Pitching in the Promised Land Aaron Pribble, 2011 It was the first (and last) season of professional baseball in Israel. Aaron Pribble, twenty-seven, had been out of Minor League Baseball for three years while he pursued a career in education when, at his coach's suggestion, he tried out for the newly formed Israel Baseball League (IBL). Of Jewish descent (not a requirement, but definitely a plus) and former pro, Pribble was the ideal candidate for the upstart league. In many ways the league resembled the ultimate baseball fantasy camp with its unforgettable cast of characters: the DJ/street artist third baseman from the Bronx, the wildman catcher from Australia, the journeymen Dominicans who were much older than they claimed to be, and, of course, seventy-one-year-old Sandy Koufax, drafted in a symbolic gesture as the last player. After falling in love with a beautiful Yemenite Jew, enduring an alleged terrorist attack on opening day, witnessing a career-ending brain injury caused by improper field equipment, participating in a strike, and venturing into the West Bank despite being strongly advised against it, Pribble must decide whether to forgo a teaching career in order to become the first player from the IBL to sign a pro contract in the United States. His is a story of coming of age spiritually and athletically in one short season in the throes of romance, Middle Eastern politics, and the dreams of America's pastime far, far afield from home.

The Coming Famine Julian Cribb, 2010-08-10 In *The Coming Famine*, Julian Cribb lays out a vivid picture of impending planetary crisis--a global food shortage that threatens to hit by mid-century--that would dwarf any in our previous experience. Cribb's comprehensive assessment describes a dangerous confluence of shortages--of water, land, energy, technology, and knowledge--combined with the increased demand created by population and economic growth. Writing in brisk, accessible prose, Cribb explains how the food system interacts with the environment and with armed conflict, poverty, and other societal factors. He shows how high food prices and regional shortages are already sending shockwaves into the international community. But, far from outlining a doomsday scenario, *The Coming Famine* offers a strong and positive call to action, exploring the greatest issue of our age and providing practical suggestions for addressing each of the major challenges it raises.

Microbial Growth in Drinking Water Supplies Dick van der Kooij, Paul W. J. van der Wielen, Diego Rosso, Andrew Shaw, Dietrich Borchardt, Ralf Ibisch, Dirk Apgar, Jay Witherspoon, Dominic M. di Toro, Paul R. Paquin, Don Mavinic, Fred Koch, Emmanuelle Guillot, Jean-Francois Loret, Erhard Hoffmann, Hallvard Ødegaard, Francesc Hernandez-Sancho, Maria Molinos-Senante, 2013-09-14 Maintaining the microbial quality in distribution systems and connected installations remains a challenge for the water supply companies all over the world, despite many years of research. This book identifies the main concerns and knowledge gaps related to regrowth and stimulates cooperation in future

research. Microbial Growth in Drinking Water Supplies provides an overview of the regrowth issue in different countries and the water quality problems related to regrowth. The book assesses the causes of regrowth in drinking water and the prevention of regrowth by water treatment and distribution. Acute Exposure Guideline Levels for Selected Airborne Chemicals National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Committee on Acute Exposure Guideline Levels, 2011-10-28 Extremely hazardous substances (EHSs)² can be released accidentally as a result of chemical spills, industrial explosions, fires, or accidents involving railroad cars and trucks transporting EHSs. Workers and residents in communities surrounding industrial facilities where EHSs are manufactured, used, or stored and in communities along the nation's railways and highways are potentially at risk of being exposed to airborne EHSs during accidental releases or intentional releases by terrorists. Pursuant to the Superfund Amendments and Reauthorization Act of 1986, the U.S. Environmental Protection Agency (EPA) has identified approximately 400 EHSs on the basis of acute lethality data in rodents. As part of its efforts to develop acute exposure guideline levels for EHSs, EPA and the Agency for Toxic Substances and Disease Registry (ATSDR) in 1991 requested that the National Research Council (NRC) develop guidelines for establishing such levels. In response to that request, the NRC published *Guidelines for Developing Community Emergency Exposure Levels for Hazardous Substances* in 1993. Subsequently, *Standard Operating Procedures for Developing Acute Exposure Guideline Levels for Hazardous Substances* was published in 2001, providing updated procedures, methodologies, and other guidelines used by the

National Advisory Committee (NAC) on Acute Exposure Guideline Levels for Hazardous Substances and the Committee on Acute Exposure Guideline Levels (AEGs) in developing the AEGL values. In 1998, EPA and DOD requested that the NRC independently review the AEGLs developed by NAC. In response to that request, the NRC organized within its Committee on Toxicology (COT) the Committee on Acute Exposure Guideline Levels, which prepared this report. Acute Exposure Guideline Levels for Selected Airborne Chemicals is the tenth volume of the series and documents for N,N-dimethylformamide, jet propellant fuels 5 and 8, methyl ethyl ketone, perchloromethyl mercaptan, phosphorus oxychloride, phosphorus trichloride, and sulfuric chloride.

Governance of Arctic Shipping Aldo Chircop, Floris Goerlandt, Claudio Aporta, Ronald Pelot, 2020-08-11 This open access book is a result of the Dalhousie-led research project Safe Navigation and Environment Protection, supported by a grant from the Ocean Frontier Institute's the Canada First Research Excellent Fund (CFREF). The book focuses on Arctic shipping and investigates how ocean change and anthropogenic impacts affect our understanding of risk, policy, management and regulation for safe navigation, environment protection, conflict management between ocean uses, and protection of Indigenous peoples' interests. A rapidly changing Arctic as a result of climate change and ice loss is rendering the North more accessible, providing new opportunities while producing impacts on the Arctic. The book explores ideas for enhanced governance of Arctic shipping through risk-based

planning, marine spatial planning and scaling up shipping standards for safety, environment protection and public health.

Introduction to Cosmetic Formulation and Technology Gabriella Baki, 2022-12-12 Introduction to Cosmetic Formulation and Technology An accessible and practical review of cosmetics and OTC drug-cosmetic products In the newly revised second edition of *Introduction to Cosmetic Formulation and Technology*, veteran educator and researcher Dr. Gabriella Baki delivers a comprehensive discussion of cosmetics and personal care products, including coverage of basic concepts, ingredient selection, formulation technology, and testing. The book offers a clear and easy-to-understand review of cosmetics and over the counter (OTC) drug-cosmetic products available in the United States. In this latest edition, the author expands on general concepts and adds brand-new chapters on the basics of cosmetics testing, ingredients, and skin lightening products. Each chapter includes a summary of common abbreviations with questions provided online, alongside a solutions manual for instructors. Readers will also find: A thorough introduction to the basic definitions, claims, and classifications of cosmetics and OTC drug-cosmetic products Comprehensive explorations of the current rules and regulations for cosmetics and OTC drug-cosmetic products in the United States and European Union Detailed review of cosmetic ingredients, functions, and typical uses both in a dedicated a chapter and included within various others Practical coverage of good manufacturing practices for cosmetics, including

documentation, buildings and facilities, equipment, and personnel. A fulsome review of a variety of skin and hair care products, color cosmetics, and other personal care products. Perfect for undergraduate and graduate students studying cosmetic science in chemistry, chemical engineering, pharmaceutical, biomedical, and biology departments, *Introduction to Cosmetic Formulation and Technology* will also benefit cosmetic chemists, cosmetic product formulators, cosmetic scientists, quality control managers, cosmetic testing specialists, and technicians.

Stem Cells and the Future of Regenerative Medicine Institute of Medicine, Board on Neuroscience and Behavioral Health, National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on the Biological and Biomedical Applications of Stem Cell Research, 2002-01-25. Recent scientific breakthroughs, celebrity patient advocates, and conflicting religious beliefs have come together to bring the state of stem cell research—specifically embryonic stem cell research—into the political crosshairs. President Bush's watershed policy statement allows federal funding for embryonic stem cell research but only on a limited number of stem cell lines. Millions of Americans could be affected by the continuing political debate among policymakers and the public. *Stem Cells and the Future of Regenerative Medicine* provides a deeper exploration of the biological, ethical, and funding questions prompted by the therapeutic potential of undifferentiated human cells. In terms accessible to lay readers, the book

summarizes what we know about adult and embryonic stem cells and discusses how to go about the transition from mouse studies to research that has therapeutic implications for people. Perhaps most important, *Stem Cells and the Future of Regenerative Medicine* also provides an overview of the moral and ethical problems that arise from the use of embryonic stem cells. This timely book compares the impact of public and private research funding and discusses approaches to appropriate research oversight. Based on the insights of leading scientists, ethicists, and other authorities, the book offers authoritative recommendations regarding the use of existing stem cell lines versus new lines in research, the important role of the federal government in this field of research, and other fundamental issues.

Pocket Antioxidants Amitava Dasgupta, 2014-05-01 What are antioxidants and why are they so importance to our health? *Pocket Antioxidants* delivers current, medically proven knowledge about the power of antioxidants and how you can use them to find better health. Dr Amitava Dasgupta has an extensive background in antioxidant research and in this book he separates fact from fiction providing a simple yet scientifically sound guide to incorporating antioxidants into the everyday diet. What are free radicals? And how can we harness the power of antioxidants to live better for longer? In the modern world we don't drink enough water. We eat the wrong kinds of food and we don't get enough sleep or exercise. However, in this pocket-sized guide, Dr. Amitava Dasgupta tells you how even chocolate and alcohol can be good for

you.

Migration and Remittances Factbook 2016 Dilip Ratha,Christian Eigen-Zucchi,Sonia Plaza,2016-04-08 Remittances remain a key source of funds for developing countries, far exceeding official development assistance and even foreign direct investment. Remittances have proved to be more stable than private debt and portfolio equity flows, and less volatile than official aid flows, and their annual flow can match or surpass foreign exchange reserves in many small countries. Even in large emerging markets, such as India, remittances are equivalent to at least a quarter of total foreign exchange reserves. India, China, Philippines and Mexico are the top recipients of migrant remittances. The Migration and Remittances Factbook 2016 attempts to present numbers and facts behind the stories of international migration and remittances, drawing on authoritative, publicly available data. It provides a snapshot of statistics on immigration, emigration, skilled emigration, and remittance flows for 210 countries and 15 regional and income groups. The Migration and Remittances Factbook 2016 updates the 2011 edition of the Factbook with additional data on bilateral migration and remittances and second generation diasporas, collected from various sources, including national censuses, labor force surveys, population registers, and other national sources.

Finance-Led Capitalism Robert Guttman,2016-01-26 In Finance-Led Capitalism , bestselling author and economist Robert Guttman provides a new conceptual

framework to assess the dominate role of modern finance within the workings of our contemporary economic system. This lively and provocative read will challenge some of the core beliefs about modern finance and the world economy.

Human Rights and the Capabilities Approach Diane Elson, Sakiko Fukuda-Parr, Polly Vizard, 2014-06-11 Among several contesting views about the purpose of development and how progress should be evaluated, human rights and capabilities (or human development) stand out as two approaches that are concerned first and foremost with the well-being of individuals, their freedom, dignity and empowerment. These two approaches contrast sharply with the dominant development frameworks that emphasize economic growth as the essential objective. Though human rights and capabilities share these common commitment to human priorities, they are distinct concepts and fields that have developed separately. The aim of this volume is to explore the relationship between them in order to enhance the understanding of both as theoretical paradigms, as public policy frameworks and as approaches to development. The book includes contributions from some of the leading scholars in the two fields of capabilities approach and human rights. It covers the essential aspects of this relationship: addressing the complementarities between human rights and capabilities as theoretical concepts; how the concept of capabilities can contribute to resolving some key theoretical issues in human rights; how the social science analysis and

methods of the capabilities approach can clarify human rights concepts and strengthen human rights advocacy; and how human rights norms can strengthen public policy and mobilize collective action to demand greater accountability in placing human priorities first in public policy. Human Rights and the Capabilities Approach raises many questions for further inter-disciplinary conversation and further research. This book was originally published as a special issue of the Journal of Human Development and Capabilities, and has been expanded with two additional articles from this journal and a new foreword by Professor Amartya Sen.

Photovoltaic/Thermal (PV/T) Systems Ali H. A. Al-Waeli, Hussein A. Kazem, Miqdam Tariq Chaichan, Kamaruzzaman Sopian, 2019-10-25 This book provides the most up-to-date information on hybrid solar cell and solar thermal collectors, which are commonly referred to as Photovoltaic/Thermal (PV/T) systems. PV/T systems convert solar radiation into thermal and electrical energy to produce electricity, utilize more of the solar spectrum, and save space by combining the two structures to cover lesser area than two systems separately. Research in this area is growing rapidly and is highlighted within this book. The most current methods and techniques available to aid in overall efficiency, reduce cost and improve modeling and system maintenance are all covered. In-depth chapters present the background and basic principles of the technology along with a detailed review of the most current literature. Moreover, the book details design criteria for PV/T systems

including residential, commercial, and industrial applications. Provides an objective and decisive source for the supporters of green and renewable source of energy Discusses and evaluates state-of-the-art PV/T system designs Proposes and recommends potential designs for future research on this topic
