, 1990 A federal marshal from the Old West of the 1880s is zapped through time to present-day L.A. where he teams up with a very 1980s female detective to solve a murder mystery with a link to his life in the past. A fast-paced suspense/romance in the best Tracy-Hepburn style.

How to Feel Great at Work Every Day Deborah Brown-Volkman, 2007-02-13 You are reading this book for a reason. Something in your career is not working—you are unhappy, tired, or stressed out. It's time to try something different. -Judith A. Rose, certified hypnotherapist, licensed clinical social worker, and registered nurse If you are tired, your body is asking for help, and a few small changes can go a long way. -Holly Anne Shelowitz, board certified nutrition counselor, whole foods chef, and corporate health educator When you feel great, anything is possible. You benefit from high-energy, focus, and the ability to make better, stronger decisions about your job and career. -Bob Mittleman, owner, Fitness Together Personal Training Studios, and eight-time marathon runner What is your energy level like at work? Do you find yourself dragging during the day and craving sugar, caffeine, and other highly processed carbohydrates for energy? Let author Deborah Brown-Volkman show you how you can have high-energy even with a hectic schedule and busy life. *How To Feel Great At Work Every Day* guides you through creating a practical plan to finding more energy to fuel your career. Instead of complicated suggestions and ideas, this book offers easy-to-understand steps you can implement in your career today.

Escherichia coli Infections, Third Edition Alan Hecht, Shannon Manning, 2020-12-01 *Escherichia coli* bacteria cause many illnesses of the gastrointestinal tract. Often, people come down with these diseases when they eat contaminated foods, especially ground beef or raw produce. Though *E. coli* infections are most common in less developed parts of the world, they are also a problem in the United States—contamination occurred in prepackaged cookie dough in 2009 and in spinach in 2006. But all *E. coli* are not harmful, as strains found in the human intestinal system can help with vitamin K production or in fighting harmful bacteria. This third edition of *Escherichia coli Infections* contains up-to-date information on the different strains of *E. coli*, including the latest outbreaks, statistics, diagnostic breakthroughs, and vaccine development. Chapters include: *E. coli* Outbreaks What Is *E. coli*? *E. coli* Diseases *E. coli* Colonization and Transmission Epidemiology of *E. coli* Infections Disease Pathogenesis Clinical Diagnosis and Treatment Disease Prevention Future Possibilities and Concerns.

Rights of Children at Risk and in Care Bragi Guðbrandsson, Council of Europe, 2006-01-01 Children should grow up in their families. When confronted with crises or difficult situations, families should receive necessary, specifically adapted assistance from public authorities to help solve their problems. This is sometimes not possible, however, for example when parents are unable to bring up their children or when they represent a danger to them. The child and the parents must consequently be separated, with the parents' agreement or on the basis of a court ruling. Placement must always be an exception and a temporary solution - as short as possible - only foreseeable if all the right conditions are met and if the principal aim is the best interest of the child, including a successful and prompt social integration or reintegration. The main objective should be the development and fulfilment of the child. His/her views should be taken into account, according to the child's age and degree of maturity. Child protection and welfare, based on the rights of the child -including those of children in institutions - is a priority for the Council of Europe, as stated in Recommendation Rec(2005)5 of the Committee of Ministers to member states on the rights of children living in residential institutions. The harmful effects of institutions on child development having been demonstrated, the aims are to prevent the institutionalisation of children and to reduce the number of children subject to such measures through the development of alternatives. This publication, while showing the importance of the issue and the necessity of dealing with it in a sensible and cautious way, also opens perspectives for the future.

Introduction to Permanent Plug and Abandonment of Wells Mahmoud Khalifeh, Arild Saasen, 2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Legume Breeding in Transition: Innovation and Outlook Rafiul Amin Laskar, Aamir Raina, Samiullah Khan, Nasya Borisova Tomlekova, Waltram Ravelombola, Mahendar Thudi, 2023-09-06 Legumes (family Fabaceae)

comprise a diverse range of crops grown worldwide, which are important constituents of sustainable agriculture and harbour a role in improving human and livestock health. Legumes serve as a rich source of plant-based proteins, rank second in nutrition value after cereals, and are ideal to supplement a protein-deficient cereal-based human diet. Legumes also provide other essential services to agriculture through their ability to fix atmospheric nitrogen, recycle nutrients, enhance soil carbon content, and diversify cropping systems. Legume production and seed quality are affected by a range of biotic (pests, insect diseases, and weeds) and abiotic stresses (drought, heat, frost, and salinity). In addition to this, rapidly changing climate, shrinking arable land, erratic rainfalls, and depleting water and other natural resources impact legume production and threaten food and nutrition security worldwide. Persistent demand for legume crops is existing to fulfil the food requirements of an ever-growing human population. Therefore, legume breeders and geneticists have employed different conventional and modern breeding strategies to improve yield, resistance to biotic and abiotic stresses, grain quality, and nutritional and nutraceutical properties. Conventional breeding strategies are laborious, time consuming, expensive, and inefficient to achieve the desired goals. However, advanced breeding techniques such as alien gene introgression, genomics-assisted breeding, transgenic technology, speed breeding, association and mapping studies, genome editing, and omics will contribute to sustainable agriculture and food security.

Антикризисное управление 3-е изд., пер. и доп. Учебник и практикум для вузов Наталия Шведова, Владимир Черненко, 2022-05-13 В курсе представлены как традиционные методы и инструменты антикризисного регулирования в контексте переосмысления их использования в условиях современной экономической нестабильности, так и современные идеи и методики с учетом их адаптации к условиям внешней и внутренней предпринимательской среды российской экономики. Рассматривается широкий спектр теоретических и практических вопросов, позволяющих оценить и принять управленческие решения в разных экономических условиях. Раскрываются формы, методы и инструменты регулирования экономических процессов; зарубежные и отечественные модели прогнозирования банкротства предприятий; опыт антикризисного управления в развитых странах; финансовая диагностика предприятия в зависимости от направления деятельности и др. Особое внимание в курсе уделено современным проблемам функционирования российских предприятий в условиях нестабильности мировой экономики, роста политической напряженности и обострения борьбы за ресурсы на международной арене. Представленные теоретические и практические вопросы антикризисного управления основаны на современных событиях, иллюстрируются практическими данными и статистической информацией. Соответствует актуальным требованиям федерального государственного образовательного стандарта высшего образования. Курс ориентирован на студентов, обучающихся по направлениям «Экономика» и «Менеджмент», а также аспирантов, преподавателей, слушателей программ профессиональной переподготовки и повышения квалификации.

Low Carbon Transport in Asia Eric Zusman, Ancha Srinivasan, Shobhakar Dhakal, 2012-03-29 Without the effective participation of developing Asia, a climate crisis is certain. Within developing Asia, the key to averting such a crisis lies in low carbon transport. China, India and Asia's other emerging economies could promote fuel efficient vehicles, public transport, and sustainable urban planning. Or they could become locked into inefficient vehicles, energy intensive infrastructure, and suburban sprawl. The path they choose will have long-term implications for the entire world. And it will depend upon the extent to which they adopt a co-benefit approach. A co-benefit approach involves recognizing that some transport policies mitigate greenhouse gases while simultaneously improving urban air quality, commuting times and energy security. Accounting for these additional benefits can overcome a reluctance to bear the costs of climate actions. But it also presents unique technical, financial, and institutional challenges to decision-makers unaccustomed to optimizing multiple benefits. The book represents a pioneering effort to identify and remove barriers to a co-benefit approach in developing Asia's transport sector. The introductory section makes the case for co-benefits in developing Asia's transport sector. The second section features analytical frameworks to identify strategies with potential co-benefits, offering new findings on black carbon and dieselization. The third section grounds the analytic work in case studies on fuel switching in Pakistan, urban planning in Bandung, Indonesia, congestion charges in Beijing, vehicle restraints in Hanoi and bus rapid transit in Jakarta. A final section examines whether a post-2012 climate regime can help transform a rapidly motorizing Asia into a low carbon Asia. This book is essential reading for transport policy makers, planners, and researchers concerned with low carbon transport, climate change and development in Asia and the wider world.
