The Bhagavad- Pyhäkaavat Pia Piironen, 2023-06-19 The historical Bhagavad - Pyhäkaavat (Bhagavad Gita) is a collection of letters mostly written by Achaemenids 'vassals dating back to the pre-Roman Iron Age of Northern Europe. Letter writing begins in Greek Anatolia in 480 B.C.E. and continues in North Europe. Ancient Veda texts are astonishing, historical first-hand information about northern kingdoms established by the Achaemenid dynasty. Previously, it was not known that the Persian sphere of influence even extended to the territory of present-day Finland. Cyrus the Great was aptly titled King of the Four Corners of the Earth : The Achaemenids were a common factor between Vedic India and Vedic North Europe. Their power also extended to Caria and Ionia in Anatolia. These people spoke and wrote in the Carian or Arian language, the language that is called the Finnish Karelian dialect nowadays. The Bhagavad Gita letters also provide valuable information about their ancient Baptist religion. Many of its features were transferred to modern religions.

1948 and 1968 – Dramatic Milestones in Czech and Slovak History Laura Cashman, 2013-09-13 This volume has been published to coincide with the anniversaries of two significant milestones in Czech and Slovak history – the establishment of communist rule in 1948 and the Prague Spring of 1968 – and in anticipation of the 20th anniversary of the 1989 ‘Velvet Revolution’. Given the ultimate failure of the communist system, these events and their legacy for Czech and Slovak society and politics merit continued study, particularly given the wealth of new data made available when state and Party archives were finally opened in the 1990s. The essays in this volume, by witnesses, historians and social scientists from the Czech Republic and Slovakia, the USA, UK and Australia offer a reappraisal of those turbulent events. They present new and original research, based on information from archives which were not opened until after 1990 and which is not yet available to audiences who do not speak Czech or Slovak. This volume will, therefore, be of interest to both specialists and general readers who are curious to learn more about these events. This book was published as a special issue of Europe-Asia Studies.

Oil in the 21st Century Robert Mabro, 2006 Oil is hitting the headlines once again. The big increases in oil prices over the past two years are upsetting consumers and puzzling producers. The reasons are difficult to understand, since few people are familiar with the complex workings of the price regime for oil in international trade. It is said that sluggish investment is a major cause, but what are the reasons for inadequate investment in oil producing and refining plants during the last 20 years? Does oil have a future? We are told that oil production will soon peak because the rate of production is higher than replacement rates. Climate change problems are casting a shadow over the future of fossil fuels. There may, however, be a solution to the nefarious CO2 emissions in, for instance, technologies that sequester carbon. Oil's stronghold is the transport sector: cars, trucks, railway engines, planes, ships. The demand for oil would suffer a fatal blow if technical innovations in car engines make it possible to use an alternative fuel to petrol or diesel. New energy sources - wind, solar, tide, waves, geo-thermal - are both renewable and environment-friendly. Do they represent a threat to the future of oil? An international team of experts addresses these highly topical questions in this comprehensive volume.
